

	Request for Quotation	Doc. No	NLM-QUO-25/067
		Revision	1
		Page	1 of 4

RFQ Number	NLM-QUO-25/067
Request for Quotation Date	16 July 2025
RFQ Closing Date	30 July 2025
RFQ Closing Time	17:00
Compulsory Site Briefing	Not compulsory but if more information required can be arranged
Contact Person	Catherine Matima
Quotation Validity	90 Days from the closing date
Submission Details	RFQ Response must be sent to: catherine.matima@necsa.co.za
RFQ Description	To supply moisture traps as per the attached specification sheets

Dear Service Provider

Kindly provide a quotation for goods and or services as outlined in section 2 of this document.

1. Introduction

The South African Nuclear Energy Corporation Limited (Necsa) is a state-owned public company (SOC), registered in terms of the Companies Act, (Act No. 61 of 1973), registration number 2000/003735/06.

The Necsa Group engages in commercial business mainly through its wholly-owned commercial subsidiaries: NTP Radioisotopes SOC Ltd (NTP), which is responsible for a range of radiation-based products and services for healthcare, life sciences and industry, and Pelchem SOC Ltd (Pelchem), which supplies fluorine and fluorine-based products. Both subsidiaries, together with their subsidiaries, supply local and global markets, earning valuable foreign exchange for South Africa and are among the best in their field in their respective world markets.

Necsa's safety, health, environment and quality policies provides for top management commitment to compliance with regulatory requirements of ISO 14001, OHSAS 18001 and RD 0034 (Quality and Safety Management Requirements for Nuclear Installations), ISO 9001 and ISO 17025.

Necsa promotes the science, technology and engineering expertise of South Africa and improves the public understanding of these through regular communications at various forums and outreach programmes to the community. We are a proudly South African company continuously striving, and succeeding in many respects, to be at the edge of science, technology and engineering related to the safe use of nuclear knowledge to improve our world.

2. Background

Necsa plans to establish a plasma gasification demonstration facility in a laboratory on-site to volumetrically reduce solid, compressible, low-level nuclear waste. Two moisture traps are utilized within the facility, as follows:

1. The moisture trap, Y1511, is installed in the main process off-gas line from the wet scrubber, S1501, in the facility to remove any moisture, either in the form of water or scrubbing liquid, above the saturation level in the gas. The position of the moisture trap within the process is reflected in the attached Piping and Instrumentation Diagram (P&ID) [03], with detail given in the attached Specification Sheet [01].
2. The moisture trap, Y1701, is installed within the compressed air supply system, which supports and services the facility. Its function is to remove water from the incoming crude compressed air, before the air enters the purification system, Y1702. The position of the moisture trap within the compressed air supply system is reflected in the attached P&ID [04], with detail given in the attached Specification Sheet [02].

3. Scope of Work

Item Description	Quantity
To supply the required moisture traps, Y1511 and Y1701, as per the attached Specification Sheets, [01] and [02], respectively.	2 (i.e. one of each moisture trap)
All other equipment and components identified in Section 2 and/or shown in the P&IDs, [03] and [04], are outside the scope of work considered here.

5. Pricing

- All price quoted to include all applicable taxes.
- Price must be fixed and firm.
- Price should include additional cost elements such as freight, insurance until acceptance, duty where applicable, disbursements etc.
- Quotation must be completed in full, incomplete quote could result in a quote being disqualified.
- Payment will be according to Necsa's General Conditions of Purchase.

6. Evaluation

6.1. Phase 1- Functionality Evaluation / Technical Evaluation

Where functional or technical evaluation criterion is applicable, assessment will be performed in terms of the criterion listed below and the criterion may include Technical, Performance, Quality and Risk.

If the Bidder's response to the Technical templates does not indicate that the Bidder can support an acceptable technical solution, the Bidder's response will be rejected and not evaluated further.

