3.1.INTRODUCTION

The Social Housing Regulatory Authority (“SHRA”) was established in terms of section 7 as prescribed by the Social Housing Act (Act 16 of 2008). The SHRA is classified as a national public entity listed under Schedule 3A of the Public Finance Management Act (Act 1 of 1999) (“PFMA”).

The SHRA has been operational since January 2011, with a mandate to regulate, invest in and capacitate the social housing sector. The social housing programme aims to deliver affordable rental housing for low to medium income groups, currently these are households whose income levels are between R1 850 and R22 000. There are social housing projects throughout all nine (9) provinces.

The delivery and management of social housing units and projects is done through accredited Social Housing Institutions (SHIs) and private sector companies known as other delivery agents (ODAs) collectively defined as social housing landlords (SHLs).

3.2.PURPOSE

The Social Housing Regulatory Authority (SHRA) is embarking on a transformation journey to realign its ICT Strategy with its overarching Business Strategy. To achieve this, the SHRA intends to adopt an Enterprise Architecture (EA) framework that will enable effective business and ICT portfolio planning, operational efficiency, and improved execution and governance. Enterprise Architecture (EA) provides a unified framework for defining, managing, and governing the relationships between business and ICT structures, ensuring consistency and coherence across the organization.

The Enterprise Architecture will serve as an integrated blueprint that will translate business strategy into actionable ICT initiatives across strategic, tactical, and operational levels. By adopting an EA framework, the SHRA aims to ensure that all strategic projects are optimally positioned to leverage the benefits of structured architecture practices, enhancing business agility, optimizing investment decisions, and enabling the successful implementation of organizational strategies.

Functionality Evaluation

All proposals will be evaluated on the criteria provided in the table below. The proposals of all service providers will be rated on a scale of 1 to 5.

The percentage allocated for functionality is 100%. Minimum acceptable score for functionality is 70%.

4. EVALUATION PROCESS

COMPLIANCE WITH MINIMUM REQUIREMENTS

All bids duly lodged will be examined to determine compliance with bidding requirements and conditions. Bids with obvious deviations from the requirements/conditions, will be eliminated from further adjudication.

FUNCTIONALITY EVALUATION

All remaining bids will be evaluated as follows:

The functionality calculation will be done based on the defined criteria and weighting thereof. Functionality will be scored out of a 100. If it is deemed necessary, presentations may be held with Bidders who have met the minimum functionality criteria. If presentations are held, the functionality score will be adjusted whereby 80 percent will be awarded to during the bid evaluation and 20 percent will be for presentation score. **If a bidder fails to score a minimum of 70% out of 100% for functionality, the bid will be disregarded from further consideration.**

ELIMINATION OF BIDS ON GROUNDS OF FUNCTIONALITY

Bids that score less than 70% of the 100% available for functionality will be eliminated from further consideration. Points will therefore not be awarded for their cost bids or for specific goals.

The percentage scored for functionality should be calculated as follows:

Each bidder shall award values for each individual criterion on a score sheet. The value scored for each criterion shall be multiplied with the specified weighting for the relevant criterion to obtain the marks scored for the various criteria. These marks should be added to obtain the total score. The following formula should then be used to convert the total score to a percentage for functionality:

$$Ps = \frac{So}{Ms} \times Ap$$

where

Ps = percentage scored for functionality by bid/bid under consideration

So = total score of bid/bid under consideration

Ms = maximum possible score

Ap = percentage allocated for functionality

The percentages of each panel member shall be added together and divided by the number of panel members to establish the average percentage obtained by each individual bidder for functionality.

After calculation of the percentage for functionality, the prices of all bids that obtained the minimum score for functionality should be taken into consideration.

5. PRESENTATIONS

- a) SHRA may decide to have compulsory presentations made by Bidders who met the minimum functionality criteria once the functionality score has been calculated.
- b) Presentations shall only affect the marks awarded for functionality.
- c) If the date of the presentation meeting is not indicated in the bid document, at least three days' notice will be given to bidders required to attend a presentation.
- d) Presentations will be made to the full Evaluation Committee.
- e) Points determined by the presentation will be awarded to each bidder by each member of the Evaluation Committee and then an average calculated.

6. AWARDING OF PREFERENCES POINTS

- a) Points for specific goals will be awarded according to the table indicated in the preference points claim form(s).

7. COMBINING PRICE AND PREFERENCE POINTS

- a) In accordance with PPPFA Act No. 5, 2000 (f), the contract must be awarded to the tenderer who scores the highest points unless objective criteria justify the award to another tenderer.
- b) SHRA intends to use objective criteria, where the points difference between the bidder that scored the highest points and the second-ranked bidder is within 15%, the right is reserved to award to the bidder that scored highest on specific goals (80/20 principle). In the event of a tie, a proportionate follow through will be applied.

8. ADJUDICATION OF BID

- a) The Adjudication Committee will consider the recommendations and make the final award. The successful bidder that will be appointed is the bidder that will meet the minimum threshold of 70% for functionality and are tax compliant as per their CSD certificates
