SECTION 2

1. INTRODUCTION

This document serves as a bid specification for the appointment of a Service provider for the Design, Manufacture, Delivery, Off-Loading, Installation, Testing, Commissioning and Training of **Eighty-Four (84) Rolling Stock Mobile Synchronised Vehicle Lifting Jacks (i.e. 3 sets of 24 jacks and 3 sets of 4 jacks as spares, totaling 84 jacks)** for PRASA new trains over a period of 12 months.

2. BACKGROUND INFORMATION

PRASA has embarked on a major rolling stock fleet renewal programme in order to replace all its existing metro train fleet over the next 20 years. The new technology and improved maintenance practices required for the new Rolling Stock fleet will require a comprehensive review and upgrade of the maintenance depots and facilities.

The depots identified for modernization include Braamfontein, Benrose, Wolmerton, Paarden Eiland, Salt River, Eastern Cape, Springfield, and Durban Yard. The Depot Modernization Programme (DMP) is intended to support the scheduled maintenance interventions required for the new fleet.

The regional distribution of the new EM01 fleet is given in the following table:

Region	Qty
Gauteng North	96
Western Cape	80
KwaZulu Natal	91
Gauteng South	65
TOTAL Delivered	332

Table 1. Regional distribution of Delivered Train Sets as of May 2026

RE-ADVERT: APPOINTMENT OF A SERVICE PROVIDER FOR THE DESIGN, MANUFACTURE, DELIVERY, OFF-LOAD, INSTALLATION, TEST, COMMISSIONING AND TRAINING OF EIGHTY-FOUR (84) ROLLING STOCK MOBILE SYNCHRONISED VEHICLE LIFTING JACKS FOR PRASA NEW TRAINS	
TENDER NUMBER: HO/PGC/RS/519/07/2026	

Although the DMP was expected to run parallel with train deliveries, it has been delayed by up to 10 years, while train sets continued to arrive. As a result, PRASA does not currently have the facilities required to perform scheduled maintenance interventions, forcing trains to be stopped/staged.

The extent of these stoppages includes:

- **11 trainsets already withdrawn from service due to the absence of lifting facilities for scheduled 4-year and 6-year maintenance interventions. The maintenance schedules indicate that an additional 20 trainsets are expected to be withdrawn within the next six months.**

To mitigate these challenges, PRASA has planned to introduce interim measures at regional depots while the long-term DMP solution undergoes procurement process of the acquisition of In-floor lifting jacks.

This interim approach, known as the **Expanded Interim DMP Intervention**, focuses on several elements that include Depot and Facility modifications, but also the procurement of Synchronised lifting jacks. This procurement solution, with expected lead time of estimated 12 months, provides medium to long-term relief compared to the turnkey DMP solution, which is expected to be delivered in a minimum of estimated 5 years.

2.1 STATUS QUO

Currently, apart from Wolmerton depot, PRASA has no Synchronised lifting jacks available for the new fleet. Several trains already require lifting for the execution of the 4-yearly and 6- yearly Preventive maintenance activities and due to safety risks, maintenance depots have withdrawn the affected trainsets from service.

2.2 PROBLEM STATEMENT

Due to significant delays in the DMP, PRASA lacks Rolling Stock's Synchronised lifting jacks for the new fleet. Several trains already require Maintenance interventions that require these jacks and safety concerns have forced their withdrawal from service.

RE-ADVERT: APPOINTMENT OF A SERVICE PROVIDER FOR THE DESIGN, MANUFACTURE, DELIVERY, OFF-LOAD, INSTALLATION, TEST, COMMISSIONING AND TRAINING OF EIGHTY-FOUR (84) ROLLING STOCK MOBILE SYNCHRONISED VEHICLE LIFTING JACKS FOR PRASA NEW TRAINS	
TENDER NUMBER: HO/PGC/RS/519/07/2026	

To establish minimum maintenance capabilities, the Interim DMP programme was introduced. The acquisition of Synchronised lifting jacks is a critical component in ensuring functional maintenance and repair facilities are in place.

The urgency of this project is underscored by the fact that 24 trainsets (for wheel wear and damages) and 11 train sets (Maintenance backlog) are already stopped and withdrawn from service. The affected trainsets are valued at around **R5.2 billion** (i.e. R3.6 billion for wheel maintenance and R1.6 billion for lifting maintenance activities) and are currently unusable for operational service.

The Maintenance schedules indicate that around 20 trainsets will have to be stopped within the next 6 months (due for lifting maintenance activities and wheel reprofiling).

Please Note: The Lifting Jacks are an essential part of resolving the maintenance backlog but is also essential for the introduction of the Mobile wheel lathes.

Attached is an illustration showing the principle working of the Mobile wheel lathe. While the train is lifted by the jacks, the Mobile wheel lathe will move below the train and reprofile trainset wheels in situ without detaching the wheels from the bogie.

