### **3. Background**

Moses Kotane Institute (MKI) is an entity of the KZN Department of Economic Development, Tourism & Environmental Affairs (EDTEA). Its mandate is to provide internationally recognised quality research driving economic development and innovation in the province. It does this by providing timely and accurate research to support the attainment of radically transformed inclusive and sustainable economic growth for the province in partnerships with the public and private sectors. It is also funded mainly by EDTEA and other stakeholders.

### **4. Purpose**

The purpose of this Request for Quotation (RFQ) is to appoint a suitably qualified service provider with a proven track record to lease laptop and desktop computers as well as supply and deliver software solutions for VoIP (Telecommunications) and email protection services for 36 months (3 years).

### **5. Scope of Work**

#### **5.1 Laptop and Desktop Procurement (leasing):**

Laptop and desktop leasing is a service that will allow MKI to rent computer hardware for a specific period of 36 months (3 years), typically monthly. This solution aims to ensure the organisation benefits from a cost-effective alternative to purchasing these devices outright.

#### **5.2 VoIP Services (Telecommunications):**

Voice over Internet Protocol (VoIP) services will enable MKI to leverage voice and multimedia communication over the Internet, allowing the organisation's internal stakeholders to make voice and video calls, as well as send messages, using IP networks rather than traditional telephone lines.

MKI requires a cost-effective VoIP solution, and flexibility for internal configuration requirements, this includes but is not limited to creating DID's for remote sites as well as offering a feature-rich user-friendly interface.

### 5.3 E-Mail Protection:

MKI also seeks a solution to protect organisational emails following a set of measures and practices designed to safeguard email communications from various threats and vulnerabilities. Email is a widely used communication tool within Moses Kotane Institute, and it is also a common vector for cyberattacks and data breaches. Therefore, protecting email systems and the information they contain is crucial for efficient internal stakeholder service delivery at MKI.
