- Definitions
 - Alien vegetation – Any plant introduced to an area outside its natural range. Often used interchangeably or in combination with foreign, exotic, non-native, and non-indigenous
 - Aquatic plant – A plant whose natural habitat is water, living in or on water for all or a substantial part of its lifespan; generally restricted to fresh or inland waters.
 - Chemical Control - Chemical weed control refers to any technique that involves the application of a chemical (herbicide) to weeds or soil to control the germination or growth of the weed species.
 - Cut-stump – This method is an approach that combines physical and chemical control methods and is an effective way of controlling woody invasive plants. It involves cutting down the target plant and then applying herbicide on the stump to prevent regrowth.
 - Foliar application – This method involves spraying an herbicide over the foliage of a tree or shrub to kill it. The herbicide is absorbed by the leaves and transported throughout the plant disturbing the nutrient flow. Ideally used on small trees, bushes, and vines, smaller than 2.4 meters in height and for large-scale population control.
 - Grass – A plant of the family Poaceae, having jointed stems, sheathing leaves, and seedlike grains.
 - Herbicide – an agent, usually chemical, for killing or inhibiting the growth of unwanted plants, such as residential or agricultural weeds and invasive species.
 - High Risk Trees – As defined in the tree care industry, a “Hazard Tree” is a tree that poses a level of risk to people or property that exceeds the risk tolerance of the property owner or manager. This means that a tree that may be considered a hazard to one property owner may not be a hazard by another property owner.
 - Invasive vegetation – also called introduced species, alien species, or exotic species, any nonnative species that significantly modifies or disrupts the ecosystems it colonizes.
 - Mechanical Control – Any physical activity that inhibits unwanted plant growth. These methods (mechanical and manual) remove, kills injures or make growing conditions unfavourable for the weeds to grow.
 - Organic waste – Organic wastes contain materials which originated from living organisms. Organic wastes are often disposed of with other wastes in landfills or incinerators, but since they are biodegradable, some organic wastes are suitable for composting and land application.
 - Reed – Reeds are tall plants that grow in large groups in shallow water or on ground that is always wet and soft. They have strong, hollow stems.
 - Regrowth – Woody species that have been cut and treated; sprouting from the cut stump, up to 1,5 meter.

- Single stem – A woody species with one stem from ground level up to one (1) meter before branches form.
- Terrestrial Herb - Any vascular plant that does not develop a woody stem at any point during its life cycle, non woody, usually green, and soft in texture. Of or on the ground; of a habitat, on land
- Terrestrial Shrub - A woody perennial plant without a single main trunk, branching freely, and generally smaller than a tree. Of or on the ground; of a habitat, on land.
- Tree – A woody plant, usually with a single distinct trunk and generally more than 2–3 metres (6.6–9.8 ft) tall

7. VALIDITY PERIOD

The validity period for the tender after closure is 90 days. CoT shall have right and power to extend any tender validity period beyond any initial validity period set and subsequent extensions. Extension of validity shall be finalized while the quotations/bids are still valid.

8. MARKET ANALYSIS

The City of Tshwane reserves the right to conduct a market analysis. Should the City exercise this option, where a tenderer offers a price that is deemed not to be viable to supply goods or services as required, written confirmation will be made with the tenderer if they will be able to deliver on the price. If a tenderer confirms that they cannot, the tenderer will be disqualified based on being non-responsive. If they confirm that they can deliver, a tight contract to mitigate the risk of non-performance will be entered into with the service provider. Further action on failures by the supplier to deliver will be handled in terms of the contract, including performance warnings, and listing on the database of restricted suppliers.

The City further reserves the right to negotiate a market-related price with a tenderer scoring the highest points. If the tenderer does not agree to a market-related price, the City reserves the right to negotiate a market-related price with the tenderer scoring the second-highest points. If the tenderer scoring the second-highest points does not agree to a market-related price, the City reserves the right to negotiate a market-related price with the tenderer scoring the third-highest points. If a market-related price is not agreed upon, the City reserves the right to cancel the tender.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
