## **1. PURPOSE**

- 1.1. To appoint a service provider to design, develop, and implement a web-based directory of SMMEs operating within the waste circular economy.

## **2. INTRODUCTION AND BACKGROUND**

- 2.1. In South Africa, there is a lack of reliable data on small business enterprises. Obtaining an accurate account of the number of Small, Micro, and Medium Enterprises (SMMEs) and Co-operatives; the type of services and products offered; location and geographic distribution of these enterprises covering both formal and informal sectors is a challenge. A reliable database must be established to inform policy interventions, resource allocation, and the design of effective support programmes.
- 2.2. As such, the Department of Forestry, Fisheries, and the Environment (DFFE) intends to appoint a service provider to design, develop, and implement a web-based directory of SMMEs operating within the waste circular economy.
- 2.3. The Chemicals and Waste Management (CWM) Branch has a portal, [www.sawic.gov.za](http://www.sawic.gov.za) where all applications are deployed. There will be a link to the portal for this web-based directory.
- 2.4. The web-based directory will provide various filters that will help distinguish the type of SMME services and products offered; where these services and operations are taking place within the waste value chain and the location of those enterprises; including the necessary contact details and related information.
- 2.5. The web-based directory will also provide information on where funding is available; where waste circular economy SMMEs can access non-financial support in the form of technical expertise; available training; incubation and business development services.
- 2.6. The web-based directory will be managed, updated, and maintained by the DFFE; and will be linked to the centralised National Department of Small Business Development (DSBD) SMME and Co-operatives database.
- 2.7. It is noted that the DSBD is mandated to lead and coordinate an integrated approach to the promotion and development of SMMEs and Co-operatives, and to ensure an enabling legislative and policy environment to support their growth and sustainability.
- 2.8. Of note is that the DSBD has developed and is currently coordinating the aggregation of all publicly accessible small business data sets under a dedicated portal ([www.smmesa.gov.za](http://www.smmesa.gov.za)). This database includes small business data gathered via the CIPC's BizPortal site, tax data gathered by SARS, and information provided by local actors such as Municipalities including Local Economic Development Offices, Ward Councillors, Industry Associations (South African Informal Traders Alliance, Business Chambers, etc), membership-based organisations, Business Development Providers including Professional Bodies and any other relevant stakeholders.

- 2.9. Furthermore, the DSBD in partnership with other role players will constantly conduct national surveys of the SMME sector to generate a reasonably updated account of the informal and formal SMMEs within the country.
- 2.10. It is therefore important that the DFFE coordinate, develop, manage, and maintain a web-based directory for the waste circular economy to be linked to the DSBD dedicated portal to provide a more comprehensive picture of SMME and Co-operatives activities within the waste circular economy.

### **3. OBJECTIVES**

- 3.1. The objectives of the project:
  - 3.1.1. To design, develop, implement, and maintain a web-based platform with various filters (including but not limited to business information of SMMEs and Co-operatives; location and geographic distribution; type of services and products offered; operations taking place within the waste value chain; financial and non-financial support available, etc.).
  - 3.1.2. Conduct baseline research of information to be populated and loaded onto a web-based platform and made available to all stakeholders through authorised access control on the platform (POPI Act)
  - 3.1.3. Develop a mobile APP on IOS and Android (the platform should also be downloadable from iStore and PlayStore through the mobile APP)
  - 3.1.4. Conduct skills transfer and capacity building for DFFE officials to allow for continued management and maintenance of the system beyond the service provider contract.

### **4. SCOPE AND EXTENT OF WORK**

The service provider is expected to do the following:

- 4.1. Planning Phase
  - 4.4.1 Inception meeting
  - 4.4.2 Development of project plan and charter
  - 4.4.3 Conduct a landscape assessment (desktop assessment) on business information of SMMEs and Co-operatives within the waste circular economy; location and geographic distribution; type of services and products offered; operations taking place within the waste value chain; financial and non-financial support available; and produce a baseline report.
- 4.2. Analysis and design
  - 4.2.1. Requirements gathering
  - 4.2.2. Analysis (Conduct a Desktop Research on similar web directories locally and globally)
  - 4.2.3. Logical design and implementation

