TERMS OF REFERENCE

1. INTRODUCTION

The NHFC is a public entity listed as a Schedule 3A of the Public Finance Management Act (PFMA) of 1999 (as amended). The entity was established by the National Department of Human Settlements (NDOHS) as a development finance institution (DFI) in 1996, with the mandate of broadening access to affordable housing for the low- and middle-income households. NHFC, as a national public entity, adheres to the regulatory framework of the Public Finance Management Act (PFMA) of 1999.

The NHFC operates largely as a wholesale funder providing funding in the affordable housing market through a network of non-banking intermediaries such as: social housing institutions /other delivery agents (ODAs); residential property developers and investors, contractors who develop government subsidised houses; as well as non-banking financial retail intermediaries who on lend to customers for the purpose of improving their homes incrementally. In addition to providing loans to its intermediary partners, the company also provides other funding instruments in the form of strategic investments, such as equity and quasi-equity, to certain niche businesses in the affordable housing value chain. It also provides programme management services to augment the capacity of provincial and local government in the implementation of various housing programmes

As part of its retail funding model, the NHFC facilitates the national implementation of a housing subsidy programme on behalf of the Department of Human Settlements, which is focused on providing a subsidy for aspiring first-time homeowners, known as the First Home Finance Programme.

2. OBJECTIVE OF THE PROJECT

The NHFC wishes to appoint a qualified service provider to carry out structural and condition assessments of a building in Germiston, Johannesburg. The assessment will focus on the structural integrity, electrical and plumbing systems, roofing, internal and external finishes, with technical recommendations to inform remedial and refurbishment planning, along with detailed cost estimates for the proposed remedial works.

3.1 PROPERTY DESCRIPTION

The property description can be summarized as follows:

The site is a mixed-use development with 8 floors, including a basement, ground floor, parking level, and 5 additional floors. The building is accessible through a biometric system and a roller door at the main entrance. The parking level has 44 parking spaces and 25 residential units. The

ground floor includes retail spaces, management offices, a reception area, a security control office, a laundry area, a study room, and a learning centre.

The 1st Floor to 4th Floor consists of only residential units. The floors have a similar floor plan design, with a combination of 1 Bedroom units, 2 Bedroom units, and 3 Bedroom units. The units come with Kitchen cupboards, wardrobes, a stove, a kitchen basin, a full bathroom, and a geyser. Most rooms have a bathtub, and some have showers (10 units). All the units use prepaid electricity and water paid by the landlord.

The residential tenants consist of students, families, and working individuals. The retail tenants are also a mixture of different businesses, such as a convenience store, butchery, internet café, hair salon, and tailor shop. Due to the different tenant groups, the residential tenants have a different lease structure compared to the retail tenants. The building has bare brick finishes on the exterior, with small portions plastered and painted, which are currently in a bad state. The interior walls have been plastered and painted, each residential floor has a different colour scheme, and the general condition of the painting in the building is not good. The floor finishes for the building are tiled, except for the corridors on the residential floors. The overall condition of the flooring is not good, as in most common area spaces, there are missing floor tiles.

The building has two functioning elevators. The building has two sets of stairs, one for daily use and another one to be used for emergencies. Although the other stairs are meant to be used for emergencies, they do not have a locking mechanism to prevent daily usage, and are meant to be used only for emergencies. The main steps pose a safety hazard as most of them do not have slip strips, and some have loose slip strips. The building has a sprinkler system, fire extinguishers, hose reels, and fire hydrants. The fire extinguishers, hose reels, and fire hydrants are compliant with fire regulations; with the sprinkler system, the building manager noted that it was tested to assess whether it is still operational. The tests revealed that the ground floor system requires repairs. Furthermore, the tests indicated that the entire building requires the installation of smoke detectors and fire alarms to comply with fire safety regulations. There is a lack of safety signage for guiding residents in case of an emergency.

3. SCOPE OF WORK

The appointed service provider will be required to conduct a comprehensive condition assessment of the property:

- Identify and document all deficiencies and potential hazards.
- Conduct technical analyses to determine the causes of any observed failures.

- Prepare a detailed structural report with findings, engineering recommendations, and remedial actions.
- Prepare a detailed cost estimate for completing the recommended remedial actions.

The service provider will also be expected to develop a scope of work for necessary remedial works. Where applicable, the service provider shall also prepare construction drawings and technical specifications to support the implementation of the recommended remedial works.

A winning bidder (consulting engineer or professional service provider) who has been involved in the preparation of project feasibility assessments, scoping reports, or the development of project design drawings **will not be eligible to submit a bid as a contractor for the implementation of the same project.** This restriction is necessary to avoid a conflict of interest and to ensure fairness, transparency, and integrity in the procurement process as required by **Section 217 of the Constitution of the Republic of South Africa.**

The detailed scope of work includes, but is not limited to, the following:

4.1 Comprehensive Condition Assessment

The assessment must include a detailed inspection of all structural elements (such as concrete slabs, beams, and walls) to determine structural integrity and identify any signs of movement, cracking, or material degradation. It must also cover the condition and compliance of electrical and plumbing systems, roofing components (including waterproofing), and architectural finishes such as walls, ceilings, flooring, and joinery.

4.2 Load Capacity Analysis

Determine whether the existing structure can safely support current and future loads, including occupants, furniture, and any additional modifications and analyse how the building performs under various load conditions, including static and dynamic loads.

4.3 Safety Evaluation

Assess the building for visible defects, fire safety compliance, safe access/escape routes, and environmental hazards to confirm it meets occupancy safety requirements.

4.4 Documentation and Reporting

Prepare a comprehensive report outlining all findings, analysis, photographs, and risk ratings. Provide actionable recommendations for repairs, renovations, or reinforcements and

construction drawings where necessary based on the assessment findings. Where applicable, issue formal engineering certificates of compliance (signed by a registered ECSA Professional Engineer) within five (5) working days following completion of any inspection or remedial verification.

4.5 Remedial recommendations

Use assessment results to detail recommended remedial actions that are structurally sound, compliant with code, and that align with real estate market trends to increase resale value. Highlight critical vs. optional improvements, with a recommended execution plan.

4.6 Monitoring, Progress Updates, and Stakeholder Coordination

Actively manage and monitor all work related to the assessment and reporting processes. The service provider will be expected to coordinate closely with NHFC's team, provide regular progress updates, and ensure all findings and reports are communicated transparently and timeously.

4.7 Cost Estimates for Remedial Work

Based on the remedial recommendations, prepare detailed and itemized cost estimates for all proposed works. Ensure the estimates reflect current market rates, align with the recommended execution plan, and differentiate between critical and optional improvements to support budgeting and decision-making.

4.8 Guarantees and Accountability

The service provider must ensure that all engineering recommendations are of high quality and in full compliance with applicable standards. Any costs incurred by NHFC as a result of defective workmanship, professional negligence, or non-compliance will be the responsibility of the service provider.

4. Evaluation Criteria

Evaluation of bids will be conducted in three (03) phases as follows:

Phase 1 – Administrative and Mandatory Compliance Requirements (Refer to page 9)

This stage checks and validates the bidders' compliance with the legal requirements to conduct business in South Africa, as well as with the industry requirements for the supply of goods and services. All SBDs must be submitted (signed), noting where it is not applicable. If any specific SBD is not submitted, documentary proof, clearly stating the reason, must be attached.

Phase 2 – Functionality

Functionality is worth 100 points. The minimum threshold is 70 points. Bidders who score less than 70 points on Functionality will therefore be disqualified. Those who score more than 70 points will be further evaluated in terms of price and preference points. The functionality evaluation is broken down as follows:
