FOR DETAILS; REFER TO: (DETAILED TECHNICAL EVALUATION CRITERIA) ATTACHED.

Respondents are to note that Transnet will round off final technical scores to the nearest 2 (two) decimal places for the purposes of determining whether the technical threshold has been met.

***The minimum threshold for technical/functionality [Step Three] must be met or exceeded for a Respondent's Proposal to progress to Step Four for final evaluation***

#### 1.4 STEP FOUR: Evaluation and Final Weighted Scoring

a) **Price Criteria** [Weighted score 80 points]:

| Evaluation Criteria | RFP Reference    |
|---------------------|------------------|
| • Commercial offer  | <i>Section 4</i> |

Transnet will utilise the following formula in its evaluation of Price:

$$P_s = 80 \left( 1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where:

$P_s$  = Score for the Bid under consideration

$P_t$  = Price of Bid under consideration

$P_{\min}$  = Price of lowest acceptable Bid

- b) **Broad-Based Black Economic Empowerment criteria** [Weighted score 20 points]
- B-BBEE - current scorecard / B-BBEE Preference Points Claims Form
  - Preference points will be awarded to a bidder for attaining the B-BBEE status level of contribution in accordance with the table indicated in B-BBEE Preference Points Claim Form.

### 1.5 STEP FIVE: Post Tender Negotiations (if applicable)

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
  - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
  - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

### 1.6 STEP SIX: Objective Criteria (if applicable)

Transnet reserves the right to award the business to the highest scoring bidder/s unless objective criteria justify the award to another bidder. The objective criteria Transnet may apply in this bid process include:

- Geographical location;
- all Risks identified during a risk assessment exercise/probity check (which may be conducted by an authorised third party) that would be done to assess all risks, including but not limited to:
  - the financial stability of the bidder based on key ratio analysis, which would include, but not be limited to Efficiency, Profitability, Financial Risk, Liquidity, Acid Test, and Solvency;
  - a due diligence to assess functional capability and capacity. This could include a site visit;
  - A commercial relationship with a Domestic Prominent Influential Person (DPIP) or Foreign Prominent Public Official (FPPO) or an entity of which such person or official is the beneficial owner; and
  - Reputational and Brand risks

### 1.7 STEP SEVEN: Award of business and conclusion of contract

- Immediately after approval to award the contract has been received, the successful or preferred bidder(s) will be informed of the acceptance of his/their Quotation by way of a Letter of Award. Thereafter the final contract will be concluded with the successful Respondent(s).
- Otherwise, a final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.

## 2 Validity Period

Transnet requires a validity period of 90 Business Days from the closing date of this RFQ, excluding the first day and including the last day.

Bidders are to note that they may be requested to extend the validity period of their bid, on the same terms and conditions, if the internal evaluation process has not been finalised within the validity period. However, once the adjudication body has approved the process and award of the business to the successful bidder(s), the validity of the successful bidder(s)' bid will be deemed to remain valid until a final contract has been concluded.

### **3. BACKGROUND**

Transnet National Ports Authority (TNPA) is responsible for the provision and maintenance of the required resources, to ensure a safe working environment that minimizes the risk to the health and safety of personnel, property, and equipment of both TNPA and its clients.

The Port of East London currently has a breakwater crane located on the Southern Breakwater structure along the Entrance Channel of the Port as shown in Figure 1 below. The crane is owned and operated by Transnet National Ports Authority (TNPA) and is used for maintenance of the breakwater, by manufacturing and placing concrete dolosse periodically. Maintenance of the breakwater ensures the protection of Port infrastructure and safe vessel navigation, by minimizing wave action within the Port.

The breakwater crane is docked along the Breakwater (Figure 1) and is used to assemble and disassemble the steel moulds for on-site casting of concrete dolosse and collects and transports the casted dolosse to be placed along the main breakwater at the Port. The crane runs along railway lines that are cast into the concrete superstructure of the Breakwater structure, on top of a purpose-laid concrete foundation beam. The length of the crane rails is approximately 1 km on both sides of the crane wheels. However, the existing breakwater crane has not been operational since 2018, thus the Port has not been able to complete maintenance along the breakwater since 2018, which poses a major risk to the integrity of the structure and the Port.

