In the following description: “Expression of Interest (OEI) to participate in the tender process for the supply of nuclear fuel fabrication, fuel components, fuel related engineering studies and support services. Supply of Lead Use Assembly (LUA) programme to Koeberg Nuclear Power Station” What is meant by “fuel component?” is it RCCA or do you mean component of a fuel assembly like grids, rods, etc?	“Fuel Component or Core Component” means any devices used in fuel such as external burnable absorber assemblies and inserts i.e. thimble or flow plugging devices, Rod Control Cluster Assemblies; Spent Fuel inserts and shielding assemblies/inserts.
