B-BBEE management software solution for SAWS

1 DESCRIPTION

The South African Weather Service (SAWS), a Schedule 3A public entity, seeks to procure a B-BBEE management software solution to enable structured monitoring, early identification of performance gaps, evidence management, and governance reporting in line with applicable legislation and good governance practices.

We are proposing a service to an intended period of 36 months, in which the system must support ongoing B-BBEE compliance management, verification readiness, and reporting to management and its governance structures.

Objectives of the System

The appointed service provider must deliver a software solution that:

- Enables **continuous monitoring of B-BBEE performance** across all scorecard elements
- Facilitates **early identification of underperformance** and corrective action
- Provides a **central, secure repository** for B-BBEE supporting evidence
- Supports **verification readiness** and audit trail requirements
- Enhances **management and governance oversight** through dashboards and reporting

2 INTRODUCTION

The South African Weather Service (SAWS) is a public entity of the Department of Forestry, Fisheries and the Environment (DFFE) and derives its mandate from the South African Weather Service Act (No 8 of 2001 as amended). The public entity is listed as a Schedule 3A Public Entity in terms of the Public Finance Management Act (PFMA).

SAWS is tasked with providing timely and accurate scientific data in the field of meteorology to the broader South African society: a combination of both public good and commercial services. The organisation plays a vital role in South African public life, not just as a provider of key services, but also in empowering citizens to adapt the effects of the ever-changing weather.

3 BACKGROUND

South Africa's Broad-Based Black Economic Empowerment (B-BBEE) Act mandates organisations to demonstrate ongoing progress in promoting inclusive economic participation, especially among groups historically excluded from economic opportunities. These groups include black South Africans, women, youth, individuals with disabilities, and residents of rural areas. The South African Weather Service (SAWS) requires a B-BBEE management software solution that will enable it to track and enhance performance across the five key pillars of the B-BBEE scorecard. The software will support SAWS in implementing necessary changes to meet compliance standards, thereby minimising risks such as penalties or reputational harm.

4 REQUIREMENT / SCOPE OF WORK

The appointed service provider will be expected to provide, implement, configure, and support a B-BBEE management software solution that meets SAWS' functional, governance, security, implementation, and support requirements set out below.

4.1 Technical / Functional requirements

The system must, as a minimum, provide the following functionality:

4.1.1 Scorecard Management

- Support for the **Generic B-BBEE Codes of Good Practice**
- Automated scorecard calculation and weighting
- Scenario planning and gap analysis functionality

4.1.2 Evidence and Document Management

- Centralised electronic repository per scorecard element and indicator
- Secure document upload, indexing, version control and retrieval
- Ability to generate a **verification-ready evidence report and pack**

4.1.3 Monitoring, Controls and Workflow

- Role-based user access and approval workflows
- Automated alerts and reminders for key deadlines and expiring evidence
- Audit trail reflecting changes, approvals and document history

4.1.4 Reporting and Governance Oversight

- Management dashboards reflecting performance by scorecard element
- Exportable reports suitable for **EXCO and Board Oversight Committees**
- Ability to track progress against corrective action plans

4.1.5 Procurement and Preferential Procurement (Optional but Advantageous)

- Supplier B-BBEE certificate management
- Spend tracking aligned to Preferential Procurement indicators

4.1.6 Pre verification audit

- The system must be able to run a mock verification audit and provide the report

4.2 Governance, Compliance and Security

The system must:

- Align with the Public Finance Management Act (PFMA) and principles of transparency, accountability and internal control
- Support audit and assurance requirements such as ability to upload evidence and preliminary verification audit (internal and external)
- Comply with POPIA requirements, including data protection and access controls
- Be hosted in a secure environment with documented backup and disaster recovery arrangements

4.3 Implementation and Support

Service providers must outline their proposed implementation methodology, project governance, deployment timelines, training approach, support model, and ongoing maintenance.

- A proposed implementation plan, including key activities, milestones, responsibilities, configuration, testing, deployment, and go-live timelines, with implementation to be completed within a reasonable period from contract commencement.
- A training approach covering end users and administrators, together with user support arrangements, user manuals, and refresher training where required.
- An ongoing maintenance and technical support model, including update management, incident handling, escalation procedures, and service response arrangements for the contract period.

5 DELIVERABLES

- A detailed implementation plan, including project timelines, key milestones, roles and responsibilities, and the proposed approach to configuration, testing, deployment, and go-live.
- A fully configured and operational B-BBEE management system, including scorecard setup, user profiles, role-based access controls, workflows, dashboards, reporting capability, and secure hosting arrangements.
- Configuration of a centralised evidence repository and any agreed data migration or initial data-loading activities required to support verification readiness, audit trails, and document retrieval.
- User training, administrator training, user manuals, and ongoing technical support and maintenance for the contract period, including system updates, issue resolution, and periodic reporting on system performance and support activities.

6 SKILLS AND COMPETENCIES REQUIRED

The service provider must demonstrate the following capabilities:

- **B-BBEE Legislative and Compliance Knowledge:** Demonstrated knowledge of the B-BBEE Act, the Codes of Good Practice, applicable scorecard elements, and the practical compliance, monitoring,

and reporting requirements relevant to organisational B-BBEE management and sector- specific codes (e.g., Generic Sector Code) and the ability to interpret and apply B-BBEE scorecard elements.

- **System Implementation and Configuration Capability:** Proven ability to deploy, configure, test, and support a B-BBEE management system, including role-based access, workflows, dashboards, reporting, and, where applicable, integration with relevant enterprise systems.
- **Data Management, Security and Verification Readiness:** Capability to manage sensitive organisational data securely, maintain audit trails, support document and evidence control, and enable verification-ready reporting and retrieval of supporting records data including experience with data validation, B-BBEE reporting, and audit trails.
