	Prepared by Mgiba Consulting			

	employer against any such damage. The contractor shall take such precautions and security measures and other steps for the protection and security of the works as the contractor may deem necessary		
b)	The contractor shall at all times proceed immediately to remove or dispose of any debris arising from damage to or destruction of the works and to rebuild, restore, replace and/or repair the works		
(c)	The employer shall carry the risk of damage to or destruction of the works and material paid for by the employer that is the result of the excepted risks as set out in 10.6		
(d)	Where the employer bears the risk in terms of this contract, the contractor shall, if requested to do so, reinstate any damage or destroyed portions of the works and the costs of such reinstatement shall be measured and valued in terms of 32.0 hereof		
10.6 le Prope	njury to Persons or loss of or damage to erties		
(a)	The contractor shall be liable for and hereby indemnifies the employer against any liability, loss, claim or proceeding whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever arising out of or in the course of or caused by the execution of the works unless due to any act or neglect of any person for whose actions the employer is legally liable		
(b)	The contractor shall be liable for and hereby indemnifies the employer against any liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the site , whether belonging to or under the control of the employer or any other body or person, arising out of or in the course of or by reason of the execution of the works unless due to any act or neglect of any person for whose actions		
	Carried to Collection	R	
Prepa	red by Mgiba Consulting		

	the employer is legally liable			
c)	The contractor shall, upon receiving a contract instruction from the principal agent , cause the same to be made good in a perfect and workmanlike manner at his own cost and in default thereof the employer shall be entitled to cause it to be made good and to recover the cost thereof from the contractor or to deduct the same from amounts due to the contractor			
(d)	The contractor shall be responsible for the protection and safety of such portions of the premises placed under his control by the employer for the purpose of executing the works until the issue of the certificate of practical completion			
(e)	Where the execution of the works involves the risk of removal of or interference with support to adjoining properties including land or structures or any structures to be altered or added to, the contractor shall ogtain adequate insurance and will remain adequately insured or insured to the specific limit stated in the contract against the death of or injury to persons or damage to such property consequent on such removal or interference with the support until such portion of the works has been completed			
(f)	The contractor shall at all times proceed immediately at his own cost to remove or dispose of any debris and to rebuild, restore, replace and/or repair such property and to execute the works			
10.7 Hi	gh risk insurance			
In the event of the project being executed in a geological area classified as a "High Risk Area", that is an area which is subject to highly unstable subsurface conditions that might result in catastrophic ground movement evident by sinkhole or doline formation the following will apply:				
10.7.1	Damage to the works			
	Carried to Collection	R		
Prepare	ed by Mgiba Consulting			
			1	

The contractor shall, from the commencement date of the works until the date of the certificate of practical completion bear the full risk of and hereby indemnifies and holds harmless the employer against any damage to and/or destruction of the works consequent upon a catastrophic ground movement as mentioned above. The contractor shall take such precautions and security measures and other steps for the protection of the works as he may deem necessary When so instructed to do so by the principal agent, the contractor shall proceed immediately to remove and/or dispose of any debris arising from damage to or destruction of the works and to rebuild, restore, replace and/or repair the works, at the contractor		
10.7.2 Injury to persons or loss of or damage to property		
The contractor shall be liable for and hereby indemnifies and holds harmless the employer against any liability, loss, claim or proceeding arising at any time during the period of the contract whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever resulting from, arising out of or caused by a catastrophic ground movement as mentioned above		
The contractor shall be liable for and hereby indemnifies the employer against any and all liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the site , whether belonging to or under the control of the employer or any other body or person whomsoever arising out of or caused by a catastrophic ground movement, as mentioned above, which occurred during the period of the contract		
10.7.3 It is the responsibility of the contractor to ensure that he has adequate insurance to cover his risk and liability as mentioned in 10.7.1 and 10.7.2. Without limiting the contractor's obligations in terms of the contract, the contractor shall, within twenty-one (21) calendar days of the commencement date but before commencement of the works , submit to the employer

