- 1.3. Where necessary, for bids referred to in paragraph 1.2 above, a two stage bidding process may be followed, where the first stage involves a minimum threshold for local production and content and the second stage price and B-BBEE.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

Details

1. Machine Frame

Machine body constructed by high tensile strength steel, towards best finish by advance welding with robots, further underdone with heat treatment, finally completed by CNC 5-axis milling to perfect precision, to ensure its highest quality and durability.

2. Professional assembly line

Assembly is final and important step for better machine performance, Nanxing's professional assembly lines from machine body to small electrical components were by experienced technicians that guarantee machine standardization and performance.

3. Quality control

Advanced measuring equipment and strict QC system also help to make sure the final machine we offer to our customers are of high quality.

4. Steel table plate

High stiffness steel plate with long service life, precision up to $\pm 0.03\text{mm}$, reducing the maintenance costs.

5. Air float feed table

Full of air steel on table surface with a fan ensure a constant ease of panel stacks movement, the black table plate is rigid and wear proof for longer service life.

Separate 3 pipes connected to 3 float tables with q 2.2kw air blower beneath the table supplies sufficient air. Flow rate: 5.2m/min

6. Side operation rod

An extra operating rod on side guarantees the continuous cutting, operator could start the cutting without approaching the IPC in the process.

7. Pressure beam

Pressure beam automatically self-adjusted according to the total height of panels, to shorten the travel range, hence higher efficiency.

Single pressure beam makes evenly pressure applied on the whole work piece surface, increase the pressure apparently, thus reduce the chipping of work piece edge.

Movement of pressure beam by precise rack and pinion on both sides.

8. Hand protector

A protective device will fall down before cutting, and rise after cutting, machine would stop emergently if there is something underneath, that keeps operators from hurt.

9. Piano dust cover

Piano type dust cover provides a completely enclosed blade guard and prevents flying dust and chips.

10. Slide alignment

Device fixed within saw carriage to push from side of board when running to cut, even for thin and soft board, at the same time to guide alignment for perfect square cut.

11. Gripper

Firm joist steel supporter on both sides, precise positioning.

Pneumatically controlled 9 grippers (standard configuration); Option with 13 pcs grasp work piece tightly without displacement during feeding, improving cutting precision effectively.

Accurate and smooth movement of feeding unit is ensured by 2kw servo motor and long rack and pinion on both sides. Gear box with Germany brand.

12. Anti-dropping device

The design prevents saw carriage from struck due to small work piece dropping, hence guarantees the stable working of saw carriage.

13. Saw unit

Saw carriage by 2kw servo motor along rack and pinion, automatically moved to fit based on the width of panel, reduces travel distance. Max forward speed up to 90m/min, backward speed up to 120m/min.

Both main saw and scoring saw with independent movements of up and down, also main saw automatically self-adjusted minimizing the lifting height for efficiency besides making best finish. Guiding rail with Germany brand for better stability.

Quick exchange of main saw blade, ideal design for operator.

14. Dust collection

Reduce flying chips and dust, convenient working condition contribute to extend service life. 150mm*3.

15. Automatic lubrication system

The Automatic lubrication system greases the main components automatically that reduces the need of maintenance by operators.

16. Machine control

User-friendly HMI IPC coordinated with USB interface, network card, mouse and keyboard for easy operation; Chinese and English are available.

Controlled by PLC Windows operating system and Nangxing's professional computer saw cutting software.

17. Optimizing software NX Pareto

Professional optimizing software equipped within machine for high handling efficiency and convenient operation, other worldwide popular software also possible to be applied.

18. Operation software

Powerful software so easy to use, including managing the work process with detailed reports, simulating cutting patterns, showing any error message, printing bar code and many more advantages, also user friendly HMI, making whole machine much reliable.

Additional function for re-work of any particular piece (scanner optional), a good helper for customized furniture production, complete solved problem raised from possible setting mistakes and occasional errors caused by operator.

19. Control cabinet

Most of electric components of the machine are international brand for high quality and generality.