3. OBJECTIVE OF THE PROPOSED PROJECT

- The Depot Modernisation Programme supports the PRASA strategic objective of modernising the business.
- The Interim Depot program is an urgent intervention to establish the minimum required maintenance facilities for the new trains.
- The procurement of these Lifting jacks will be a vital element to the success of the whole Interim depot program in anticipation of the full DMP program.

3.1 DESIRED OUTCOMES FOR CARRYING OUT THE PROPOSED PROJECT

A combination of turnkey strategy and the production of client detailed designs for the depots were adopted, however these strategies currently result in major delays hence there is an alternative approach of securing a **Synchronised Lifting Jacks** as a measure to address the backlog of lifting maintenance activities at various depots in the country.

3.2 PROJECT BENEFITS TO PRASA

PRASA as a business shall realise the following significant benefits after the implementation of the project:

- Provision of the maintenance equipment required to sustain the reliability and availability of the new fleet and to a an extent the old fleet as well;
- The Mean time to repair will significantly improve. For Gauteng, this will change from 6-9 months to 1 week. The Coastal regions will for the first time be able to perform Maintenance activities and return their trainsets back to service;
- Modernisation and capacity enhancement;
- Anticipation of and response to the changing and dynamic needs of our railway passengers and stakeholders, and transport trends;
- The upskilling of the PRASA maintenance personnel who will be trained to use the latest technology Rolling Stock maintenance equipment;
- The depots will have maintenance equipment that ensures that trains spend as little time in the depots as required and more time making passenger trips, therefore increasing the income of PRASA through higher number of passenger trips.
- Improved compliance with the National Railway Safety Regulator Act, 2002 (Act No. 16 of 2002) and Occupational Health and Safety Act, 1993 (Act No. 85 of 1993); as per the latest amendments.

The benefits outlined above are in line with the PRASA Corporate Plan for MTEF 2026/27 to 2028/29.

3.3 CURRENT MECHANISMS IN PLACE TO ADDRESS THE PROBLEM

This project seeks to address the problem of the absence of the Lifting Jacks for various depots that have deployed operational new fleet.

Except Wolmerton maintenance depot, there is no current alternative mechanism in place for lifting a six-car trainset at Braamfontein, Durban and Salt River maintenance depots. Trainsets are therefore withdrawn from service for safety concerns with the non-compliance to the Maintenance schedules.

4. SCOPE OF WORKS AND AREAS OF FOCUS

4.1 SCOPE OF THE DESIRED SOLUTION

The scope of work for this project shall entail the following activities:

- Design / Design Review
- Manufacture (most likely that it will be found off-the-shelf, readily available – it will just require to be customised/adjusted to for our workshop facilities and EMUs configuration)
- Deliver and Off-Load the Mobile Synchronised Lifting Jacks at the depot and install it in the workshop where the lifting of a six-car trainset will be performed to execute maintenance activities
- Assemble, Test and Commissioning the Synchronised Lifting Jacks
- Training of Maintenance Personnel
- Hand-over to PRASA

Grounds for rejection	5 Consider rejecting a tender if there is any effort by a <i>tenderer</i> to influence the processing of tenders or contract award.
Disqualification	6 Instantly disqualify a <i>tenderer</i> (and his tender) if it is established that the <i>tenderer</i> offered an inducement to any person with a view to influencing the placing of a contract arising from this invitation to tender.

	8	Judge a responsive tender as one which conforms to all the terms, conditions, and specifications of the <i>tender documents</i> without material deviation or qualification. A material deviation or qualification is one which, in PRASA 's opinion would • detrimentally affect the scope, quality, or performance of the works, services or supply identified in the Contract Data, • change PRASA's or the <i>tenderer's</i> risks and responsibilities under the contract, or • affect the competitive position of other <i>tenderers</i> presenting responsive tenders, if it were to be rectified.
Non-responsive tenders	10	Reject a non-responsive tender, and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.
Arithmetical errors	11	Check responsive tenders for arithmetical errors, correcting them as follows: • Where there is a discrepancy between the amounts in figures and in words, the amount in words shall govern. • If a bill of quantities applies and there is a discrepancy between the rate and the line item total, resulting from multiplying the rate by the quantity, the rate as quoted shall govern. Where there is an obviously gross misplacement of the decimal point in the rate, the line item total as quoted shall govern, and the rate will be corrected. • Where there is an error in the total of the Prices, either as a result of other corrections required by this checking process or in the <i>tenderer's</i> addition of prices, the total of the Prices, if any, will be corrected.
	12	Reject a tender if the <i>tenderer</i> does not accept the corrected total of the Prices (if any).
Evaluating the tender	13	Evaluate responsive tenders in accordance with the procedure stated in the RFP / Scope of work/ specification. The evaluated tender price will be disclosed only to the relevant PRASA tender committee and will not be disclosed to <i>tenderers</i> or any other person.
