1. INTRODUCTION

The South African Local Government Association (SALGA) is a public entity established by the Organised Local Government Act (Act 52 of 1997) to assist in the comprehensive transformation of local government in South Africa. SALGA is managed within the framework of the Public Finance Management Act (Act 1 of 1999) and is listed as a schedule 3A public entity. Its main objectives are to:

- Represent, promote, and protect the interests of local government.
- Transform local government to enable it to fulfil its developmental role.
- Enhance the role and status of its members as provincial representatives and consultative bodies of local government.
- Enhance the role and status of municipalities.
- Be recognised by national and provincial governments to be the representative and consultative body in respect of all matters concerning local government and to make representations to both provincial and national governments in respect of any matter concerning local government.
- Ensure the full participation of women in organised local government.
- Be the National Employers' Organisation representing all municipal members and, by agreement, associate members.

2. SALGA MANDATE

Developmental Local Government is an essential component of the machinery of government. Under its constitutional mandate, SALGA is obliged to transform the local government sector into one that has the required capacity to make a meaningful contribution to poverty alleviation, economic development, and all socio-economic opportunities that the state has geared itself to provide for its people. SALGA also serves as the representative voice of all 257 municipalities in the country. For the past 25 years, since its establishment, SALGA has endeavoured to bring focus to its mandate of supporting local government transformation in a complex environment, characterised by a highly diverse and diffuse membership base of municipalities. In terms of its amended Constitution, SALGA is a unitary body that consists of a national association and nine provincial offices. Its mandate rests on six primary pillars:

- (1) Representation, Advocacy, and Lobbying refer to representing the interests of members in legislatures and other policymaking and oversight structures. It also refers to engaging with various stakeholders, public debates, etc. in the interest of Local Government.
- (2) Employer Body refers to being an effective employer representative for members. Employer representation is carried out through collective bargaining (in terms of the Labour Relations Act) in various structures including but not limited to those established in the South African Local Government Bargaining Council.
- (3) Capacity Building refers to facilitating capacity-building initiatives through among others, representing member interests in the Local Government Sector Education Authority (LGSETA). SALGA strives to facilitate a coherent, well-coordinated capacity- building programme for municipal councillors and officials.
- (4) Support and Advice refer to the provision of tools and services that enable municipalities to understand and interpret trends, policies, and legislation affecting Local Government and to implement the said policies and plans.
- (5) Strategic Profiling of Local Government refers to enhancing the profile and image of local government as an important and credible agent for the delivery of services. Profiling focuses on South Africa, the African continent, and the rest of the world.
- (6) Knowledge and Information Sharing refers to building and sharing a comprehensive hub of Local Government knowledge and intelligence that will enable informed delivery of other SALGA mandates. The knowledge hub is also a useful reference point for all who seek Local Government information.

Diagrammatically the mandate is depicted as follows:

3. PURPOSE

The purpose of this request for proposals is to obtain suitable office accommodation around the Pretoria business area for the SALGA National Office to lease for five years.

4. BACKGROUND

SALGA recognises that if it is to realise its vision, it must nurture and constantly develop its winning formulae- a combination of service excellence, quality, participative management, and empowerment. The organisation also realises that this will only be achieved if it continues to value and care for its member municipalities and takes the management of employee issues and risks in the organisation seriously. It is upon this background that a need for new offices was identified and that is the reason why the organisation is embarking on this procurement process.

5. DISCUSSION

SALGA National office requires approximately 3000 (three thousand) square meters (m2) - 3200 SQM (three thousand two hundred) square meters (m2). This Bid was created in response to and in dialogue with SALGA'S drive to position the organisation as thought leader in the sustainability space and our commitment to refresh and strengthen our organisational culture by creating a unique working environment that supports and enables Hybrid ways of working, staff togetherness, collaboration and brand philosophy. The new building should provide numerous benefits that align with our vision to offer:

- o **Thought Leadership:** Positioning ourselves as leaders in sustainability and enhancing our employer brand while setting example for the sector.
- o **Quality Work Environment:** Creating a modern, flexible workspace that fosters collaboration and productivity.
- o **Sustainable Benefits** of Green star rated building: Improving air quality, natural light, and overall workplace well-being.
- o **Cultural Refresh:** Leveraging the move as an opportunity for cultural change and effective change management.
- o **Talent Sustainability:** Supporting our efforts to attract, retain, and invest in talent through a holistic approach to employee satisfaction and well-being.

