

Upright Freezer (biomedical):

1. >450 litre capacity
2. Temperature control system with digital LED temperature display, 0.1 accuracy
3. Temperature: -20-40°C range
4. The digital display show freezer work condition and alarm code, easy to know freezer status
5. Audible and visible alarm system for safe sample storage i.e. High temperature alarm, Low temperature alarm, Sensor failure alarm, Door ajar alarm, Power failure alarm, Low battery alarm, Hot condenser alarm
6. 3 sensors for cooling, real-time display, and ambient temperature display
7. Built-in USB interface enables users to download the historical temperature data
8. The wheels must be durable, non-marking, and equipped with locking mechanisms with minimal floor imprints, and allow for easier rolling on hard or uneven lab floors.
