TERMS OF REFERENCE FOR THE APPOINTMENT OF SERVICE PROVIDER FOR OUTRIGHT PURCHASE OF ENTERPRISE ENGINEERED IT INFRASTRUCTURE WITH 60-MONTHS SUPPORT AND MAINTENANCE FOR THE DEEDS REGISTRATION TRADING ENTITY

1. INTRODUCTION

The Deeds Registration Trading Entity (DRTE) under the Department of Land Reform and Rural Development (DLRRD), as custodians of one of the nation's most valuable assets—the property and land register—has a mission to "Provide security of title through the registration of real rights in land." To achieve this objective, the vision is "Providing a world-class deeds and secure land registration system." This responsibility requires DRTE to implement time- and mission-critical, robust hardware, software, networks, and storage infrastructure. This will ensure that DRTE provides high-performance digital platforms, systems, and ICT environments that guarantee 100% system availability and stability across the eleven deeds registries. Failure to meet this critical requirement may result in litigation, possible land/property displacements, and financial and reputational damage not only for the entity but for the country as a whole.

2. BACKGROUND

The entity is embarking on this critical and strategic project to address the system and technological challenges in the current DRTE ICT environment. The existing infrastructure is out of warranty and has reached end-of-life, meaning that some spare equipment are no longer available in the market, and support is limited from vendors/suppliers. One of the biggest challenges facing DRTE is the instability of the infrastructure when the ZFS storage performs data scrubbing, causing systems and applications to become slow or unresponsive. The repercussions of these problems include prolonged system downtimes, degraded system and

TERMS OF REFERENCE (TOR) FOR THE OUTRIGHT PURCHASE OF ENTERPRISE ENGINEERED IT INFRASTRUCTURE WITH 60-MONTHS SUPPORT AND MAINTENANCE FOR THE DEEDS REGISTRATION TRADING ENTITY

application performance, frustrations from users and clients due to slow and unresponsive systems and applications, loss of productivity in daily operations, loss of revenue for the entity and its broad client base (government departments, parastatals, entities, municipalities, conveyancers, notaries, banks, data vendors, general public, etc.), and thus an inability to fully serve the public timeously, efficiently, and reliably.

3. OBJECTIVES

To meet its mandate, strategic objectives, mission, and vision, DRTE requires the procurement and deployment of robust, high-performance Enterprise Engineered Systems to replace outdated and legacy infrastructure with new, modernized, and highly performant core ICT infrastructure, platforms, and systems. The solution will support mission-critical applications, enable scalable storage and compute capacity, and ensure highly available and redundant systems. It will provide DRTE with the ability and capacity to not only establish a Disaster Recovery (DR) environment or site but also ensure the DR environment or site is a "hot" DR site instead of a "passive" site. Therefore, a credible, reputable, and experienced service provider with a high level of expertise in implementing and rolling out robust, high-performance Enterprise Engineered Systems is required.

The project objectives shall include, but not limited to, the following high-level functionality and/or requirements:

- Replace the current legacy, out-of-warranty core infrastructure stack.
- Supply a full stack and compatible solution with a duplicate DR site having the same specifications and design as the production environment.
- Provide a solution/architecture design diagram as part of the solution design proposal.
- Ensure the solution consolidates and optimizes storage and compute resources, enhances data backup, recovery, and security capabilities.

- Specific goals (maximum 20 points)

9.2 The following formula will be used to calculate the points for price:

$$P_s = 80 (1 - (P_t - P_{min}) / P_{min})$$

Where:

- P_s = Points scored for the comparative price of the bid under consideration
- P_t = Comparative price of bid under consideration
- P_{min} = Comparative price of the lowest acceptable bid
