BID NAME

RE-ADVERTISEMENT: APPOINTMENT OF A SERVICE PROVIDER FOR THE REPAIR OF VARIOUS BULK WASTE CONTAINERS, AS AND WHEN REQUIRED

BID NUMBER

(Q02-01-2025-26)

1. INTRODUCTION

The City of Tshwane (here after referred to as the CoT) is seeking service providers to submit quotations for the repair of various bulk waste containers, as and when required over a 6 month period. This is a City wide quotation for modification and repair of steel bulk containers which are in various regions.

1.1 Workshop

The bidders must have a functional workshop, preferably within Tshwane or neighbouring areas, where containers will be repaired. The bidders are expected to collect and return bins needing repairs from the City premises to their workshop as and when required. It is expected that the bidder should have vehicles which are compatible with the steel waste containers.

1.2 Quantity of bins to be repaired

The city anticipates repairing more than 120 steel containers over a period of 6 months as and when required.

2. BACKGROUND

The City utilizes various waste containers in the delivery of bulk waste management services. These services are often offered to businesses, hospitals, shopping malls, and residential properties by using 4m³, 6m³, 9m³, 11m³ and 22m³ steel bulk waste containers.

In order to sustain the current bulk waste services which provides a much-needed service to various clients, a care and maintenance plan for these containers is therefore important.

This care and maintenance plan includes effecting minor repairs on damaged bulk waste containers, in order to extend their useful life.

3. DESCRIPTION OF SERVICES

The bidders are expected to repair/ refurbish steel bulk containers as described below. This will include skips (4m³, 6m³, 9m³ and 11 m³) and 22m³ bulk steel containers.

3.1 MATERIAL

The material must all be fabricated and rolled steel parts, A-grade quality mild steel, with 430 MPa to 500 MPa UTS (Ultimate Tensile Strength), and have the following through section dimensions:

- 1) Plate and pressed sections 4,5mm Mild Steel Plate.
- 2) Hinge bar 50mm.
- 3) Tip bar 40mm Mild Steel Round.
- 4) Rear hook bar 25mm diameter.
- 5) Tip bar lugs and backing plate 8mm Mild Steel Plate.
- 6) Lifting trunions- 65 Diameters. Forged Steel

3.2 LIFTING LUGS

The 4 (four) lifting lugs are forged steel. The lifting lug base is full welded to the outer face of the side plate. The vertical channel pressing is then fitted over the lug and full welded to the lifting lug. The outer wedge section of the lifting lug is fitted with the centre line of the wedge on a vertical plane, the small edge of the wedge uppermost. See drawings attached as **Annexure A**. The physical inspection of the bulk containers will be done during the quotation briefing session.

3.3 TIPPING BARS

A 40mm diameter, solid steel tip bar is space welded into 4 (four) 150mm x 8mm steel brackets, these brackets are in turn full welded to 8mm steel cross bearing plates. The assembly is then fully welded to the end base section. These assemblies are then fully welded to the front and back face of the containers

3.4 FLOOR SECTION

The floor construction is the folded type with 5 (five) equal spaced pressed angle shapes along the longitudinal plane. This results in 15 (fifteen) reinforcing bends.

3.5 SIDES

The sides are folded edges with the top sill section reinforced by a full pressed channel for strength. The side bottom section is folded under the floor plate thus reinforcing the bottom corners.

3.6 ENDS

The ends are also folded with folds on all 4 (four) sides which thus reinforces all the joining corners. The top is also reinforced with a fully pressed channel to double the strength.

3.7 UPPER –INNER CORNERS

All upper inner corners of the bin are reinforced by a fully welded 140mm wide tapering angle gusset.

3.8 LIFTING HOOK

A lifting hook is forged steel. The lifting hook base is full welded to the outer face of the front plate and is reinforced.

3.9 CONSTRUCTION AND WELDING

The edge-to-edge method of construction is **NOT** allowed. The construction is space welded inside and outside, apart from the critical areas such as lift trunions and tipping brackets which are fully welded.

3.10 BRANDING

The bidder should also include price for branding of each container in-case the city requires such service. The City's logo must be attached on a 30cm x 30cm branding area on the sides of the bins. The art work for the logo will be provided to the successful bidder upon appointment. However, pricing of the logo is also included in the pricing schedule.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
