1. PURPOSE

- 1.1 To appoint a business case development specialist, supporting the preparation of project documents including Business Case Development for programmes in the Biodiversity Economy sector, for use of those business cases in the Biodiversity Sector Investment Portal for a period of twenty-four (24) months.

2. INTRODUCTION AND BACKGROUND

- 2.1 DFFE is looking to invite proposals from service providers for the development of business case documentation for selected programmes as guided by the National Department DFFE and the various provinces, Management Authorities, and entities of SANPARKS and iSimangaliso.
- 2.2 As part of the ongoing work of the Biodiversity Sector investment portal, which is an online portal implemented by DFFE, for the showcasing of bankable projects in the biodiversity Sector, a blueprint for documentation of business case proposals has been developed. In order to develop the business cases in the desired format, a situational assessment, financial assessment and impacts assessment must be conducted for selected sites.
- 2.3 In respect of the underlying need for the portal and the need for well documented opportunities across SMMES and communities. A strengthened investment environment will enable the mobilization of public and private resources to support resilient, sustainable, and inclusive growth within the Biodiversity Economy of South Africa. The investment of public funds should be catalytic and lead to further coordinated investments from the public and private sectors. This will require more innovative and sophisticated financing strategies that facilitate significant and sustainable flows of finance to support sustainable and thriving Biodiversity Economy enterprises and programmes.
- 2.4 In order to achieve the envisaged growth and to ensure transformation of the sector, it is important to create an enabling environment for communities and entrepreneurs to participate in the biodiversity economy. This will contribute to poverty alleviation, sustainable development, and conservation of the country's biodiversity, requiring an integrated approach across a wide range of departments, all levels of government and input and support from industry and civil society.
- 2.5 It has been identified that it is crucial to devise appropriate mechanisms to leverage new investment into the Biodiversity Economy sector. Investment and financing for the sector does not necessarily require the creation of new instruments, but rather better showcasing existing investment opportunities (Biodiversity Economy projects) and connecting those opportunities/enterprises with available traditional and more innovative financing instruments and partners.

- 2.6 As such the Digital investment portal is being developed as an existing programme with funding from BIOFIN that will enable such visibility into the various opportunities.
- 2.7 The investment Portal will provide inputs and clarity on key policy considerations to further promote and mainstream investment and financing for sustainable Biodiversity Economy development such as:
 - 2.7.1. Promotion of finance for investment projects of all sizes and at various stages of development (such as start-up and early stages).
 - 2.7.2. Highlighting of Risk-sharing mechanisms to foster private sector participation
 - 2.7.3. Improve data and analysis on finance and investment in Biodiversity Economy enterprises
- 2.8 A key part of the scale-up of projects and opportunities that may be showcased in the Investment portal, is the effort in assisting communities, SMMES and other small businesses to get their project documentation to an appropriate level of quality, so that it may be used in the portal. During the development phase of the BIOFIN programme in developing the portal, a transaction advisor was appointed, to develop 10 business case documents for stewardship sites. This investment effort has proved very successful and assisted to produce high quality documentation for these projects. It has been identified both by BIOFIN and the DFFE project team that continuous support is needed to provide such strategic support to allow for the scale up of opportunities showcased on the portal – especially given that the portal will be live and in used from February 2022. Hence this investment is a strategic and mutually enabling effort to allow the portal to be more efficient and to ramp up the identification of critical investments needed in the sector.

3. OBJECTIVES

- 3.1. The main objective of this project is to appoint a service provider to cover all activities relating to the development and refining of business case documentation in respect of applicable opportunities that are eligible for showcasing on the Biodiversity Investment Portal.
- 3.2. The initiative will support the existing programme of work of the Biodiversity Investment portal and hence all comprehensive documentation developed should align with the templates and requirements as set out in the investment portal business case requirements and guidelines.
 - 3.2.1. Articulation of proposals should be targeted to the investor mandate and designed in a fit-for-purpose language to that investor.
- 3.3. It is envisaged that in some instances sites and enterprises selected would already have some documentation in place hence there are two (2) types of supports envisaged.
 - 3.3.1. Type 1- documentation exists and hence a refinement and development of project documentation relating to existing documentation and known opportunities. In this case a site

visit may not be required but only virtual and regular calls may suffice for the information gathering.

3.3.2. Type 2- Very little documentation in existence. In this case a site visit is mandatory, and the documentation will then be developed in correspondence with the site visit and any additional calls set up as needed.

3.4. The objective is to provide for up to 30 of type 1 and type 2 business cases in total.

3.4.1. At least 10 of type 2 should be concluded (at least 1 site per month must be concluded)

3.4.2. A list of viable sites will be provided by the DFFE team - these include opportunities from the Biodiversity Economy, ecological infrastructure, and nature-based economy sector.

3.4.3. Each site will be assessed against bankability criteria to be suggested by the service provider, ahead of a site visit and a determination on whether they are type 1 or type 2 will be made.

4. SCOPE AND EXTENT OF WORK

4.1. Inception meeting

4.1.1. Participate in an inception meeting for the implementation of the TOR and the coordination of documentation.

4.1.2. Develop and present the project plan for the implementation approach for the TOR and provide secretariat support as needed.

4.1.3. Provide a report of the inception meeting.

4.2. Desktop research and site selection process

4.2.1. DFFE team that will provide a list of viable projects and programmes within both the Biodiversity Economy and the Ecological Infrastructure sectors, as well as relevant templates and guidelines.

4.2.2. Service provider to undertake desktop research based on opportunities provided, for each site and opportunity identified.

4.2.3. Develop assessment criteria to rate projects in terms of bankability and qualifying them in terms of type 1 and type 2. Include scoring and strength of opportunity.

4.2.4. Thereafter selection of chosen sites to be conducted.

4.2.5. A report on viable sites and scoring to be shared.

4.3. Output – Ongoing development of Business cases

4.3.1. For each identified site and opportunity as provided by the DFFE working group and project team, the business case document should be developed to adhere to the requirements as set out by the investment platform. There is already an existing business case template that has been developed for use on the investment portal. There is opportunity for the service

provider to make suggestions on improvements or needed edits to the existing business case template. The template includes all the elements as indicated below:

- 4.3.1.1. Conduct an assessment on existing commercial or related activities (may include Biodiversity Economy, Ecological infrastructure, agricultural or other activity) at the site detailing existing governance; operational performance and skills; existing market.
- 4.3.1.2. Conduct an assessment on future opportunities for Biodiversity Economy/Ecological Infrastructure/commercial activities at the site.
- 4.3.1.3. Develop a comprehensive needs analysis to support the future site opportunities.
- 4.3.1.4. Develop a high-level roadmap per business development opportunity and based on the needs.
- 4.3.1.5. Conduct a market competition assessment for each site.
- 4.3.1.6. Conduct an assessment of potential risks (environmental, economic, and social) associated with each business development plan.
- 4.3.1.7. Conduct a comprehensive stakeholder analysis per site.
- 4.3.1.8. Develop finance models for each site indicating opportunities for investment and partnership. (For example, traditional loan finance vs impact investors vs operator's vs equity partners etc...). Include recommendations for the types of investments that site should look for. Include strengths and weakness argument for each investment / partnership model.
- 4.3.1.9. Develop a high-level profile of the sites economic opportunities set within the regional location node in which it resides. Include in the comparison, market linkage opportunities; competitor landscape and geospatial/geopolitical opportunities and risks.
