SECTION E**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

SPECIFICATIONS

Surge Voltage Generator

1. Name of the equipment to be procured

- H.V. Surge Generator 16 kV (Cable Fault Locating Equipment) which includes Clamp Meter, High Voltage Probe, digital meter and listening set

2. Service conditions

The equipment shall be capable of satisfactory operation under the following climatic conditions:

- Altitude : 0 – 1800m above sea level
- Ambient Temperature : 10° C to 50° C
- Relative Humidity : 0% to 100%

3. Scope

This tender calls for the supply and delivery of Cable Fault Locating Equipment set for PVC, XLPE and PAPER Cable.

4. Specification

The set shall consist of the following equipment:

4.1.1. Surge Voltage Generator

The high voltage surge generator shall be self – contained and adequately insulated without exposed or unshielded live parts which may endanger the safety of the operating personnel.

The generator shall operate on the surge voltage method where a high voltage capacitor is charged by means of a DC voltage and where these capacitors are discharged via an electromagnetical contractor into the cables. During capacitor selection the H.T. contractor shall be interlocked in the OFF position. This contractor shall be adequately shield so as not to endanger the operator and be suitable interlocked to prevent accidental contact with the H.V. parts. The contractor shall be protected by a ceramic heat shield and the contacts shall be tungsten tipped to withstand stress. The capacitors shall be in a steel case with porcelain adequately rated for voltage.

The generator shall automatically discharge via a H.V. resistor when switched OFF. With power failure the direct earthing shall be done by gravity fail to safety. The output voltage shall be selectable in three steps 3/6/12V or 4/8/16kV. Within each of these steps, it shall be possible to preselect the surge capacity with 56% to 100% of the range. The voltage shall be zero interlocked to avoid a high voltage being applied with switch-on. Instrumentation and metering shall be so designed to fail to safety. Under no circumstances should it be possible for the instruments to be left at a dangerously high voltage due to open circuit – thus endangering the operator.

The generator shall be mounted in a 19 inch rack mount sheet steel housing, with rugged portable handles and easily carried by two operators. (Maximum weight, 50kgs). Maximum dimensions shall be 520 x 290 x 400 mm. The equipment shall be suitable for mounting in a trailer (supplied by others)

The H.T. coaxial cable specified in the accessories below shall be connected via a special H.V. connection box on the surge generator. The door of this connection box shall be interlocked with the H.T. supply to prevent accident H.T. energising whilst the operator is connecting up the cable.

The ease of operation, portability and safety shall have a very high preference in adjudicating this tender.

The surge voltage generator shall meet the following requirements:

Surge Capacity	560 watt seconds	
Surge Voltage Output	56 %	100 %

3. APPLICATION

3.1 Features:

- Fast and precise cable fault pin-pointing
- Unique operating convenience thanks to wireless Bluetooth® connections
- Precise 3D user guidance to the fault
- Excellent acoustic quality and range
- Saves time thanks to use of cable route data and the pre-located fault position from the Fault Location App*

3.2 Measuring methods:

The pin-pointing system is used for the precise pin-pointing of cable and cable sheath faults. Combining acoustic and electromagnetic fault pin-pointing with sheath fault location in one system, it is ideal for universal application.

Thanks to the use of the latest technologies, locating the exact fault position with the unit is extremely fast and precise. The innovative two-level signal processing concept permits a high degree of sensitivity and accuracy, and maximum suppression of ambient noise.

The prepared measurement data is sent directly to the headphones and the control unit via Bluetooth®. The wireless connection ensures greater convenience and freedom of movement and dispenses with the need for cumbersome cables.

The measurement parameters are set automatically depending upon the environmental conditions. As a result, and thanks to the intuitive operation of the capacitive touchscreen, working with the protrac® is extremely simple and convenient.

3.3 Functions

- Acoustic and magnetic pin-pointing of cable faults
- Pin-pointing of cable sheath faults and faults due to earth contact using the step voltage method
