SECTION 2: BACKGROUND, PURPOSE, AND SCOPE OF WORK

Airports Company South Africa has a strategy to Innovate, Grow, and Sustain. The 'innovate' pillar is supported by the innovation strategy that outlines that ACSA should embark on open innovations through partnerships and/or market participations when ideating, developing prototypes, and testing the innovative idea in a controlled environment to prove its viability prior to full integration into operations.

The Airports Company South Africa Risk Management Department has a mandate to capacitate all employees with understanding of Enterprise Risk Management (ERM) and Business Continuity Management (BCM). This process of embedding ERM and BCM practices requires innovative ways in which the knowledge and skill imparted by the Risk Management Department can be retained by the employees for successful implementation. Therefore, ERM has considered the innovative idea of incorporating emerging technologies such as augmented reality (AR) and virtual reality (VR) to ensure that employees can engage in immersive training without requiring a physical trainer. This will allow employees to access training from smartphones, laptops, virtual reality devices, removing the need to travel to training sites. ACSA will ensure that the workforce is empowered, supported, and inspired to achieve their best.

SCOPE OF WORK

ACSA is seeking a service provider that will conduct a proof of concept (PoC) for the innovative idea of changing the traditional method of offering risk management training through utilization of immersive technologies which is AR and VR, proving the convergence of AR (Augmented Reality) and VR (Virtual Reality) with training discipline.

In scope:

- Create a risk management training solution based on ISO 31000 risk management process comprising of: Communication and consultation, establishing context, risk identification, risk analysis, risk evaluation, risk treatment, monitor and review; in an augmented reality and virtual reality 3D models or animation that are interactive and have gamifications to allow immersive experience while engaging with training content.
- To boost motivation for participation and enhance engagement the solution should have a gamification aspect to it, such as inclusion of achievement badges for completing tasks, have things such as leaderboards to encourage competition and completion of tasks also have immediate feedback loops/responses.
- ACSA will provide the existing manual or traditional training material that is paper based and on PowerPoint. These risk management training manuals must be converted into AR and VR 3D models.

- Users must access the training content using smartphones, tablets, laptops, desktop computers, and virtual reality equipment. For the PoC period, the VR training content will be tested using ACSA's existing VR goggles and pods.
- To ensure that the identity of a training taker is authentic, the solution must have a proctoring capability and conduct random verifications during the training progress.
- The training tool must generate the competence results for each training taker, and generate reports i.e. attended and completed tasks, certificate of attendance, etc. There must be a capability to send training invitations and reminders to the targeted employees based on functions they perform, location, etc.
- Assessment & feedback: the solution should encompass real-time feedback, scoring, performance tracking.
- The appointed service provider will be expected to deliver a minimum viable product within 6 weeks from appointment and complete the PoC execution within 4 months following the design thinking methodology, during which the analysis, prototype development, testing and refinement of the prototype will be conducted in an agile manner and piloted with a targeted group of users.
- At the end of the PoC, the service provider will draft a recommendation report outlining the validated assumptions and the actual results, lessons learnt, and considerations for next steps.

Out of PoC Scope

- The risk management training solution will be integrated into Learner Management System to enable tracking of learning progress once the PoC is completed.
- Furthermore, should the PoC based on ERM modules prove to be viable, the scope will be extended to include business continuity management processes.
- ACSA will ensure that environmental requirements are adhered to, this includes space for VR movement, AR markers, and other safety related considerations.

Additional information

1. ACSA will be responsible for certifying the training content.
2. Should the PoC be successful, the contract will be amended for a full rollout of the solution to all airports.