62	Programming for the works (B4.2)				
	Clause B4.2 is hereby amended by the addition of the following:				
	Programme:				
	The contractor and the principal agent shall agree to a Contract Programme for the control of the Works.				
	The contractor shall submit a draft of the Contract Programme and method statement to the principal agent for approval together with the tender.				
	The contractor shall ensure that the contract programme:				
	1. Shall be prepared and drawn up to comply in all				
	Carried to Collection		R		
	Prepared by Mgiba Consulting				
- 1		l l	I	II .	1

respects with the requirements of this Agreement.				
2. shall be drawn up using logic developed during the tender period and complies with the				
planning requirements of the Client. 3. shall be in accordance with the dates given				
herein for possession and practical completion; and				
4. shall be in sufficient and approved detail to				
ensure effective control of the work, including all items necessary to enable calculations to be				
made for the distribution of finance during the cashflow analysis.				
 shall be accompanied by a full written method statement 				
The principal agent shall examine and comment on the				
contract programme and method statement within two weeks of its submission.				
Following on these comments the contractor shall amend the contract programme and method statement				
as may be necessary and submit the final contract				
programme and method statement to the principal agent for approval within a further two weeks thereafter.				
The contract programme shall be processed by computer and be presented to the principal agent in the				
form of logic charts and bar charts in such a way as to				
determine the critical path and the float on non-critical activities. All supporting printouts must be available to				
the principal agent on demand.				
The acceptance by the principal agent of the contract programme, or any revision thereof, does not				
necessarily sanction the accuracy of validity of the network logic, the correctness of individual activities in				
terms of description or duration, the comprehensiveness of networks or the discrepancies between drawings and				
any other documents presented by the contractor, and in no way relieves the responsibility of the contractor to				
comply with the requirements of the Agreement.				
No policy decisions other than the planning requirements, procedures and policies provided, will be				
enforced on the contractor regarding construction of the				
project and the contractor shall be responsible at all

times for ensuring the accuracy, validity and reasonableness of programming information.		
Documentation will not be available in complete detail at the date of award of the contract. Non-availability of information will not be deemed an excuse for non-presentation of programmes. In the event of inadequate information, the contractor shall estimate the predicted time applications on available information and quality the submission accordingly.		
Development of the contract programme and method statement		
Within two weeks of award of the contract, the contractor shall submit an updated contract programme and written method statement which shall include the latest information in sufficient detail to permit comprehensive monitoring.		
Progress of the works will be monitored by the principal agent. The contractor shall liaise with the principal agent in order to provide whatever information is required to facilitate such monitoring.		
Revisions to the contract programme		
Revisions to the contract programme may be introduced periodically by the contractor subject to compliance with the contract completion and handover dates.		
Providing the required consultation between the relevant parties has highlighted the implications of the required changes, the programming strategy on the project may be changed and the changes noted and specified on logic charts delivered to the principal agent. The changes to the programme will be recorded as firm and binding once the principal agent has sanctioned the said changes.		
A revision to the programme will not invalidate the contractual completion dates and applications for extensions of time will be processed by the principal agent in accordance with the conditions of contract.		
Should the contractor fail to submit a request for revision to the construction programme , progress		
Carried to Collection	R	
Prepared by Mgiba Consulting		

monitoring shall be based on the latest revised programme sanctioned by the principal agent.		
The contractor shall make all his necessary revisions on the approved network sheets clearly marking, inter-alia, the logic changes and duration changes. These will then be processed by the necessary parties and then approved in the normal manner.		
Progress Monitoring		
The contractor shall provide regular progress reports showing actual and expected progress against the latest contract programme. Progress reports shall be submitted at each site progress meeting and shall outline the progress against key target dates and deviation which has occurred against the most recently updated control programme due to the progress reflected in the as-built construction programme.		
The status of each activity must also be reported as follows:		
Target - If the activity is not complete, the latest predicted completion date shall be supplied.		
Start - If the activity has commenced, the actual date shall be supplied.		
Finish - If the activity is complete, the actual completion date shall be supplied.		
Problems which may occur during execution of the contract must be specifically identified in progress reports under a separate section of the contractor's report.		
Should problems occur during the execution of the contract or the scope of work be increased or decreased, the contractor may be requested to increase the extent or the detail of the programme.		
The principal agent may recommend action to be taken by the contractor, including the revision of resource levels, but this information will not be binding on the contractor unless the recommendations are enforced in

