

COAL OPS:

<u>QUESTION</u>	<u>ANSWER</u>
1. On the Scope of Work page 12 it references the plant required and a Site Bill of Quantities for the plant. This information is however not included in the tender documents. The BoQ that is included only includes qty's for the operating personnel. The NEC3 TSC refers to a Price List which is not included?	The BOQ that they will quote on is the only BOQ referenced. Also serves as the Price list.
2. In addition to the above, is Eskom supplying some the plant or all of the plant? (on page 5 of the SOW, under dust suppression it is indicated that the Employer is supplying the water tanker)?	We supply all plant. The 'water tanker' mentioned could just be an error. Only BOQ items are to be quoted for.
3. Will transport from home to work and work to home be provided by ERI or is the responsibility of the contractor?	The transportation will be provided by us, through our Employee transportation contracts...as well as the equipment.
