1. PURPOSE

- 1.1. To appoint authorised service providers to supply and deliver any of the required Occupational Hygiene Instruments.

2. INTRODUCTION AND BACKGROUND

- 2.1 The Occupational Health and Safety Act (85 of 1993) places the onus on employers to ensure that the working environment is safe and without risks to the health of their employees. To accomplish this, the employer must, through the services of a competent person, assess the exposure of their employees to environmental conditions in the workplace. Where this assessment indicates an ongoing risk from exposure, the employer must measure or quantify those exposures, compare the results with prescribed standards through the services of an Approved Inspection Authority (AIA) and implement the steps that are needed to control those exposures, to comply with the provisions of the Act.
- 2.2 The Department: Forestry, Fisheries, and the Environments' (DFFE), Occupational Health and Safety (OHS) structured approach is based on the Employee Health and Wellness Strategic Framework for the Public Service, which has four functional pillars, which are primary arenas of action in the implementation for creating a healthy and safe working environment in the public service.
- 2.3 Pillar 3: Safety, Health, Environment, Risk and Quality Management (SHERQ), provides for increased responsibility of executive leadership to ensure that departments conduct their affairs in an accountable, responsible, transparent, and sustainable manner as decent citizens to promote the health and wellness of their employees and the quality of services delivered to the public, the sustainability of the environment for the long-term effects of adding value to economic growth.
- 2.4 To give effect to the Occupational Health and Safety Management System, Occupational Health Programmes need to be implemented, which include occupational hygiene, occupational medicine, and biological monitoring (medical surveillance) initiatives.
- 2.5 As per the requirements of the Occupational Health and Safety Strategy (2023-2028), the Annual Occupational Health and Safety Operational and the Occupational Health and Safety Operational Risk Register, Occupational Hygiene surveys (indoor air quality, noise, thermal stress, chemical exposure, illumination, etc) have to be conducted to produce occupational hygiene reports with relevant remedial actions.
- 2.6 Various instruments (tools of trade) must be procured in order to ensure that the Occupational Hygiene Sub-Directorate is in a position to carry out its functions.

3. OBJECTIVES

- 3.1. The objective is to appoint authorised suitable service providers to supply and deliver calibrated occupational hygiene instruments in order to comply with the relevant act, regulations and standards, thus ensuring accurate measurement and monitoring for occupational health and safety purposes.
