The award of the arbitrator shall be final and binding on the Parties though subject to review on any of the usual grounds for review. Any Party shall be entitled to apply to the Courts to have such award made an order of court if the party concerned fails to heed to the terms of the award. Nothing in this clause shall prevent either Party seeking urgent relief in the High Court of South Africa and for this purpose, the Parties consent to the exclusive jurisdiction of the High Court of South Africa.

1. Abbreviation

Department: Shall refer to the Department of Employment and Labour

2. Introduction

The idea of any corporate identity programme is to create a readily recognisable and positive image of the Department. The corporate identity comprises all the visual elements observed by its clients and the general public. These include its corporate signature, the way its name is written, its colours, etc. The effect of a carefully designed corporate identity system and its meticulous implementation and maintenance will dramatically promote the Department amongst its clients and general public.

Use this manual as both an introduction to, and a working reference for all forms of visual communication involving the Department. These guidelines should be adhered to vigorously in every day work. The aim is to cover the Department's identity with its multitude of positive values and principles by means of all available communication elements.

The building should make provision for access control, proper computer cabling and plugs, telephone cabling and plugs. Telephone and computer cabling is to be done by the Department's Information and Technology Division, but a two-channel power skirting should be available through-out the building.

A proper room, with industrial air-conditioning and 60Amp circuit breaker, should be provided for IT servers and telecom units.

If there is any, doubt as to how the Department's identity is to be applied, please contact Mr. Vincent Pienaar at (012) 309 4888/4067/4485

All implementation of Corporate Image / Labour Centre Models must be done strictly in accordance to this manual and NO deviations will be allowed without written approval from the Department.

3. Identification of elements

3.1 Introduction

The corporate signature is the most important visual component of the corporate identity programme.

This section will set out all controls needed to maintain a consistent quality of its use and application.

The logo and logotype are combined in a specific image. There are two formats for the corporate signature, horizontal and vertical.

The corporate colour palette is another important facet of the corporate identity programme and care must be taken to ensure that the correct colour match is achieved in all applications.

N.B

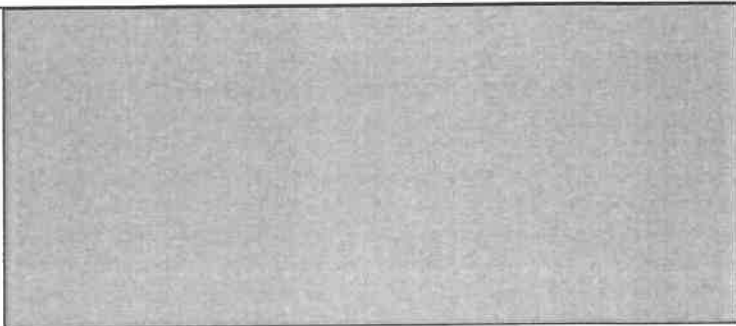

Official artwork and colour swatches are available for reproduction; samples in this manual must not be used. (Above signage to be provided by the Department and not to form part of any building or refurbishment contract)