- 4.3. Development, integration, and quality assurance
  - 4.3.1. Develop a Business Requirement Specification based on the user requirements that will be developed by the DFFE.
  - 4.3.2. Develop a functional mobile APP-based platform to display this directory of SMMEs and Co-operatives. The mobile APP should be compatible with Android, Tizen, and IOS systems.
  - 4.3.3. Develop a web-based platform and populate information collected from the desktop assessment into a directory to be hosted on the web-based platform. The platform must also be able to provide user information for monitoring and reporting purposes. A report should also be compiled to inform how the platform will be used and maintained (for regular updating of information on the directory, etc.). The report should also highlight the links established to the different websites and organisations; contact details of the people from those websites/organisations; and how integration and updates from those websites automatically get affected on the DFFE web-based platform).
  - 4.3.4. Verify requirements against User Requirements Specifications.
  - 4.3.5. Migration of data sitting on spreadsheets or other related web directories such as SAWIC, DSBD, SARS CIPC, etc.
- 4.4. User acceptance testing
  - 4.4.1. develops test cases and test scenarios (including conducting test sessions)
  - 4.4.2. Run system tests before the platform and mobile APPs go live.
  - 4.4.3. Review results and identify result bugs.
  - 4.4.4. Address any emerging concerns and technical challenges within the timeframe set aside for developing the platform.
  - 4.4.5. Test signoffs.
- 4.5. Training and Development (Capacity Building)
  - 4.5.1. During the development and testing of the web-based platform and mobile APP, the service provider must ensure that DFFE officials receive capacity building and training so that there can be a seamless skills transfer and for the officials to be able to maintain the system beyond the period allocated for this project. The system is expected to be self-maintained by DFFE officials beyond the service provider contract. The training must be custom-made for super users (officials who will be interfacing with the users- SMMEs, Government departments, and the private sector using the web-based and mobile APP platforms) and technical training for officials who will be maintaining the platform (timeframes for maintenance and training are within the period allocated for this project). The Service provider should indicate the number of training sessions, training material that will be developed (soft/hard copies), and user guidelines/manuals for general use of the platform and mobile APP.

- 4.5.2. Develop training user guide for end users and administrators- on an editable soft copy.
- 4.5.3. Train the trainer and then train the technical team.
- 4.6. Implementation of the system and Go-Live
  - 4.6.1. Web Based Directory
  - 4.6.2. Mobile APP-based platform
- 4.7. End user support and maintenance for 12 months
  - 4.7.1. Develop a maintenance plan/programme/protocol for the web-based platform. Maintenance of the platform must be done after the platform is developed. Maintenance must be for the duration the service provider is contracted to the project and after this period, the DFFE officials who will be identified will maintain the platform. The service provider must ensure that when drafting their proposal, they must indicate in their proposal how much it will cost with maintenance (technical support) and without maintenance in their budget for the duration of this project.
- 4.8. Closeout Report
  - 4.8.1. Compile a closeout report on the web-based directory and mobile APP, highlighting partner organisations and departments on created links to their resource material and permissions for linking/using their information on the web-based directory. Should also highlight lessons learned and advise on future needs/requirements for the system (noting that technology is evolving continuously and what has been developed needs to be aligned and plugged into the DFFE SAWIC systems). Must also highlight transitioning process for handover, timeframes, and costing – hosting of directory on DFFE website and links to external partners/websites.8.
- 4.9. The report should also distinguish how SMMEs, Government, and Private Sector/DFIs will access and use the web-based directory highlighting-
  - 4.9.1. SMMEs: How they will register and upload their information into the directory. How they will use the directory. How their access and use of the directory will be monitored and reported. And how partnerships emerging from the use of the directory can be monitored and reported by DFFE officials through the system.
  - 4.9.2. Government: How the different government departments; provinces and municipalities will access and use the directory to contact SMMEs for any support/projects they want to offer/involve them. The web-based platform should also be able to provide information (footprints) that can be used for reporting which SMMEs were visited online/ and or approached.
  - 4.9.3. Private Sector/DFIs: How the different private sector/DFIs will access and use the directory. How they will /should engage with the SMMEs and how their activities on the web directory will be monitored and reported by DFFE officials.
