

NOTICE TO TENDERERS NO: 1

Pages 2

TENDER NUMBER: 195S/2025/26

DESCRIPTION: CHEMICAL AND MECHANICAL CLEANING SERVICES OF DEEP PRODUCTION AND MONITORING BOREHOLES: TABLE MOUNTAIN GROUP AQUIFER WELLFIELDS, CITY OF CAPE TOWN

CLOSING DATE: 07 May 2026

BOX NUMBER: 207

Dear Sir/Madam

Your attention is specifically drawn to the following clarifications and amendments which are to be made to the Tender Document for the above tender, in terms of tender clause 2.3.2 (Issue Addenda) – Page 17.

Tenderers should take note of the following:

1. CLARIFICATION TO TENDER DOCUMENT

Question/Query	Answer
We kindly request guidance from the Supply Chain Management team regarding the expected volume of wastewater that would need to be managed and disposed of during the borehole rehabilitation process. Specifically, could you provide an indication or typical range of wastewater volumes that may be generated from the rehabilitation of the deeper boreholes at Steenbras, particularly those in the order of approximately 1,000 m depth? This information is required to accurately make provision for the safe handling, transport, and disposal of wastewater via a registered waste service provider (e.g. EnviroServ or similar licensed carrier) to an approved wastewater treatment facility. Any available historical data, estimates, or guidelines would be greatly appreciated to assist in compiling a realistic and compliant cost provision.	Refer to Schedule of Rates. New line item added for removal, transport and safe disposal of wastewater. Contractor to be reimbursed per cubic metre of wastewater extracted and disposed of.
Will a designated laydown area and/or site camp area be provided to the contractor by the City for the duration of the works	Yes, at Steenbras TMGA Wellfield/Catchment. Contractor to make provision for all amenities and services required at the lay down area/site camp. Site housing/accommodation is not permitted.
As there are multiple work areas for the tender, we also want to clarify if nearby laydown or camp areas be allocated for each work location?	Refer above, laydown area/site camp provided at Steenbras TMGA Wellfield for the duration of the contract and a work area will be provided at each borehole site for the duration of the work being undertaken at the work area. Contractor to make provision for all amenities and services required at each work site. Site housing/accommodation is not permitted.

If a laydown area will not be provided by the City, is the contractor expected to source and establish their own site camp area independently?	Refer above, laydown area/site camp provided at Steenbras TMGA Wellfield for the duration of the contract and a work area will be provided at each borehole site for the duration of the work being undertaken at the work area. Contractor to make provision for all amenities and services required at each work site. Site housing/accommodation is not permitted.
