REPUBLIC OF SOUTH AFRICA

DEPARTMENT OF
TRANSPORT AND COMMUNITY SAFETY

TERMS OF REFERENCE FOR REVIEW OF FREIGHT TRANSPORT IMPLEMENTATION STRATEGY FOR LIMPOPO PROVINCE

1. INTRODUCTION

The Limpopo Province has recognised the need to incorporate freight transportation in the transport planning process. Freight transport is crucial for the economy of the province and country. It influences economic growth and development of the province directly through efficiency of the freight transport system.

Limpopo Province is regarded as “the Pride of Africa” (LDP 2022-2025), which warrants the mechanisms to undergo greater efficiency and economic productivity in the movement of goods and services. The strategic location of the province provides optimal conditions for importing/ exporting from South Africa and the industrialised regions of the continent. A transportation system, which is not efficient is a serious constraint on economic activities. It is necessary that the various modes should be allowed to operate at the optimum efficiency allowing free competition, intermodal co-operation and co-ordination.

Furthermore, it is critical that the role of freight transport should be clearly defined. This will permit authorities and stakeholders in the freight industry to clearly understand the parameters within which the industry operates in the wider transport system. The major regulators and providers of the freight transport infrastructure, being the National Department of Transport and Provincial Department of Transport and Community Safety have responsibilities to execute the mandate of monitoring the implementation of

the National Land Transport Strategic Framework, as well as the administration of the National Road Traffic Act, to be incorporated in the freight transport movements and the transport plan.

“Clauses 36(1) and (2) of the National Land Transport Act (NLTA) require that:

- Transport plans must be developed to enhance the effective functioning of cities through integrated planning of transport operations, **including freight movements.**
- The MEC must ensure co-ordination of the planning process of all planning authorities under the jurisdiction of the Province and must **ensure that all plans address freight movements.**

The National Freight Logistics Strategy, 2005 was approved and the Province needed to align its freight implementation Strategy with National Freight Logistics Strategy to ensure a cohesive and alignment approach to freight management countrywide.

In order to put the Department in a position to develop the Limpopo Provincial Freight Transport Strategy and other Strategies, the first step is to understand the existing freight movement patterns within the Province, and to identify the key freight transport issues including challenges that will need to be addressed. The National Department of Transport has undertaken the following initiatives:

- By establishing a freight transport databank for the Province in conjunction with the Department of Transport and Community Safety.
- By inviting the Department of Transport and Community Safety to be part of the review of the Road Freight Strategy of 2017.
