SECTION 3

BACKGROUND OVERVIEW AND SCOPE REQUIREMENTS

1 INTRODUCTION AND BACKGROUND

Passenger Rail Agency of South Africa (“PRASA”) has identified the need to appoint a service provider for the **APPOINTMENT OF A CONTRACTOR FOR THE SUPPLY, DELIVERY AND INSTALLATION OF A PRECAST CONCRETE BARRIER WALL AND HIGH SECURITY FENCE WITH GATES BETWEEN CAPE TOWN AND NYANGA VIA MUTUAL ALONG THE CENTRAL LINE, REFERRED TO AS WORK PACKAGE 2**

2 BACKGROUND AND OVERVIEW

Due to theft and vandalism the Central Line in Western Cape was closed from November 2019 from operation. The Central Line is classified as an “A” Corridor. It spans from Cape Town to Philippi with connecting lines from Philippi towards Kapteinsklip and Philippi towards Chris Hani. It also spans from Cape Town to Bellville via Sarepta. This corridor supports the services of Cape Town to Khayelitsha to Chris Hani, Cape Town to Mitchell’s Plain to Kapteinsklip and Cape Town to Bellville via Sarepta.

Figure 1: Overview of Western Cape Region services; Central corridor is highlighted in red and blue

A Professional Services Provider completed detailed designs for the construction of fencing to secure the Western Cape Central Line.

The solution proposed is aimed at addressing the urgent need for increased security in the Central Line corridor making the rail system operational and efficient. Over the years, train surfers, cable theft, arson and vandalism have had detrimental effects on the operational efficiency of the PRASA rail network.

The agency has lost a tremendous amount of revenue due to the consistent sabotage to its infrastructure. PRASA has also had a major challenge with issues pertaining the encroachment of illegal settlements along railway tracks. This has led to several accidents and casualties due to people crossing active rail tracks to get to their illegal settlements within the rail corridor. Currently, in South Africa, the need for public transport is rapidly increasing with population growth, and any operational disruptions preclude the rail network from meeting the growing demand in transportation.

As a mitigation strategy to this matter, PRASA has decided to construct a high perimeter fence, integrated with sophisticated telecoms security systems to protect the rail corridor from train surfers, cable theft, arson, and vandalism, thus nullifying the current operational inefficiencies.

a. STATUS QUO

The existing fencing in the sections and stations forming the Central Line is inadequate, damaged, and non-existent, due to theft and vandalism. Consequently, this allows easy access to the platforms without having ticket verification, impacting on the business's revenue. Furthermore, PRASA equipment gets stolen and vandalised causing major delays to the train service. Apart from the loss of revenue and the attraction of criminal elements, the risk of persons being run over by trains is quite significant, especially at areas where commuters/persons regularly cross the railway lines illegally. Other risks include encroachment on PRASA property and illegal dumping.

b. PROBLEM STATEMENT

The Western Cape Central Line is a critical component of the Province's rail network. It services primarily low-income commuters who are reliant on trains for their daily work commute. In its current condition, the Central Line is exposed to a number of risks mainly due to the fact that it is not secured.

c. PICTORIALS

- Job creation
- Development of emerging construction firms through subcontracting

2.1.3. CURRENT MECHANISMS IN PLACE TO ADDRESS THE PROBLEM

A special security intervention unit has been contracted and deployed along the Central line corridor. However, this was meant as a short-term solution to assist in the recovery programme.

Pt = Price of tender under consideration

Pmin = Price of lowest acceptable tender

POINTS AWARDED FOR SPECIFIC GOALS
