TERMS OF REFERENCES FOR THE APPOINTMENT OF A SERVICE PROVIDER TO DEVELOP MAPUTO CORRIDOR BUSINESS CASE FOR THE DEPARTMENT OF TRANSPORT FOR A PERIOD OF 12 MONTHS

1. BACKGROUND

- 1.1. In 2005, Cabinet approved the National Freight Logistics Strategy (NFLS), which mandated the Department of Transport to map and institutionalise the various freight corridors through a Public-Private-Partnership (PPP), as well as enhancing integrated planning between government and the private sector.
- 1.2. The NFLS identified the Maputo Development Corridor (MDC) as a key and strategic corridor which is supported by a transportation corridor linking the east-coast Port of Maputo with Gauteng, Limpopo, Mpumalanga and other landlocked countries within the SADC region and the continent (e.g. Namibia, Botswana, Swaziland and Mozambique). The key elements of this corridor are the N4 toll road, the rail corridor, the Lebombo/Ressano-Gracia border post and the Maputo Port and Terminal facilities.
- 1.3. The port of Maputo is only 590 km by road from Gauteng and 581 km by rail and presents the shortest route to a port for South African exporters from Gauteng, Mpumalanga, Limpopo and surrounding areas. Cargo through the Lebombo Border Post has grown significantly from almost zero in 2002 to above 3,5 million tons per annum over the years.
- 1.4. Transnet Freight Rail moves over 3,5 million tons of cargo per annum, mostly being coal and magnetite exports and little on general cargo. The rail sector in the corridor has capacity to handle over 7 million tons depending on the economic up-turn, however, the long aim is to increase its capacity to over 15 million tons. Transnet Freight Rail (TFR) is working closely with CFM (the Mozambican rail operator) and Swaziland Railways on operations and marketing, and Grindrod, the operator on the Maputo Port Terminal.
- 1.5. The above-mentioned corridor already has the following existing nodal points: Port of Maputo (throughput over 6.2 million tons) Nkomazi SEZ Lebombo border post. There is already a relationship between Transnet Freight Rail, Swaziland Railways, CFM (Mozambique Rail Operator) as well as organised private sector.
- 1.6. As indicated above, that the NFLS mandated the Department of Transport to institutionalise corridors, it therefore was under this mandate that, the Chief Directorate: Freight Logistics deemed it fit that, due to the already existing institutionalised arrangement on the western

part of the corridor (Trans- Kalahari Corridor), it was apparent that this corridor becomes next to be institutionalised.

- 1.7. The Maputo Corridor Business Case seeks to initiate the formalisation in the institutionalisation process by identifying projects and processes, which will lead to the eventual institutionalisation of the corridor.

2. PROBLEM STATEMENT

- 2.1. This project is informed by the need to deal with the constraints as identified by freight transport operators along Maputo corridor and therefore develop a comprehensive business case to help improve freight transport operations. These challenges include, but not limited to:

- 2.2. Inadequate road infrastructure:

- 2.2.1. This is due to insufficient investment and the absence of road maintenance programs.

- 2.3. Inefficient border post:

- 2.3.1. Ineffective border management systems, paper-based, on-site execution of customs clearance procedures, lack of ICT systems for data exchange and repetitive processes and procedures result in lengthy delays at Lebombo border post.
 - 2.3.2. Limited operating hours and inappropriate operating procedures lead to congestion.
 - 2.3.3. Lack of focus on the core traffic, which is transit cargo.

- 2.4. Customs procedures and administration:

- 2.4.1. The non-standardized customs rules and procedures resulting in excessive delays at the border post

- 2.5. Absence of performance monitoring systems:

- 2.5.1 The absence of performance monitoring systems along the corridor prevents the decision-makers from identifying bottlenecks and responding to infrastructure constraints urgently.
 - 2.5.2. Lack of dedicated systems for monitoring projects, which makes it difficult to monitor projects in a consistent manner.
