PART C2: SCOPE OF WORK

1. INTRODUCTION

The South African National Space Agency (SANSA) is a PFMA Schedule 3(A) public entity which has been established in terms of South African National Space Agency Act, 2008 (Act No 36 of 2008). The South African National Space Agency (SANSA) has a mandate to co-ordinate and integrate national space science and technology programmes and conduct long-term planning and implementation of space-related activities in South Africa, for the benefit of the citizens of South Africa. More information about the organization can be found at <http://www.sansa.org.za>

EMC test laboratory at Houwteq Facility will as part of SANSA be certified as a fully accredited EMC test facility and the performance of emission testing, like in any other EMC test facility, is essential to achieving this goal.

A Radio Frequency Interference (RFI) Receiver is essential to the on-going operation of the test facility and the performance of radiated and conducted RF emission testing in the frequency range of 10Hz to 40GHz according to MIL-STD-461G, RTCA/DO-160G and commercial industrial specifications such as CISPR , ETSI , FCC and others.

The new receiver should incorporate the latest technology to allow for testing to be performed on a fully compliant basis utilizing the older established method of scanning frequency ranges to measure radiated and conducted emissions as well as the latest technology using time domain testing which will allow for much faster testing and improved accuracy of results especially for measuring pulse interference.

SANSA invites service providers to this Request for Proposal (RFP), reference number CO/084/05/2024, to appoint a suitably qualified and experienced service provider to supply and deliver Compliance testing EMI Test Receiver System.