6. TYPE OF PREMISES

For logistical reasons the office accommodation should not be more than 7 kilometre radius from the current office that SALGA rents in Menlyn Pretoria. The building should be a certified green or sustainable building with a minimum 4 star rating as per the Green Building Council Green Star rating tool. The organisation is looking for a completed modern building or a building that would be ready within a period of 11 months being the expiry period on its current lease.

practice

- o Interior Lighting SABS 0114:1996 - Part I
- The National Building Regulations and Building Standards Acts 1977 (Act 103 of 1977) as amended (SANS 0040)
- o The Municipal by-laws and any special requirements of the local supply authority
- o The local fire regulations
- o The Promotion of Equality and Prevention of Unfair Discrimination Act 4 of 2000.
- o The building must comply with strategies that underpin the government green building Policy. According to the DPW Green Building Framework and Policy - The concept of green buildings, sustainable buildings, or sustainable construction is broad – but it is generally viewed as the building structure and the construction process that is environmentally responsible and resource-efficient throughout the whole life-cycle of the building, from inception and design, through the operation, maintenance and refurbishment of the buildings, and through to deconstruction of the buildings.
- o A similar definition by the Green Building Council of South Africa recognises that: green building incorporates design, construction and operational practices that significantly reduce or eliminate the negative impact of development on the environment and people. Green buildings are energy efficient, resource efficient and environmentally responsible. In general, the largest impact on life-cycle decisions impacting on green buildings is made at the planning and design phase of a building – and hence it is important that the design of a building reflects the desirable sustainability norms, standards and best practices. Key to this is green building codes of practice, green building rating tools and energy efficiency standards, etc. In this regard, international practice is now recognising and promoting a „Deep Path“ transformational change agenda to enabling an 80% global reduction of thermal energy demand from buildings by 2050. Key to this is:
 - net-zero energy buildings (nZEB);
 - increasing stringency and compliance with building energy codes such as the Green Building council specifications and rating system (www.gbcsa.org.za) ;
 - deep retrofitting of existing buildings;
 - mandatory disclosure of energy performance; and integrated renewables.
- For the purposes of this bid the Green Star SA internationally recognised, localised sustainability rating and certification system offers the ideal benchmark. There are four Green Star SA rating tools, these provide a means of certification for building design

and construction, operation, fit-outs, and communities. Independent assessors are employed to evaluate submissions and allocate points based on the green measures that have been implemented. Certification is awarded for 4-Star (Best Practice), 5- Star (South African Excellence), or 6-Star (World Leadership) Green Star SA ratings, based on the number of points a project achieves.

- 4 Star Green Star SA certification– reflects a Best Practice in construction. It builds on the Minimum Expectations to deliver a building that is either climate-positive or a higher performer in energy, water, emissions reduction, and health-related issues. Some notable benefits of a Green Star SA-certified building include;
- Improved health and well-being of building occupants - features such as better ventilation and the use of non-toxic materials contribute to a healthier indoor environment.
- Occupant comfort and employee retention - Design elements that address temperature control, lighting, and acoustics improve overall occupant comfort, productivity, and ultimately employee retention.
- Economic Benefits – certified buildings are designed and operated to be energy and water- efficient, leading to lower utility bills, and offering long-term cost savings for owners and tenants.
- Regulatory compliance and advantages – Green Star SA-certified buildings often exceed local regulations and sustainability standards, simplifying compliance with future regulations.
- Reputation and Market Positioning – occupying a 4 Star Green Star SA-rated building helps position an organisation as a leader in sustainability, enhancing the reputation of the owner and tenant.

Occupancy certification

All occupancy certificate within a reasonable period upon completion of all building and installation works. Until such time as certificates are provided the landlord will accept full liability for any claims against or damages suffer by the tenant due to the absence of the said certificates and approvals. Certificates proving compliance with the regulations shall be provided before occupation.

1. Bidders must submit the photographic portfolio of the building with high-level space planning indicating that the accommodation needs of SALGA can be

accommodated. The focus here is on Hybrid ways of working that promote collaboration and togetherness. It will be required that each proposal of the bid be submitted with a project plan of how the task will be achieved- this will include time frames, work breakdown structure and risks.

2. All Compliance Certificates (Electrical & Plumbing; Fire; Structural and OHS) shall be submitted as part of the proposal. For buildings that are still under construction such information can be projected based on the planned execution in this regard and standards set.
