1. PURPOSE

- 1.1 To appoint a service provider to compile the 2nd South Africa State of Waste Report for fourteen (14) months on behalf of the Department of Forestry, Fisheries and the Environment (DFFE).

2. INTRODUCTION AND BACKGROUND

- 2.1 In 2018, the Department developed the first State of Waste Report (SoWR) for South Africa, following the 2011 National Waste Information Baseline Report (NWIBR) compiled under the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) ("NEMWA). The NEMWA is based on the waste management hierarchy, which is an internationally accepted model for waste management and guided the SoWR in reporting on quantities of waste generated, recycled, treated, disposed of and waste categories provided in Annexures 3 and 4 of the National Waste Information Regulations, 2012 in presenting quantities for the different waste streams. The first State of Waste Report gave the state of waste management in South Africa and assisted the government and the public in setting realistic and scientific-oriented estimates in the planning and decision-making processes.
- 2.2 Waste management is a complex and interrelated system that is neither easy to measure nor model, partly due to waste being a process output in some situations and a process input in others. Therefore, proper waste management requires a good understanding of the types and quantities of waste generated and how this waste is managed now and in the immediate future. To meaningfully assess the effectiveness of responses to the waste-related challenges that South Africa faces, monitoring the state of waste should take place at regular intervals, ideally every five years, to allow not only for the comparison of the state of waste between two discrete periods but also the identification of trends and reflection on the overall progress of responses.
- 2.3 Accurate information on waste generation, storage, treatments, reduction, recycling, recovery, and disposal is complex to source due to limited use of the South African Waste Information System (SAWIS) and lack of compliance with the National Waste Information Regulations, 2012. The first SoWR reported a general lack of data on waste generation and management in South Africa reported in municipal Integrated Waste Management Plans (IWMPs), and the SAWIS under-reporting for several general waste streams (e.g., commercial and industrial waste, organic waste, glass, and plastic). The challenges were attributed to a lack of weighbridges and capacity at several of the facilities, primarily municipal landfill sites. Furthermore, the data reported for municipal waste disposal could not differentiate plastic, organic waste, paper, and glass from the municipal waste stream.
- 2.4 While it is acknowledged that the DFFE has established a SAWIS under Section 60 of the Waste Act for the collection, recording, management, and analysis of waste, the existing information contained in the

system is limited due to poor waste data reporting. Moreover, the SoWR is essential in refining the information and knowledge base on which the policy agenda and decisions about waste are made to stimulate debate and raise awareness on the key issues and challenges related to waste generation and management in South Africa.

3. OBJECTIVES

3.1 The objective of this request for a proposal is:

3.1.1 To appoint a service provider to review the first SoWR, gather the relevant waste data from various sources, and compile South Africa's 2nd State of Waste Report (SoWR) that must provide reliable and scientifically credible information about the condition and prospects of the environment that is impacted or affected by various waste management practices.

3.1.2 Provide objective and accurate information about the historical trend and state of waste management in South Africa.

3.1.3 Assess the relationship between human activities, responsibilities, and the effects of pollution on the environment.

3.1.4 Acquire, accumulate, and analyse accurate periodic data of the waste management sector and present it in a synthesised manner.

3.1.5 Assess progress toward implementing the waste policies and actions and responses by the government and the private sector to mitigate adverse environmental pollution effects.

3.1.6 Provide generation and management trends to monitor the effectiveness of existing policies and waste management programmes.

4 SCOPE AND EXTENT OF WORK

4.1 Inception Phase

4.1.1 The Service Provider must attend an inception meeting and present the draft inception report that must be sent to DFFE at least three (03) working days before the meeting date.

4.2 Implementation Phase

The role of the Service Provider is to carry out the following tasks on behalf of the DFFE:

4.2.1 Review and update the 2018 State of Waste Report (SoWR)

4.2.2 Identify and update indicators that will be used in the 2nd SoWR.

4.2.3 Identify emerging issues on various waste streams to inform future research or study.

4.2.4 Determine the Municipal waste composition and volumes by waste streams disposed of (refer to Annexure 3 of the National Waste Information Regulations,2012).

