1. Background and Context

- 1.1 The Electoral Commission is desirous to appoint a service provider to provide support in respect of ensuring quality assurance for the printing, scanning, labelling and packaging of ballot papers, voters roll and result slips for the forthcoming 2026 local government elections (LGE 2026).
- 1.2 A high degree of accuracy and quality control is required for this project.
- 1.3 Prospective service providers must possess technical capacity and experience to provide quality assurance at the scale required and be capable and prepared to deliver a high-quality service at the right time and at the right place.
- 1.4 Bidders must note that an independent layer of quality assurance is required not only for the printing of the ballot papers, but may include quality assurance around inter alia ballot book finishing and kitting, packing, labelling, palletising and delivery thereof. Emphasis on the quality assurance of the ballot book finishing and kitting, packing and labelling is a significant component in a project of this nature. In addition, the quality assurance services may include printing of the LGE2026 voters roll for the elections and results slips.
- 1.5 Material planning for an election is done on a base element of a voting district. It is, therefore, important for bidders to comprehend the magnitude of packaging, kitting and labelling quantities of ballots destined for around 23,699 voting stations with special emphasis on accuracy and zero errors within a compressed time period.
- 1.6 For the purposes of LGE2026 planning, the Electoral Commission has to avail 4,488 unique ward ballots, 214 municipal proportional representatives (PR) ballots and 44 district council (PR) ballots. The total estimated number of ballot papers to be printed for LGE2026 is approximately 75.5 million.
- 1.7 Monitoring of printing spoilage, machine proofs, destruction of these ballots and security measures are also an integral part of the project and the quality

assurance service provider must provide monitoring services for all aspects at the printing plant during the period.

- 1.8 The technical knowledge, understanding and expertise provided by the bidder contributes additional value in this regard, especially in print companies who are less familiar with the complexity of detailed packaging requirements for a product such as ballot papers.
- 1.9 Printing production processes will run 24 hours a day during the appointed production period. Therefore, the technical support and quality control pertaining to this project will require a higher degree of flexibility, availability at short notice (standby 24 hours a day), additional after-hours work and a higher level of technical experience, knowledge and competence.
- 1.10 The total anticipated man-hours for the ballot paper, voters roll and result slips printing quality assurance project management will be based on the ballot paper printing taking place over a printing window of 21 continuous calendar days including weekends and public holidays.

For illustrative purposes, on a particular ballot paper printing day for the purposes of activity at any single printing plant, the successful service provider should have available, a regional co-ordinator, a shift supervisor and at least two quality assurance monitors. The actual capacity requirements will be informed by the final allocation of ballot printing to selected printers and the volume of ballot papers that will be printed at each printing plant. The successful bidder's senior national project manager will centrally manage the allocation of resources and processes. For obvious reasons the successful service provider will also need to ensure that its administration around the project is efficient and accounts for all activities and resources utilised.

- 1.11 The bid will be awarded based on bids that offer market related value and demonstrate technical ability, knowledge, capability and capacity.

* Rates payable may preferably be lower than applicable AA rates per km travelled but shall not exceed the applicable AA rates.

12.2 Any other additional costs not provided for above that may arise during or after award of the tender will not be entertained. Bidders must, therefore, ensure that their fee structure adequately covers all expenses at their end as would be the case of appointing consultants in general.

12.3 The Electoral Commission reserves the discretionary right to consider the overall outcome of the tender process and the cost of the services to be rendered.

12.4 Air travel, car rental, hotel accommodation and meals will be based on relevant applicable Government tariffs as determined by National Treasury at the time of executing the project activities. Travel and accommodation arrangements may accordingly be made and paid by the Electoral Commission, otherwise reimbursive claims in respect of travel and accommodation arrangements will be done based on the applicable Government rates and tariffs. travelled will be submitted to the Electoral Commission for consideration and approval. Travel time and kilometres to be travelled will not exceed time and cost associated with similar travel requirements by air. For example, the senior national project manager will not travel from Johannesburg/Durban to Cape Town by road as would defy the objectives of time used for project management purposes.

- 12.6 Travel claims for regional co-ordinators will be limited to travel between printing sites as may be warranted to enable them to fulfil their project obligations. No travel claims will be accepted for purposes of travelling to and from work.
- 12.7 The Electoral Commission shall not be liable for costs associated with the travelling and accommodation of quality assurance monitors and supervisors. The successful bidder will be liable for all other travel and accommodation expenses relating to all other capacity levels.
- 12.8 Shift work on a 24-hour basis (two (2) shifts of 12 hours each) is anticipated for the ballot paper printing project over a continuous 21-day period. Day shifts may start from 06:00 – 18:00 and night shift may start from 18:00 – 06:00. Such shift work may also be required in respect of the result slip and voters' roll printing projects, if applicable.

13. Special Conditions and Requirements for Submission

- 13.1 The tender purposefully excludes commercial printers from competing for the ballot paper printing quality assurance tender. This is intended to avoid a situation where a commercial printer 'sit over' the work of another commercial printer as all sorts of perverse incentives would arise if this were to be allowed.
- 13.2 Where specific written proposals are called for in this bid requirement, such must be provided.
- 13.3 The Electoral Commission will assess the various requirements to be covered in the bidder's written proposal as part of the evaluation of bids and bid adjudication processes.
- 13.4 Failure to submit the required and applicable written proposal and/or

documentary evidence shall, therefore, lead to disqualification of a bid submission.

- 13.5 The Electoral Commission will not request additional information for evaluation purposes in the event of the bidder's failure to include essential information. Bid responses will be evaluated as submitted and should, therefore, be as comprehensive as possible.
- 13.6 The Electoral Commission does, however, reserve the right to verify and/or clarify the information provided. If information is found to be factually incorrect, misrepresented or is not provided, the bid will be disqualified.
