1. PURPOSE

- 1.1. To appoint a service provider(s) to supply and deliver fruit and indigenous ornamental trees in the provinces of Northwest, Northern Cape, Gauteng, Mpumalanga, Limpopo, Eastern Cape and Western Cape provinces for use in the Two Million Trees per annum Programme of the Department of Forestry, Fisheries and the Environment for the period of twenty-four (24) months.

2. INTRODUCTION AND BACKGROUND

- 2.1. The Department of Forestry, Fisheries and the Environment (DFFE) is the custodian of the forestry function in South Africa. Part of the function entails the implementation of those initiatives that result in the development of communities using forestry resources. One of the focus areas of community development is using green in the country for issues of environmental concern, food insecurity and poverty reduction. This is done in line with the principles of the National Forest Act, 1998, Section 32, which provides for community forestry., and the White Paper on Sustainable Forest Development, 1996, which realises that forestry is not only about managing forests but also about the relationship between forests as a resource and the people living in and around forests. Forests, in this instance, will include trees outside forests.
- 2.2. It is now a known fact that the world, in general, is starting to feel the effects of global warming and, in particular, climate change. This phenomenon is an environmental threat resulting from emissions of Green House Gases in the atmosphere. It is now crucial to face this phenomenon head-on by adopting mitigation strategies and adapting our actions towards it. These climate changes may have significant effects on various sectors globally. Tree planting, which forms the basis for the departmental greening programme, is one of the mitigating factors that are recommended towards the slowing down of this environmental threat. It is for this reason that the Department is pursuing the Two Million Trees Programme. The Two Million Trees Programme aims to emphasise the value of trees and forests in the lives of South Africans. This will not only bring beauty into the households but also promote the importance of trees and benefits for the environment.
- 2.3. The activities will include greening of Low-Income Cost Housing areas with the sole aim of creating sustainable settlements, addressing household food security by planting fruit trees into homestead gardens and creating employment opportunities, especially for the youth through the Expanded Public Works Programme. It is acknowledged that the tree-planting programmes will have to rely on other supporting programmes, such as environmental education, to inform and educate society in general on the importance of trees within the environment and their role in mitigating environmental threats.

- 2.4. The Departmental nurseries have not been able to propagate sufficient trees. It is important to note that to reach the set target of two million trees per annum, the department will have to purchase the trees to complement trees produced by its own nurseries and greening partners. The Branch: Forestry Management, as the lead in the Greening of South Africa, will work with other branches in the Department such as Chemical and Waste, Biodiversity and Conservation and Environmental Programmes.
- 2.5. The Branch: Forestry Management will take a leading role in the development of the plan, coordination of inputs and execution of the programme. The Branch will also lead the National Greening Forum, whereby key role-players such as Metropolitan Municipalities, Non-Government Organisations and the corporate sector will present their plans and reports. The forum will help with the monitoring and evaluation of plans.

3. OBJECTIVES

- 3.1. The project is expected to achieve the following:
- 3.1.1. To ensure the supply of fruit and indigenous ornamental trees for use in The Two Million Trees Per Annum Programme of the Department in all seven provinces of the country.
- 3.1.2. The secondary objectives include the following:
- To ensure the greening of South Africa
 - To create sustainable settlements
 - To mitigate against the harmful effects of climate change
 - To support Municipalities, Non-Government Organisations and Community Based Organisations to green their areas of jurisdiction

4. SCOPE AND EXTENT OF WORK

- 4.1. The supplier should supply the right and new cultivars that can be supplied and used and can withstand pests and diseases. The supplier/s should work closely with the department to ensure that Fruit and Indigenous trees suitable and endemic to specific areas of supply are provided.
- 4.2. The ratio of fruit to ornamental shade trees will be 60: 40. It is estimated that the trees procured will be about 182 000, comprising 109 200 fruit trees and 72 800 ornamental shade trees.
- 4.3. Fruit trees with a height of 1.8m and are in 10 L containers should be supplied.
- 4.4. Indigenous trees with a height of 1.5m and are in 20L containers should be supplied.
- 4.5. The supplier should ensure that fruit trees are supplied in line with the different agroecological zones and that the correct cultivars/varieties are provided.

4.6. Trees should be sourced from credible tree suppliers. The bidder must own a nursery or have a reliable source of supply. The successful bidder must provide proof of ownership or proof of credible supplier which must be submitted to the Department after issuance of the pre-award letter but prior to the signing of the Service Level Agreement (SLA) and the issuance of the Official Purchase Order.
