1. PURPOSE

The purpose of this Request for Quotation (RFQ) is to appoint a service provider to provide support and maintenance of Loyalty Plus loyalty management platform for SANParks for a period of 06 months.

2. BACKGROUND

South African National Parks (SANParks) is a public entity functioning under National Environmental Management: Protected Areas Act 57 of 2003 (Act 57 of 2003); with the mandate to conserve; protect; control; and manage national parks and other defined protected areas and their biological diversity (Biodiversity). As a public entity, SANParks is also governed by the Public Finance Management Act, Act 1 of 1999 (as amended by Act 29 of 1999), and it is listed as Schedule 3 Part A: public entities.

SANParks' operations are totally guided by its vision and mission statements. As a public entity, the organisation is committed to act in pursuance of transformation of South Africa's society in support of entrenching South Africa's democracy. In this regard, the organisation has adopted a transformation mission to guide its efforts accordingly.

Vision

A sustainable National Park System connecting society.

Mission

To develop, expand, manage and promote a system of sustainable national parks that represents biodiversity and heritage assets, through innovation and best practice for the just and equitable benefit of current and future generations

Fulfilment of SANParks' conservation mandate is heavily reliant on a thriving and sustainable tourism operation. As a primarily self-funding entity, the organisation generates most of its operating revenue from the tourism business. Maximising customer satisfaction and advocacy is thus key to sustainable revenue generation capability.

SANParks currently offers Wild Card to high-frequency guests. Wild Card offers discounted purchase of park access subscriptions and represents SANParks's current loyalty proposition. Wild Card is a successful and well-known brand which

has been received well by the market since its inception nearly two decades ago. The organisation has, however, acknowledged the need to design and deliver a more diversified and compelling loyalty proposition underlined by a fully-fledged loyalty rewards programme, to further boost SANParks's ability to market its tourism products to customers and meet incremental revenue objectives, both in the present and the future. SANParks' customer loyalty proposition will support the SANParks organisational strategy through the delivery of a commercially viable and sustainable customer value management solution to benefit SANParks, its stakeholders and partners.

To this end, SANParks has procured the LoyaltyPlus loyalty management solution as the technology platform on which all SANParks loyalty programmes will be managed. In 2022, all Wild Card data were successfully migrated from the old systems to the new LoyaltyPlus platform, and all core Wild Card loyalty operations are run on the LoyaltyPlus platform. The new, advanced and more sophisticated points-based programme will also be implemented on the LoyaltyPlus loyalty solution.

