

TENDER BULLETIN NO. 1

CTT 24910 – SUPPLY, DELIVER, INSTALL AND COMMISSION NITROGEN GENERATOR INCLUDING TRAINING AT THE PetroSA GTL REFINERY, MOSSEL BAY

	General Questions/ Clarifications / Notes
1.	Question - The minimum flow in the enquiry is stated as 2000Nm³/h, we have a TGN2000 plant that matches this but no maximum flow is stated? Obviously the bigger the plant the more capital, please advise if the TGN2000 max 2155Nm³/h is sufficient? Answer - The specification states 2000 Nm³/hr being requested as a minimum nitrogen production rate. Nitrogen production rate of 2000 Nm³/hr or higher is acceptable. Note that we have not foreseen or currently allowed for any liquefied nitrogen production.
