Part C4: Site Information

1. Description of the Site and its surroundings

The project is located at O.R. Tambo International Airport (ORTIA), within the Terminal A North Wing, specifically targeting the third and fourth floors of the existing administrative office block. These floors are currently configured as closed-plan offices and will be reconfigured into modern, open-plan workspaces.

The scope also includes interventions in the Parking Office, which is situated adjacent to or within the same administrative block, and forms part of the broader spatial optimization strategy.

Note: The project is not located on the airside. It is within the landside operational zone, accessible to staff and contractors without airside clearance, but still subject to standard airport security protocols.

2. Functional Importance

These office levels accommodate key operational and executive functions, including offices for the AGM and GM, and the Parking Office, which supports landside operations. The reconfiguration aims to improve spatial efficiency, security, and compliance with ACSA's branding and operational standards.

3. Access and Security

The site is within a restricted landside zone, requiring personal access permits issued by ACSA Security. No airside permits (e.g., AVOP or airside vehicle permits) are required for this project. Access to the Parking Office may require coordination with ACSA Parking and Facilities Management teams. All personnel must comply with airport safety, fire, and environmental regulations.

4. Site Constraints

The site is surrounded by active airport operations, including passenger movement and staff circulation. Existing infrastructure includes live services (electrical, data, water), which must be protected during construction. Coordination with airport departments (e.g., Engineering, Security, Parking) is essential to avoid operational disruptions.