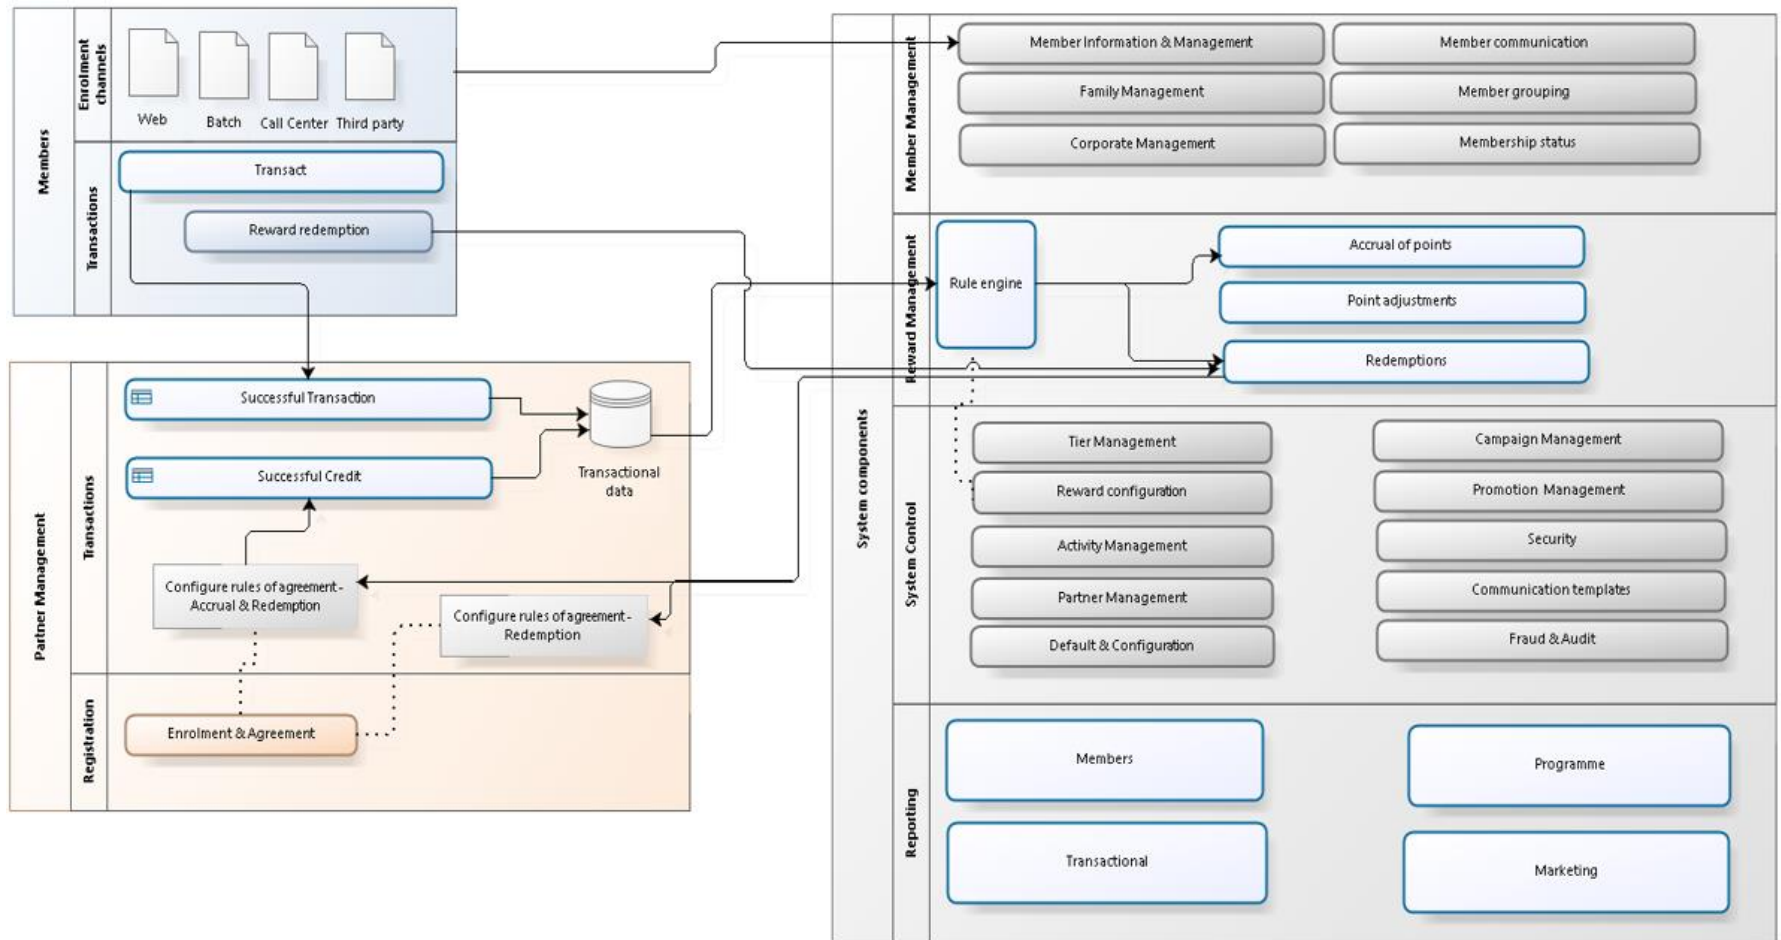

SANParks is seeking to appoint a suitably qualified and experienced vendor to support and maintain the LoyaltyPlus solution for the current Wild Card and the new loyalty programme which is currently undergoing implementation.

