C2.1 PRICING ASSUMPTIONS: OPTION B

1 How work is priced and assessed for payment

Clause 11 in NEC3 Engineering and Construction Contract (ECC3) Option B states:

Identified and defined terms	11 11.2	(21) The Bill of Quantities is the bill of quantities as changed in accordance with this contract to accommodate the implemented compensation events and for accepted quotation events for acceleration. (22) Defined Cost is the cost of the components in the Shorter Schedule of the Cost components whether work is subcontracted or not excluding the cost of preparing quotation for compensation events. (28) The Price for Work Done to Date is the total of - the quantity of the work which the Contractor has completed for each item in the Bill of Quantities multiplied by the rate and - a proportion for each lump sum which is the proportion of the work covered by the item the Contractor has completed. Completed work is the work without Defects which would either delay or be covered by immediately following work. (31) The Prices are the lump sums and the amounts obtained by multiplying the rates by the quantities for the items in the Bill of Quantities.
Acceleration	36 36.3	When the Project Manager accepts a quotation for an acceleration, in which the initial delay arising from the Contractor's fault, then he does not change the Prices, the Completion Date and the Key Dates accordingly but accepts the acceleration at the Contractor's cost. The Contractor will revise the programme for the Project Manager acceptance.
The Bill of Quantities	55 55.1	Information in the Bill of Quantities is not Works Information or Site Information.
Compensation events	60 60.4	A difference between the final total quantity of work done and the quantity stated for an item in the Bill of Quantities is a compensation event if - the difference does not result from a change to the Works Information - the difference causes the defined cost per unit of quantity to change and - the rate in the Bill of Quantities for the item multiplied by the final total quantity of work done is more than 0.5% of the total of the Prices at the Contract Date. If the Defined Cost per unit of quantity is reduced, the affected rate is reduced.
	60.5	A difference between the final total quantity of work done and the quantity for an item stated in the Bill of Quantities which delays Completion, or the meeting of the Condition stated for a Key Date is a compensation event.
	60.6	The Project Manager corrects mistakes in the Bill of Quantities which are departures from the rules for item descriptions and for division of the work into items in the method of measurement or are due to ambiguities or inconsistencies.

		Each such correction is a compensation event which may lead to reduced Prices.
	60.7	In assessing a compensation event which results from a correction of an inconsistency between the Bill of Quantities and another document, the Contractor is assumed to have taken the Bill of Quantities as correct.
Assessing compensation events	63 63.10	If the effect of a compensation event is to reduce the total Defined Cost and the event is • a change to the Works Information or • a correction of an assumption stated by the Project Manager for assessing an earlier compensation event the Prices are reduced.
	63.13	Assessments for changed Prices for compensation events are in the form of changes to the Bill of Quantities. • For the whole or part of a compensation event for work not yet done and for which there is an item in the Bill of Quantities, the changes are a ○ A change rate, ○ A changed quantity or ○ A changed lump sum. • For the whole or a part of a compensation event for work not yet done and for which there is no item in the Bill of Quantities, the change is a new priced item which unless the Project Manager and the Contractor agree otherwise, is compiled in accordance with the method of measurement • For the whole or a part of a compensation event for work already done, the change is a new lump sum item. If the Project Manager and the Contractor agree, rates and lump sums may be used to assess a compensation event.
Implementing compensation events	65 65.4	The changes to the Prices, the Completion Date and the Key Dates are included in the notification implementing a compensation event.