Together the Technical, Performance & Quality and Risk criteria make up the functionality criterion and a Bidder's Proposal will be evaluated for functionality out of a possible 100 points. Only RFQ responses achieving an evaluation score of greater than the set threshold points out of the possible 100 points and which score a number of points for functionality that is greater than or equal to the set threshold points of the number of points achieved by the highest scoring Bid for functionality will be selected to progress to the second stage.

The quotations will be evaluated according to the following selection criteria (based on information requested above):

Item	Requirement	Weight	Points	Criteria
1	ISO 9001: 2015 (or latest) accredited Supplier must provide evidence (ISO 9001 certificate)	25	25	ISO 9001 accreditation of supplier of the required products. OR ISO 9001 accreditation of OEM and OEM letter listing local supplier as authorised supplier and service agent

	Request for Quotation	Doc. No	NLM-QUO-25/067
		Revision	1
		Page	1 of 4

Item	Requirement	Weight	Points	Criteria
2	Supplier must provide letter referencing after sales service and maintenance	25	25	Supplier have a service and repair workshop Supplier holds critical spares as stock items
			15	Supplier have a service and repair workshop
			10	Supplier outsources service and repair
3	Supplier lead-time Supplier must specify lead-time	25	25	Product available within 4 weeks of issue of Purchase Order
			15	Product available within 6 weeks of issue of Purchase Order
			10	Product available within 8 weeks of issue of Purchase Order
4	Suitability of Product	25	25	Supplier adequately demonstrates how the recommended product meets the user's requirements or specifications (provide data sheet)
Total		100		

Note: Bidders that score <80 out of 100 in respect of Technical/Functional evaluation criteria will be regarded as submitting a non-responsive bid and will not be evaluated further.

6.2. Phase 2 - Evaluation In Terms Of Preferential Procurement Policy Framework Act, 2022

This bid will be evaluated and adjudicated according to the 80/20 point system, in terms of which a maximum of 80 points will be awarded for price and 20 points will be allocated based on the specific goals (B-BBE status level).

	POINTS
PRICE	80
SPECIFIC GOALS (B-BBEE status level)	20
Total points for Price and SPECIFIC GOALS	100

Preference goal

	Request for Quotation	Doc. No	NLM-QUO-25/067

B-BBEE status level contributor

B-BBEE Status Level of Contributor	Number of points (80/20 system)
1	20
2	18
3	14
4	12
5	8
6	6
7	4
8	2
Non-compliant contributor	0

7. Required Documentation

- Tax Clearance Certificate (Tax pin issued by SARS)
- Declaration of interest (SBD 4)
- BEE Certificate / Applicable Affidavit if classified as EME
- Letter of Good Standing (COID) only if Applicable due to the nature of work required
- Any other document or certification that might have been requested on this RFQ

8. Important

- 8.1. Quotation must be submitted on or before the RFQ closing date and time stated above.
- 8.2. Orders above R 30 000 will be evaluated according to the PPPFA 80/20-point system and a functionality scorecard where applicable and the ones above R 1 Million will be subjected to the tender process.
- 8.3. This RFQ is subjected to the Necsa's General Conditions of Purchase, Preferential Procurement Policy Framework Act 2000 and the Preferential Procurement Regulations, 2022, the General Conditions of Contract (GCC) and, if applicable, any other legislation or special conditions of contract.
- 8.4. Failure on the part of a bidder to submit proof of B-BBEE Status level of contributor together with the bid, will be interpreted to mean that preference points for specific goals are not claimed.

