

TRANSNET PIPELINES**RFP NUMBER: TPL/2023/08/0004/39137/RFP****RFP DESCRIPTION: The Provision of Cathodic Protection Contractor expertise for Transnet Pipelines Multi-Products Pipeline Cathodic Protection Optimisation Project for the section of the pipeline from Island View (Durban) to Jameson Park (Johannesburg) (PL1)****VOLUME 1**

Item No.	Enquiries	Response
1	Are you able to get the BOQ's in excel format for us ? I know we have to complete in pen, but excel helps eliminate errors in pricing.	Refer to the locked BOQ Spreadsheets attached, only the cells with input from the Contractor is unlocked.
2	The client (Transnet) would like to retrofit the outside hinges of the current Rocla Enclosures and move them to the inside of the Rocla to avoid vandalism. The new equipment shelter has the hinges on the inside. It will not be possible to change their existing units as it is cast into the concrete walls. Further to your e-mail enquiry regarding the retrofitting of the hinges, please see the response from our Business Manager. Regrettably it won't be possible to effect these changes on the older models.	The idea on this one was not to necessarily have to rely on Rocla to effect these changes on the Roclas. The contractor will need to come up with a solution in which they buy the required hinges and have a qualified boilermaker weld the hinges to the inner frame of the Rocla.
3	Can we please be issued with Annexure H, as it is mentioned several times but no document of such was received we only have Annexures A to F as per "Page 36 of 37 6. Annexures".	Please refer to the revised BOQ and Site Information. There was a Typing error in the documents, the information is covered in Annexure F
4	There is details of the supply for the underground boxes, could we please have such detail to make direct contact with the supplier.	www.smartlock.net +27 12 349 5301 info@smartlock.net
5	Update regarding extension of time for submission of the RFP.	The closing date of the RFP has been extended. Refer to Addendum 01
6	I wanted to enquire about the recommended supplier "smartlock" I am failing to find the recommended supplier, Could you please verify their details?	www.smartlock.net +27 12 349 5301 info@smartlock.net