The crane had undergone refurbishments in 2010, to extend the life of the crane by 20 to 30 years, given that the crane was originally docked at the PoEL in 1980. The refurbishments undergone in 2010 are summarised in Table 1 below.

#### **4. SITUATION ASSESSMENT**

The existing breakwater crane at the Port of East London is a hammerhead crane, which is more than 40 years old. The operational lifespan of a breakwater crane is usually between 30 and 50 years, with routine maintenance being undertaken timeously. The current breakwater crane used at the Port of East London has reached a condition where it poses an operational and safety risk.

The crane underwent a major overhaul in 2010, however, due to extensive cable theft and damage to the 4 drive motors, the crane has not been able to function adequately to date. The damage has resulted in the replacement of the complete electronic system (up to the control module) being required.

In 2018, the engine experienced severe fire damage, and although attempts to repair the crane was made, it remains inoperable to date. Recently, the motor drives were serviced and repainted by the Port's Engineering Maintenance Department (EMD). However, the engine still does not start and causes the starter to overheat and drain the battery.

From September 2019 to March 2020, the crane underwent an external refurbishment which was limited to sandblasting and painting. The external condition of the current crane post-refurbishment in the 2019/2020 financial year (FY) is illustrated in Figure 2 below. Figures 3, 4, and 5 depict the current external conditions of the crane while Table 2 depicts the current specification of the crane.

The railway was replaced during the 2017/18 and 2018/19 FYs costing approximately R 14.1 million but due to the rail's exposure to the corrosive sea environment and poor drainage along the breakwater, the rails have deteriorated substantially since then. The condition of the rail is depicted in Figures 6, 7, and 8.

## 5. PROBLEM STATEMENT

The breakwater crane and rail are an integral resource to the Port of East London's asset maintenance plans, to minimize risks posed to the health and safety of personnel, property, and equipment, of both TNPA and its clients.

The crane has been in operation for more than 40 years but since the 2017/18 FY, it has become inoperable. The Port has required the placement of dolosse since the 2019/20 FY, and over the past 3 years, the breakwater crane has been unable to provide an adequate level of reliability, as it has been operating with limited capacity, while experiencing continuous acts of theft, damage, and vandalism.

The current breakwater crane does not only pose operational limitations, but external factors based on the permanent location of the crane, impact Port operations severely. These factors include continuous exposure to coastal weather conditions which accelerates corrosion and acts of theft and vandalism to the crane caused by trespassers.

It is thus essential that the crane is operational so that the breakwater can be maintained regularly thus ensuring that vessels are not under attack by strong winds and currents within the Harbour. Thereby, ensuring that the breakwater fulfils its purpose in providing safe navigable areas to support Port operations.

TNPA, therefore, requires a Service Provider to conduct a detailed and full inspection (Condition Assessment) of the breakwater crane and rail as per the deliverables discussed in Section 6.

## **6. DELIVERABLES OF THE TECHNICAL STUDIES**

The successful bidder will be expected to carry out a full and detailed inspection (Condition Assessment) of the Breakwater Crane at the PoEL. The scope of work is detailed below:

A detailed assessment of all current information available to TNPA, including drawings, specifications wiring diagrams and any maintenance.

### **i. Condition Assessment**

- A detailed inspection of mechanical parts including but not limited to gears, slewing rings, couplings, wheels, sheaves, winding drums, lifting wires, hooks, shafts, and where possible bearings.
- A detailed inspection of structural components including but not limited to support structures, boom, drive support, and cab structure.
- A detailed inspection of electrical components including but not limited to electric motors, drive and control systems including all crane controls, power supply, and overall crane lighting.
- A detailed inspection of safety-related components including but not limited to ergonomics, compliance with health and safety regulations, including General Safety Regulations, Occupational Health and Safety Act and Regulations (OHS Act No. 85 of 1993), General Machinery Regulations, Driven Machinery Regulations (DMR), South African National Standards (SANS) Codes, and Electrical Machinery and Installation Regulations.
- Non-destructive tests shall be undertaken for all structural components and selected mechanical components such as gears, shafts, sheaves, wheels, and winging drums.
- A detailed inspection of the Breakwater railway including but not limited to the rail, bolts, and concrete. The rail is cast in concrete and is approximately 1 km in length.

