25. GEOGRAPHIC INFORMATION SYSTEM (GIS) SPECIFICATION

25.1 GENERAL DESCRIPTION OF SERVICE

The Tenderer will employ a GIS in a supportive role to:

- Identify and describe the cadastral boundaries of each property within the municipal area;
- Guide Valuation Inspectorate to the sites to be inspected;
- Balance the properties of the municipal area with the entries registered in the Deeds Office as well as the Surveyor-General;
- Display geo-referenced aerial photographs of the area so as to provide the Valuer with a clear picture of the subject properties;
- Maintain the cadastral data during the maintenance period so as to reflect the properties contained in the valuation roll at all times.

25.2 GIS DATA STANDARDS

The following minimum standards will apply in respect of the GIS data format and compatibility:

- Cadastral data to be available in geographic coordinates on the WGS84 datum;
- The sizes of cadastral entities represented by means of the GIS, shall match the registered size of such properties, subject to a deviation of acceptable tolerance;
- A copy of all aerial photography used by Tenderer will be provided to Municipality in either electronic and/or hard copy versions, 30 (thirty) days after submission of the certified valuation roll;
- As a guide line where no spatial data base representing footprints of buildings is available, older aerial photographs which are more economical to obtain can be used. However, where aerial photographs are required to detect changes in the data from year to year, only new photographs can be used.
- Despite the age of the aerial photography used in the valuation process, it remains the responsibility of the Tenderer to ensure that the data reflected on the valuation roll is an accurate and true reflection as at date of valuation of what is found on the properties comprising the roll. Tenderers must therefore use ground control measures to verify and confirm the results obtained from aerial photography.
- The GIS shall be fully compatible with the Tenderers valuation system. As well as being compatible with the municipal system.
