SECTION 2

BACKGROUND OVERVIEW AND SCOPE REQUIREMENTS

1. INTRODUCTION

This document serves as a bid specification for the provision of maintenance, servicing, and repairs of substations and generators on an as and when basis for a period of 36 months in the western cape region.

The purpose of the submission is to obtain approval for the procurement of a substation and generator contractor to maintain, service, and repair substation equipment and generators. PRASA Facilities supply power to offices, Signal Equipment Rooms and to tenants leasing PRASA property. ESKOM, Transnet & Municipality supply power to PRASA at 11kV. The power is distributed to various substations namely Cape Town (Platform 1, Basement, Parcels), Salt River (CEW), Paarden Eiland and Bellville substation) where voltage is stepped down to 400V to be consumed by the load. Substations comprise medium voltage equipment such as step-down transformers, protection devices, breakers, etc.

2. BACKGROUND INFORMATION

a. Status Quo

Currently, there is no maintenance on generators and substations. The Facilities Management department has internal staff that attend to the faults logged but due to the amount and extent of some faults, services of external contractors are requested. We currently do not have sufficient qualified artisans internally to attend to all faults in the region.

2.2. Problem statement

The Western Cape Region has been exposed to a high rate of recurring theft and vandalism which resulted in non-functional and non-compliant PRASA assets that pose safety and health hazard to commuters, PRASA personnel, stakeholders, and the community at large.

- Load shedding and faults may lead to blackouts.
- Electrical equipment such as cables and switch gears are vandalized and stolen almost daily.
- Ageing and poorly maintained electrical equipment are causing unnecessary power failures.
- Income is lost during power failures.
- Failure of substation equipment and generators
- As a result of an increasing rate of vandalism, it is impossible to attend to faults within 24 hours.

3. OBJECTIVE OF THE PROPOSED PROJECT

3.1 DESIRED OUTCOMES FOR CARRYING OUT THE PROPOSED PROJECT

- To schedule planned maintenance works and improve response time for execution of unplanned substation and generator maintenance works to restore the assets to their operational condition and further achieve the goal of improving asset condition and reliability.
