DETAILED TECHNICAL SPECIFICATION

1. Motivation

The purpose of this request is to purchase 10 x 2km drums (20km) of CST optical fibre cable to conduct emergency permanent repairs on Route 7 to stabilise these critical optical fibre route sections and to prevent further impact to the network caused by acts of vandalism, etc.

The Polokwane regional O&M team has identified problematic areas on some route sections which requires urgent permanent repairs to stabilise the network and the improve network performance which is greatly compromised by the temporary cable on the ground.

BBI has received numerous customer complaints from key international customers about the poor SLA performance of their service, as well as a very unreliable network on the Northern Ring. Some customer services were cancelled, and other customers are threatening to cancel should their service performance and that of BBI Northern Ring not improve soon.

2. Benefits

The network route availability and reliability will be improved which will greatly improve the resilience of Route 7 because of strengthening the problematic sections. This will provide more flexibility to reroute customer services via the alternative path, Polokwane to Nzasm.

These permanent repairs will result in a great improvement on the link span loss, network reliability and customer SLAs, especially all cross-border customer services i.e., to Zimbabwe and Mozambique.

International gateway routes offer lucrative business opportunities and when they are stable, BBI stands to gain more customers and to expand revenue growth.
