No.	Date	Ref	Supplier Clarification Question	Eskom Response
1.	01/10/2025	-	The time frame allocated for the tender is insufficient as the pricing schedule has more than 900 items to be quoted for. This is a mammoth task and cannot be achieved within the short time frame provided. From experience, (as we had bid for this tender last year) a tender of this magnitude is voluminous in nature and building the technical file alone is challenging. Please consider extending the tender by a further month as it would be almost impossible to achieve pricing all the items requested within the deadline provided.	Eskom accepts the 14 November 2025 as the new closing date, with the condition of no further extensions.