- 4.2.5 Conduct secondary research, including a literature review, and collect source material to enhance the report's global, regional, national, provincial, and local trends and discussion. This will include reviewing relevant global, regional, national, provincial, and metropolitan environmental and waste management reports. The process must also take cognisance of other planning documents such as National Development Plan, National Waste Management Strategy, Delivery Agreement on Government Outcomes, Sustainable Development Goals (including associated targets and indicators), STATSSA General Household Surveys and Census reports, Integrated Waste Management Plans (IWMP), Extended Producer Responsibility Regulations and the associated schemes, Industry Waste Management Plans (IndWMP), including the implementation of the Waste Research, Development and Innovation (RDI) Roadmap and all other related plans and strategies.
- 4.2.6 Report on the Waste Act implementation successes and challenges.
- 4.2.7 Compile the 2nd SoWR using the relevant and credible data and information gathered during the research and literature review. The report must include high-quality (300 dpi or more) diagrams, maps, graphs, Tables, Figures, and a proper references list. The Driver, Pressure, State, Impact, and Response (DPSIR) reporting framework or a hybrid must be applied during the writing process to ensure harmony and linkages in different sections of the report.
- 4.2.8 The SoWR must provide objective and accurate information on the generation, handling, storage, transportation, reuse, recycling, recovery, treatment, import, export, and the final disposal of waste and the impact of the various waste management options (Annexure 3 - 5 of the National Waste Information Regulations, 2012) on land, air, water, and human lives;
- 4.2.9 Identify problematic waste streams, and analyse appropriate management strategies to deal with such waste streams in consideration of the local context; consider and analyse progress with implementing Operation Phakisa delivery initiatives on waste management;
- 4.2.10 Report on the Waste Exclusion Regulations and the impact on the waste sector;
- 4.2.11 Consider and analyse the waste-related issues in the Sustainable Development Goals (SDGs) related to waste management.
- 4.2.12 The report must include the state of waste service provision and waste infrastructure (e.g., landfills, treatment facilities, Material Recovery Facilities (MRFs, Buy-Back Centre, storage facilities, etc.), and an indication of waste facilities' legal compliance.
- 4.2.13 Organise and present the draft reports to stakeholder engagement workshops, the Project Steering Committee (PSC), and key stakeholders. It is envisaged that, as a minimum, the following stakeholder engagement workshops will be conducted either physical, online, or hybrid:
- a) One (01) online national SoWR Framework discussion workshop.

- b) One hybrid workshop presenting the 1st draft SoWR (the DFFE will provide the venue);
- c) Two (02) virtual national consultation workshops presenting the 2nd draft and final SoWR.
- d) Ad-hoc meetings with the key stakeholders and the Department for data sourcing and discussions or analysis; and
- e) One (01) final online refinement workshop.

4.2.14 Identify peer reviews (outside the bidding organisation) and facilitate the process of peer-reviewing the contents of the report. The project steering committee must consent to the identified peer reviewer.

4.2.15 Incorporate comments/ inputs received from the stakeholder consultation process, including from the peer-reviewing process.

4.2.16 Provide the copy-editing service mainly focusing on the report’s readability, grammar, tone, layout, and pitch. The outcome must be an easy-to-read report comprehensible to a broad spectrum of potential readers interested in discovering more about the State of Waste in South Africa.

4.2.17 Source all necessary photographs, images, and artworks to enhance the design of the report.

4.3 Close-Out Phase

- 4.3.1 The Service Provider is expected to submit to the DFFE two (02) hard copies, a soft copy (Universal Serial Bus) of a Word version, and a print-ready PDF version of the report for sign-off. Upon sign-off of the report, all the data collected for the study (drawn graphs, high-resolution images, and maps (300 dpi or higher) used in the report must be submitted to the DFFE.
- 4.3.2 The service provider must submit a PowerPoint presentation summarising the project, deliverables, and report.
- 4.3.3 The service provider must provide a spreadsheet containing a list of Figures, Tables, and models, used in the report as well as source materials.
