- ☐ Each panel member shall award values for each individual criterion on a score sheet. The value scored for each criterion shall be multiplied with the specified weighting for the relevant criterion to obtain the marks scored for the various criteria. These marks should be added to obtain the total score. The following formula should then be used to convert the total score to a percentage for functionality:

$$Ps = \frac{So}{Ms} \times Ap$$

where

Ps = percentage scored for functionality by bid/proposal under consideration

So = total score of bid/proposal under consideration

Ms = maximum possible score

Ap = percentage allocated for functionality

- ☐ The percentages of each panel member shall be added together and divided by the number of panel members to establish the average percentage obtained by each individual bidder for functionality.

Where

- P_s = Points scored for comparative price of bid under consideration
 P_t = Comparative price of bid under consideration
 $P_{\min}$ = Comparative price of lowest acceptable bid
