3.1. Special Instructions

Should a bidder have reason to believe that the Functional Requirements are not open / fair and/or are written for a particular service provider; the bidder must notify Sasria Procurement within five (5) days after publication of the RFP.

3.2. Background Information

Sasria is regulated by the Financial Sector Regulation Act No. 9 of 2017 and the Insurance Act No.18 of 2017 and is required to comply with the governance standards. In order to comply with the legislation, Sasria has decided to outsource the Head of the Actuarial Function (HAF), as defined in GOI 3 – Risk Management and Internal Controls for Insurers.

Please note that this does **not** include the outsourcing of Sasria's Actuarial Department which is responsible for the calculation of the technical provisions and capital requirements.

In addition to the HAF services, this contract will include the validation of Sasria's internal economic capital model (ECM). Over the three years of the contract period, the full validation of the ECM model should be completed.

3.2.1. Actuarial department background

Sasria has an internal actuarial department that consists of one qualified actuary and three actuarial analysts. The team reports into the Chief Actuarial Officer.

Sasria performs a full valuation annually to determine regulatory and financial statement technical provisions. The technical provisions that are calculated quarterly are based on the development patterns produced in the annual valuation. The methodologies employed to calculate technical provisions are standard actuarial methodologies and include the chain ladder method and the Bornhuetter-Ferguson method.

Sasria calculates both the economic and regulatory capital requirements in full on a quarterly basis. The standard formula is employed to calculate regulatory capital requirements.

The internal economic capital model is used for risk management purposes and decision making within the organisation. The model is built within ReMetrica and is made up of the following components:

- Non-life underwriting risk: where the losses are split between attritional (loss ratio projections); large (frequency-severity) and catastrophe (scenario set based on a PML study).
- Market & credit risk: Assets are modelled based on scenarios from outsourced Economic Scenario Generator (ESG) results.

These are combined with the regulatory Operational Risk charge to determine the Economic Capital Model (ECR).

Sasria performs a regular Own Risk and Solvency Assessment (ORSA) on an annual basis in line with its business planning period which runs from September to February every year.

3.2.2. Financial background

The table below highlights financial metrics from Sasria's financial statements for the year ending on 31 March 2021.

Figures in Rand thousand	2021
--------------------------	------

Extracts from Statement of comprehensive Income	
Gross insurance premiums written	3,130,423
Net insurance claims and loss adjustment expenses	28,952,190
Net Investment Income	307,797
Extracts from Statement of financial position	
Total assets	20,455,747
Insurance contract liabilities	17,050,485
- Claims reported and loss adjustment expenses	16,455,458
- Claims incurred but not yet reported	27,076
- Unearned premium provision	567,951

The above extract of the financial statements changed significantly into 2022 following the July 2021 Unrest, however, the 2022 results have not been finalised currently and have therefore not been reported above.

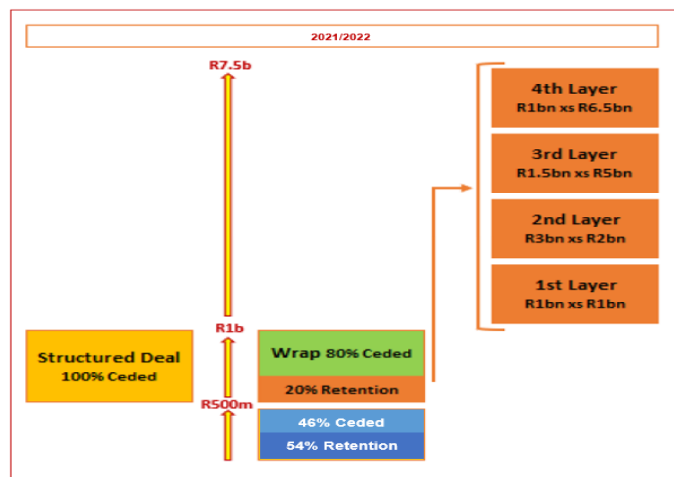

Sasria may declare a dividend on an annual basis to its sole shareholder (South African Government) following the finalisation of its financial statements and ORSA process for the preceding year.

3.2.3. Investment background

Sasria invests in assets including cash (with South African banks as well as with the South African Reserve Bank) and money market instruments. Sasria generally doesn't hold unlisted assets and all assets are Rand denominated.

3.2.4. Sasria's reinsurance structure

Sasria reinsurance structure as at 31 March 2022 is summarised by the figure below.

3.2.5. Regulatory background

Sasria's insurance business is reported under the Motor, Property, Engineering and Other line of business as per the regulatory subordinate legislation, though it is classified as Terrorism.

Sasria's regulatory solvency position was in excess of 200% on a consistent basis prior to the July 2021 unrest but was negatively impacted by claims resulting from the unrest.

3.3. Scope of Work

3.3.1. HAF Services

- Express an opinion to the board of directors on the appropriateness of Sasria's Asset-Liability Management Policy (currently included in Sasria's Investment Policy), Underwriting Policy and Reinsurance Policy; and express an opinion on the adequacy of Sasria's reinsurance adequacy and other risk transfer arrangements.

- Review and sign-off of annual quantitative return to be submitted to the Prudential Authority.
- Perform a validation of Sasria's economic capital model (ECM)

The HAF will report to Sasria's Risk Committee as and when reports become available.
