The Human Sciences Research Council (HSRC) is a research organisation that advances social sciences and humanities research for public use. The HSRC subscribes to the values of good governance, accountable public administration and sound management of the resources as reflected in the Public Financial Management Act 1 of 1999 (PFMA), as amended.

Established in 1968 as South Africa's statutory research agency, the HSRC has grown to become the largest dedicated research institute in the social sciences and humanities on the African continent, conducting cutting-edge public research in areas that are crucial to development.

Our mandate is to inform the effective formulation and monitoring of government policy; to evaluate policy implementation; to stimulate public debate through the effective dissemination of researchbased data and fact-based research results; to foster research collaboration; and to help build research capacity and infrastructure for the human sciences.

2. THE ROLE OF THE PROPERTY WITHIN THE NATURE OF ITS LOCALITY

The subject property is situated at 134 Pretorius Street, Pretoria CBD, Gauteng. The legal description is Erf 3242 Pretoria CBD. The most salient title-deed details of the property are summarised below.

The property has easy access to Francis Baard and Pretorius Streets, which, in turn, provide access to the Pretoria CBD and the N1 freeway. The immediate surrounding properties comprise a mix of commercial and business sites. The property is located close to various government departments, Pretoria High Court, Pretoria Central Police Station, as well as the Pretoria Magistrates Court. The highest and best use of the property is its current use. The

subject property still lies in a predominantly office node and offers good quality accommodation.

3. PROPERTY DESCRIPTION AND ZONING RIGHTS

The property is situated in Erf 3242, Pretoria CBD, 0002.

The property is situated next to the following professional transport facilities:

- a) Areyeng Bus Station
- b) City of Tshwane Metrobus

- d) Gautrain bus station

The property has the potential for development into:

- a) Corporate Offices
- b) Student Accommodation

4. PROPERTY DESCRIPTION AND SPECIFICATION

The property comprises a multi-storey office building measuring 36 894 m² offices, 619 m² storage and 491 basement parking bays. The property is currently occupied by the Human Sciences Research Council and the Department of Social Development.

Building and Space Details

Construction of the main building is by way of concrete supports and aluminium-framed windows. The roof is a flat concrete slab structure, and the floor is a concrete base. Internally, the interior walls are a combination of drywall, plastered and painted and have wall-mounted air conditioning units in some areas. The ceilings are lined with suspended ceiling panels, having recessed spotlights, LED tubes and central air conditioning vents in places. The floors are concrete and covered with carpet tiles and ceramic floor tiles.

Internal accommodation comprises basement parking, ground floor reception, visitors' centre and general offices, the first floor to the fourteen floor offices including general and individual offices, ablutions, and kitchen areas.

The HSRC Building Complex comprises several diverse areas, summarised as follows:

(a) Four-Level Basement Area - referenced as Basements A to D.

Basement Access is controlled by access cards, which activate booms and roller garage doors to the parking. Levels A to C have been constructed to the floor area capacity and are predominantly used for parking bays. Level D accommodates only the South Tower lift motor room and the building's stormwater and sewerage sump pits.

Located on all three parking levels are toilets and generous storage facilities, plant rooms and service ducts. All levels are adequately serviced by lifts and staircases.

Due to the curved design configuration of the two office block towers sited above the basements, the structural support columns are clearly visible. Ramp access serves all basement levels.

All levels have lighting, fire sprinklers, ventilation, demarcation and signage. A boom-controlled security facility is in operation and is manned 24 hours a day.

On average, calculations show that there are 20 parking bays per operational floor in this building.

(b) Ground Floor – this is situated at the municipal street level.

This level boasts good access, circulation and security, as too, facilities. To elaborate – two Foyer Reception Centres (which are use specific, in that these are operated by the HSRC and the Department of Social Development [DOSD]), a voluminous Library facility, Cafeteria with enclosed outdoor Courtyard, Catering Kitchens, Conference Centre (with fully equipped Auditoriums, Halls and Venues), Exhibition Spaces, plus adequate Toilet facilities.

The Ground Floor has access control in the form of turnstiles activated by employee access cards.

The lift lobby area includes the 6 Mitsubishi Lifts and a single emergency fireman's lift servicing the ground floor to the fourteenth floor. There are also 2 parking lifts which service Basement A-C parking areas to the First Floor. The parking lifts are currently restricted to the Ground Floor for security reasons.

The sale of the building excludes all Information Technology equipment and the like.

(c) First Floor – a fair proportion of this level is double volume space, which caters for the Library and Conference Centre Auditoria situated on the ground floor.

It consists of a former Children's Crèche with an external Roof Garden facility, former Library Mezzanine Floors, Break-away Conference Venues and six compact self-catering Accommodation Units, of which two have been converted to a gym and a nurses' station.

The former Library Mezzanine area is now used by the DOSD as an archive for their adoption records. The break-away Conference Venues located above the other mezzanine level have mostly been upgraded and converted into Video Conferencing facilities.

(d) Office Complex – consists of two independent tower blocks, which are referred to as the North and South Towers. The south tower comprises floor levels 2 to 9, and

the north tower, floor levels 2 to 14. The footprints of these tower blocks curve through their longitudinal plain and are similar in layout.

The internal office configurations for each tower are similar for floor levels 2 to 9, and are made up of cellular offices. Office construction consists of brickwork walls to the passageways and dry-wall partitioning to the dividing party walls. These floor levels are occupied by the DOSD in both towers.

This photograph generally indicates the existing comparative state of floor Levels 2 to 9 in both Tower Blocks

Variations in office floor areas do occur, particularly in the sections which transition through the building curves. However, on average, the floor areas for each cellular office work out at around fifteen square metres, which finding is in keeping with national and international benchmarks for office space of similar use.

The office complex is well catered for in terms of general services, accessibility, circulation, security, lifts/elevators, staircases, fire-escapes, space and general amenities (eg – Toilets, Kitchens, etc). a. Parking Bays are as follows:

- I. Basement Level A concrete slab covered parking = 154 bays
- II. Basement Level B concrete slab covered parking = 211 bays

III. Basement Level C concrete slab covered parking = 136 bays

b. An 800 Kva Perkins diesel generator that powers the entire building, located on Basement A.