**ii. Remaining Operation Life Span**

- Based on the inspections listed above, an estimate of the remaining operational life span should be calculated given the current condition of the crane and rail.

**iii. Cost of Corrective Measures (Repairs, Replacement, Maintenance)**

- Based on the inspections listed above, an estimate to return the crane and rail to an acceptable standard (Rectification works), in line with the Occupational Health and Safety Act for a period of the estimated remaining operational life span (as established by the Service Provider under Section ii) should be estimated. The cost estimate should be broken down into various elements, including structural, electrical, mechanical, and control and safety requirements. The elements should be further defined into sub-elements such as drive systems, support structure, cab, boom, and slewing drive.
- Given the cost of refurbishment of the crane and rail and the estimated life span, a detailed estimate for annual maintenance to ensure continued service for the remaining life should be estimated. The costs should be split between those costs to refurbish the crane and those costs that will be incurred for ongoing maintenance costs. The Condition Assessment with associated costs to refurbish the crane to obtain the estimated remaining operation life span (as established by the Service Provider under Section ii) should be submitted in the form of a detailed report including non-destructive test results, inspection photos, and any other information that may be applicable. In cases where the crane is past the refurbishment state, an estimate for the removal and scrap value should be included.
- A detailed cost estimate should be provided for the following options available, along with the associated maintenance costs:
  - To purchase a new crane;
  - To hire a new crane;
  - To refurbish the crane;
  - To refurbish the rail; and

- To upgrade the capacity of the crane as depicted in Table 3 below.

**Table 3: Current Crane capacity vs Proposed Crane Capacity**

| <b>Specification</b>                | <b>Current capacity</b> | <b>Proposed capacity</b>                                   |
|-------------------------------------|-------------------------|------------------------------------------------------------|
| Lifting Capacity (At maximum reach) | 18 ton (19 ton/dolos)   | 20 ton                                                     |
| Safe Working Load (SWL)             | 20 ton                  | 22 ton                                                     |
| Reach                               | 25 m                    | Max allowable as per the Service Providers recommendation. |

#### **iv. Report**

- A detailed technical report should be compiled documenting all information requested in Sections i, ii, and iii detailing all findings and recommendations made when undertaking the inspections as specified in Section i.

In addition to the above, the bidders are required to submit the following:

- A detailed program indicating activities that will be undertaken to achieve the required deliverables, including but not limited to, inspections, report writing, and cost estimation.
- A detailed list of staff allocated to the work described above. To do this, the bidder should submit detailed CVs of all the key personnel to be employed for the duration of this work.
- The winning bidder will be required to submit a comprehensive SHE File to TNPA SHEQ department for approvals before the commencement of work.
- A skills transfer report which details the methodology in which knowledge and skills will be shared and should indicate the elements of the work that would be included in the transfer of skills.

## **7. DATA PROVIDED BY THE CLIENT**

The client shall provide information as required or requested to further their understanding of the work required. Required information on the Breakwater crane, which is in the client's possession, will be made available to the Service Provider.

## **8. OUTCOMES**

The deliverables stated under Section 6 of this report will feed into the maintenance and development plan of the Port. Risks associated with possible delays should be highlighted and the impact flagged as part of the outcomes to ensure that the Client is aware, and decision-making is made timeously.

## **9. PRESENTATION OF KEY DELIVERABLES**

Upon the completion of the work stated under Section 5 of this report, the Service Provider is required to inform the TNPA Project Team so that the completed Condition Assessment Report may be reviewed. Upon satisfactory requirements being met as stipulated by the Client, the project will then be closed. It is also expected that the Service Provider has at least one (1) progress meeting with the TNPA project team to assess the project progress and ensure alignment.

## **10. SKILLS TRANSFER**

Transnet is highly dedicated to training internal engineers and has made it a requirement that all external engineering contractors be willing to share their skills and knowledge. This initiative is to ensure that internal capacity is built. It is expected that the Service Provider responsible for the work shall work with a Transnet Engineer throughout the period of the contract.

## 11. PRELIMINARY MILESTONES

The bidder should be aware of the following preliminary milestones as listed in Table 4.

**Table 4: Preliminary Milestones**

| <b>Milestone Description</b> | <b>Timeline</b>                                            |