terms of the conditions of contract by the principal agent and will in no way relieve the contractor's responsibility to comply with the requirements of the Agreement.			
Extension of time			
Any extension of time which is granted by the principal agent will be annotated to affect selected activities in the programme and the associated activities will be incorporated by revisions to the programme by the contractor. Should the additional activities or the extension of time on existing activities fall on a non-critical area of the programme, extension will be limited to the activities affected by the said additional activities or extensions and the contract dates shall not be affected. If, however, the additional activities fall on the critical path, the principal agent shall take this into account when granting any extension of time in terms of the conditions of contract.			
The contractor agrees that the contract completion date (i.e. the date for practical completion) has been stipulated in the contract for the benefit of the employer, so that, without derogating from the generality of the aforegoing principle it is provide that:			
The contractor shall not be entitled to deliver the site and the works to the employer prior to the contract completion date and			
 Should there for any reason be any float period indicated in the contract programme prior to the contractual completion date then this float period shall be utilized to absorb any delays or extensions of time without affecting the contract completion date. 			
3. The contractor shall, at all times, ensure that, notwithstanding the approval or sanctioning, reviewing or inspection of a programme or any revision of a programme by the principal agent in the aforegoing terms, practical completion and completion of the works shall take place strictly in accordance with this Agreement.			
A defective or faulty programme, even if so sanctioned, approved, reviewed or inspected by the principal agent,

	shall therefore not constitute a cause for granting an extension of time for completion of the works or for entitling the contractor to the payment by the employer in terms of the contract of any loss, compensation or damage whatsoever.				
	The contractor acknowledges that the principal agent's aforegoing participation in the approval of development of, revisions to and updating of the Contract Programme shall take place in consultation with the principal agent. The contractor shall therefore provide the principal agent with such co-operation and/or information and/or access as they may reasonably require for such purposes.

113	Clause C8 - Occupational Health and Safety Act			
	The contractor shall comply with all the requirements set out in the Construction Regulations, 2003 issued under the Occupational Health and Safety Act, 1993 (Act No 85 of 1993).			
	It is required of the contractor to thoroughly study the latest Health and Safety Specification that must be read together with and is deemed to be incorporated under this Section of the bills of quantities / lump sum document.			
	The contractor must take note that compliance with the Occupational Health and Safety Act, Construction Regulations and Health and Safety Specification is compulsory. In the event of partial or total noncompliance, the principal agent , notwithstanding the provisions of clause A31.0 of Section A or any other clause to the contrary, reserves the right to delay issuing any progress payment certificate until the contractor provides satisfactory proof of compliance. The contractor shall not be entitled to any compensation of whatsoever nature, including interest, due to such delay of payment.			
	Provision for pricing of the Occupational Health and Safety Act, Construction Regulations and Health and Safety Specification is made under this clause and it is explicitly pointed out that all requirements(including notification to the Department of labour, medical examinations, PPE compliance, etc) of the aforementioned are deemed to be priced hereunder and no additional claims in this regard shall be entertained.

SUPPLEMENTARY PREAMBLES			
BRICKWORK			
Sizes in descriptions			
Where sizes in descriptions are given in brick units, "one brick" shall represent the length and "half brick" the width of a brick			
Hollow walls etc			
Descriptions of hollow walls shall be deemed to include leaving every fifth perpend of the bottom course of the external skin open as a weep hole.			
Walls in two skins described as "bagged and sealed" shall be deemed to include having the outer face of the inner skin bagged with 1:6 cement and sand mixture and sealed with two coats "Brixeal" bitumen emulsion waterproofing coating.			
<u>User note:</u>			
The above preamble generally applies for works in hot and humid coastal areas			
Face bricks			
Bricks shall be ordered timeously to obtain uniformity in size and colour			
Pointing			
Descriptions of recessed pointing to fair face brickwork and face brickwork shall be deemed to include square recessed, hollow recessed, weathered pointing, etc

