No.	Date	Ref	Supplier Clarification Question	Eskom Response
1.	22/04/2026	Refer to the scope of work both on the Invitation to Tender, NEC3 SC and URS for any clarity of specifications	I have a few questions that I hope you can assist with: 1. Could you please share the detailed specifications for DSG-318-003? 2. The ITT document mentions a quantity of 300. Could you clarify whether this refers to 300 tons over a 5-year period that Eskom intends to procure? 3. The documentation references the following: <i>DSG-318-003; 0021/86Q; Q3:NSF:NC: NEV; CEMENT; MNF: AFRISAM/PPC; TYPE: CEM III 42.5N to CEM I 52.5N; CONTAINER: BAG 1 T (1 bag = 1000 kg).</i> Could you please clarify the required cement strength? Specifically: ○ Is the requirement for CEM III 42.5N: and if so, what quantity? ○ Or for CEM I 52.5N: and if so, what quantity? ○ Alternatively, are strengths within the range of 42.5N to 52.5N acceptable?	Kindly note that the full spec has proprietary information on it. The requested quantity is 300 EA The cement strength is preferentially 52.5N CEM 1. But we can use the range from 42.5N CEM III to 52.5N CEM I is acceptable
2.	22/04/2026		I am aware of the clarification meeting scheduled for tomorrow, but I would appreciate clarification in advance to better understand the specific cement strength requirements. Thank you in advance for your assistance.	Kindly note that the clarification meeting will take place on the 30th of April 2026. The end-user has confirmed their availability: The link below is written in blue: Link