THE LOYALTYPLUS SOFTWARE SOLUTION

Architecture & Hosting

The LoyaltyPlus solution is cloud based and 100% web based. The solution is designed on a Java three tier web architecture with a webserver, application server and a database at the backend. New application components are developed in a java services-oriented architecture in order to be for container-based development and production environments. There is a dedicated integration layer to handle various API calls and to act as a central point for integration as opposed to going directly to the application servers. The solution also makes use of message queues where required.

The hosting platform is built on various virtual machines that are managed on dedicated hardware in a data centre in Europe. The product runs on mostly Java and Oracle on Linux operating systems.

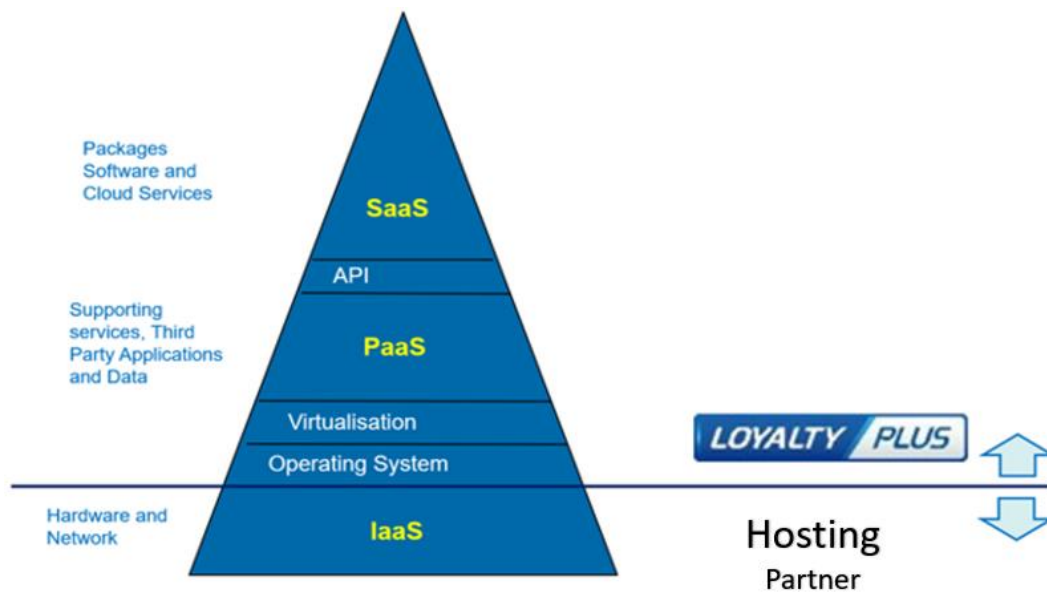

Figure 3 - Overview of LoyaltyPlus hosting

System Integration & Communication Protocols

The LoyaltyPlus application is able to integrate to many external programs using different protocols to communicate with each program. The program also has numerous API calls as part of the standard program for any external program to use.

The available messaging protocols include:

- SOAP over HTTP/HTTPS – Used mostly for online profile modifications and integration with external programs for real-time transactions;
- JSON over HTTP/HTTPS – A different format than SOAP, used mostly for the same purposes;
- CSV/TXT over FTP/SFTP/EMAIL – Used mostly for bulk transaction loads;
- HTTP/HTTPS post and re-direct – used mainly for payment gateways;
- EDIFACT or MQ – where applicable, used for reservation data update.

User Management

The system works on the web for users and is able to integrate via web services or files for third party integration and data exchange. To access the front-end, a normal browser such as Chrome or Firefox may be used. Users are issued licenses according to and allocated role-based access to application components and standard or personalised CRUD (create, read, update, delete) privileges.

Support and Maintenance

The cloud-based solution is mainly supported and maintained remotely.