	Request for Quotation	Doc. No	NLM-QUO-25/067
		Revision	1
		Page	1 of 4

- 8.5. The purchaser reserves the right to require of a bidder, either before a bid is adjudicated or at any time subsequently, to substantiate any claim in regard to specific goals, in any manner required by the purchaser.
- 8.6. For a Bidder to obtain clarity on any matter arising from or referred to in this document, please refer queries, in writing, to the contact details provided above. Under no circumstances may any other employee within Necsa be approached for any information. Any such action might result in a disqualification of a response submitted in competition to this RFQ.
- 8.7. No goods and/or services should be delivered to Necsa without an official Necsa Purchase order.
- 8.8. Necsa reserves the right to; cancel or reject any quote and not to award the RFQ to the lowest Bidder or award parts of the RFQ to different Bidders, or not to award the RFQ at all.
- 8.9. The supplier shall under no circumstances offer, promise or make any gift, payment, loan, reward, inducement, benefit or other advantage, which may be construed as being made to solicit any favour, to any Necsa employee or its representatives. Such an act shall constitute a material breach of the Agreement and the Necsa shall be entitled to terminate the Agreement forthwith, without prejudice to any of its rights
- 8.10. By responding to this request, it shall be construed that: the bidder, hereby acknowledge to be fully conversant with the details and conditions set out in the Necsa's General Conditions of Purchase, Preferential Procurement Policy Framework Act 2000 and the Preferential Procurement Regulations, 2022, the General Conditions of Contract (GCC), Technical Information and Specifications attached, and hereby agree to supply, render services or perform works in accordance therewith.

MOISTURE TRAP Y1511 SPECIFICATION SHEET

Project	NW PlasGas & CWOPG Project	Unit Tag Number	Y1511
Datasheet Document No.	ENS-NWPVR-SPE-24004	Revision	2
Description	Moisture trap Y1511 is installed on the process off-gas line, downstream of the wet scrubber S1501 for the Low-Level Waste Plasma Gasification (NW PlasGas) and the Uranium Contaminated Waste Oil Plasma Gasification (CWOPG) Demonstration Facilities [1]. Its function is to remove any moisture, either in the form of water or as scrubbing liquid, above the saturation level in the gas.		
Plant location	Necsa, Pelindaba, North-West Province.		
Equipment location	Merged NW PlasGas & CWOPG Facilities - Inside secondary enclosure Y1410 in Laboratory-150, Building V-H2 [Note 6]		
Safety Classification	SC-2(C) and SC-3(N)		
Quality Classification	QC-2(C) and QC-3(N)		
Fluid state	Gas		
Solid content	Possible solid uranium compound particulates.		
Corrosive due to	Hydrogen Chloride (HCl) and Hydrogen Fluoride (HF) gases - produced at maximum rates of 10 g/h [2] and 0,2 g/h [9], respectively.		

FLUID PROPERTY DATA

PARAMETERS	UNITS	NW PLASGAS		CWOPG

NOTES

Note 1: The composition of the exhaust scrubber off-gas changes over time due to chemical reactions which take place in the scrubber. For the NW PlasGas Facility, the as composition (% w/w) is 1.35% CO₂, 0.08% HCl, 51,86% O₂ and 46,71% N₂ at the minimum flow rate, and 74,03% CO₂, 0.02% HCl, 13,65% O₂ and 12,3% N₂ at the maximum flow rate. For the CWOPG Facility the, gas composition (%w/w) is 10.3% CO₂, 0.01% HCl, <0.01% HF, 56.7% O₂ and 33.0% N₂ at the start of the process, and 69.6% CO₂, Traces of HCl, Traces of HF, 19.2% O₂ and 11.2% N₂ at the end of the process.

Note 2: Moisture trap to be supplied complete with integrated automatic drain valve, which does not allow release of off-gas during drainage, only moisture.

Note 3: Conservatively estimated to be 1% of water present in feed gas to wet scrubber, taking note that the scrubber also contains an integrated demister to prevent liquid entrainment in the off-gas stream.

Note 4: Mixture specific heat capacity estimated by weighted average calculation. Pure component specific heat capacities estimated from Table 2 in [3].

Note 5: Mixture viscosity estimated using the equation in [6] section 4.2. Pure component viscosities estimated using nomograph given in [7] Fig 2-32, page 2-321, with nomograph coordinates from [7] Table 2-364, page 2-320, (HCl / HF contributions assumed to be negligible).

Note 6: The NW PlasGas and CWOPG Facilities will not be operated simultaneously. Therefore this moisture trap will only be servicing one of the facilities at a time.