	"Jojo" or equal approved fixed uPVC vertical tank				
94	Polyethylene tank (10kl) 1,82m diameter x 2,25m high on and including galvanised tank stand(stand measured elsewhere)	No	1		
	FENCING				
	Scope				
	This specification covers the erection of a security fence. The tenderers are not bound to specific trade names but materials offered are to meet relevant SABS Specifications and to be within CCS451 - 1976 specifications for anti-intruder fencing.				
	Interpretations				
	Fencing shall be deemed to include all items such as gates etc., and material and labour required to complete the work.				
	<u>Height</u>				
	The fence shall be 2,1 or 2,4 meters high measured from natural ground levels, from cleared strip of ground one metre wide on boundary.				
	Fence wire razor mesh				
	Razor mesh made up of 2,5mm diameter core wire with minimum 0,4mm thick galvanised blade strips with 8mm re-inforcing shoulder with standard 300 x 150mm aperture size 2,1m high to be fixed to the straining wires by 1,6mm binding at 700mm intervals.				
	Razor mesh to be placed on outside of all fencing poles.				
	The top end of mesh to be finished to form barbs after the loose ends have been wrapped twice around the top straining wire.				
	Carried to Collection			R	
	Prepared by Mgiba Consulting				

	<u>Gates</u>				
	Supply each gate with a suitable length of heavy duty chain and a 50mm heavy duty brass padlock with two keys				
	Gates shall have all joints and accessories securely welded on with all welds neatly trimmed and waterproofed, with either square and mitred corners or accurately jig-formed rounded corners with a radius not exceeding 100mm				
	Gates shall be hot dipped galvanised after fabrication, to conform with the requirements of SABS specification 763 - Class A				
	Fencing				
	Galvanised diamond mesh security fencing				
95	1800mm High fencing, set up complete as described including site clearance, eyebolts and posts with footings	m	68		
96	Strainer post with two stays embedded into and including concrete blocks	No	27

	BILL NO. 1				
	PROVISIONAL SUMS				
	CASH DISCOUNT				
	No cash discount. All provisional sums are "NET".				
	ATTENDANCE				
	Without in any way limiting the meaning and interpretation, "general attendance" on sub-contractors shall include free of charge to the sub-contractor the following services for the purpose of the relative sub-contract works:				
	access to the site and to the places where the work is to be carried out,including the use of any temporary personnel hoists erected by the Contractor for his own use;				
	2) the provision of water and lighting and of single and/or three phase electric power to a position within 50 metres of the place where work is to be carried out, but excluding water, fuel and power for commissioning of the installation for whichthe Contractor shall be responsible;				
	the provision of an area for office accommodation, temporary workshops and for the storage of plant and materials;				
	4) the use of erected scaffolding belonging to the Contractor, in common with others having the like right whilst it so remains erected upon the site;				
	5) the use of messrooms, latrine, health and welfare facilities, and the like, where provided;				
	Carried to Collection		R		_
	Prepared by Mgiba Consulting				

6) the use of the site telephone (if provided) subject to the payment by the sub-contractor for all his outgoing calls;				
7) temporary casing and/or other protection of the work;				
8) site security measures;				
9) hoisting of the sub-contractor's material in loads not exceeding 500 kg;				
10) making good in all trades and final cleaning down on completion.				
FUEL, POWER AND WATER FOR COMMISSIONING PLANT				
The cost of fuel, power and water for the commissioning of plant shall be borne by the sub-contractor appointed for the relevant sub-contract works in terms of the conditions under which they have/are contract for the specialist work involved. The contractor shall allow opposite this item or under the relevant attendance items for the recovery of such costs via the installation of the necessary metres, etc.				
REFURBISHMENT OF EXISTING BOREHOLE				
Provide an allowance for refurbishment of existing borehole including yield and water quality testing, and reticulation, to be expended as the Agent/Representative may direct or deduct in whole or in part, if not required.	ltem		250 000.	00
Allow for profit on last if required.	Item			
Allow for giving every facility to, attending upon and making good after the Specialists installing the service complete and for providing the use of all ordinary plant	Item
