1. PURPOSE

- 1.1. To appoint a service provider to design and implement an expanded Industrial Symbiosis Initiative (ISI) involving trade in waste for implementation over a period of eighteen (18) months in Region B covering Free State, KwaZulu-Natal, and Mpumalanga.

2. INTRODUCTION AND BACKGROUND

- 2.1. Industrial Symbiosis (IS) has become a popular term in recent years to describe industrial activities where a waste or by-product of one actor becomes a resource for another actor. IS can be defined as a subset of industrial ecology; and describes how a network of diverse organizations can foster eco-innovation and long-term culture change; create and share mutually profitable transactions and improve business and technical processes. In simple terms, it is a form of brokering to bring companies together in innovative partnerships, finding ways to use the waste from one company as raw materials for another company, while reducing the amount of waste that would normally be directed to landfills.
- 2.2. This form of brokering can reduce the need for virgin raw material and waste disposal, thereby closing the material loop – a fundamental feature of the circular economy and a driver for green growth and eco-innovative solutions. It can also reduce emissions and energy use while creating new revenue streams.
- 2.3. The National Cleaner Production Centre (NCPC-SA)- a programme of government hosted by the CSIR on behalf of **the dtic** has for the past five years implemented an IS Programme which is a free facilitation service that promotes the exchange of residual resources for businesses in Gauteng, KwaZulu-Natal, Western Cape, Mpumalanga, and Limpopo. During the 5-year period, they have assisted 46 businesses to do cost savings amounting to R17,713,486 through landfill diversion and R45,881,696 through airspace savings. The participating businesses also saved 862,795 m³ industrial water; 111,502 tons of waste diverted from landfill and 70,390 tonnes CO₂e of GHG emissions savings. The NCPC-SA has partnered with provincial departments to provide continuous support and to ensure sustainability of such symbiotic relationships.
- 2.4. To this end, the Department of Forestry, Fisheries, and the Environment (DFFE) has included support for such programmes within the recently published National Waste Management Strategy (NWMS 2020) which provides government's policy and strategic interventions for the waste sector. The NWMS 2020 has identified the NCPC-SA as the lead Implementing Institution for implementing IS across the country and Section 8 of the NWMS outlines an implementation plan with key interventions, targets, and timelines as well as stakeholders responsible for key actions and delivery of the strategy targets. This is presented in Table 1 below-

Table 1- NWMS extract for Outcome 1 intervention and targets

3. PURPOSE OF THE PROJECT

- 3.1 The main purpose of these Terms of Reference (ToR) is to request proposals from suitably qualified independent service providers with extensive and proven experience and knowledge of material flow in an industrial process; capable of conducting research; and have the skills and expertise to facilitate rapid match making between member companies involved in an industrial symbiosis initiative.

4. SCOPE AND EXTENT OF WORK

- 4.1. The service provider is expected to design and implement an Industrial Symbiotic Initiative (ISI) customised for Region B: Free State, KwaZulu-Natal, and Mpumalanga provinces for a period of 18 months. The service provider is also expected to conduct company assessments for twenty (20) entities per province belonging to Region B; design custom made initiatives per company; facilitate interaction between company matches where waste exchange takes place; record the synergy on a database; sign off on the symbiosis (partnership); follow up on a synergy (match making partnership) to establish and maintain relationship and continuity; and also provide training and technical support to match making partnerships (industrial symbiotic partnerships) of companies that are owned by (but not limited to) women, youth and people living with disabilities over a period of 18 months.
- 4.2. The service provider should make every effort to provide a detailed process/methodology, deliverables, and timeframes, including the identification of risks in their proposal, indicating how they will develop and implement this IS initiative across Region B; and how they will mitigate challenges and risks that may emerge from such an initiative.
- 4.3. The proposal should outline training and technical support to no less than 15 (fifteen) entities per province, owned by (but not limited to) women, youth and people living with disabilities within a period of 18 months. The proposal should also highlight how sustainable use of resources; identification of key players and strengthening of existing partnerships will be carried out; how the proposed IS initiative can drive the development of emerging small business and/or new businesses and how waste diversion and waste reduction during manufacturing processes will be addressed.
- 4.4. An expanded breakdown of the scope and extent of work is provided below-

4.4.1 Detailed research (feasibility study) and Implementation plan

- 4.4.1.1. The service provider is expected to conduct detailed research (feasibility study) and engage key industry stakeholders to design an expanded Industrial Symbiosis Initiative (ISI) for implementation within Region B. There is an existing IS Programme hosted by the NCPC-SA, hence the service provider will need to expand and strengthen the existing programme and not necessarily initiate a new programme. This means building up from the existing partnerships and resources; and not double dipping and drawing existing participating companies as recruits into the proposed current project. However, engagement with these stakeholders will be necessary to draw on lessons learned for input into the current project.
- 4.4.1.2. The feasibility study and implementation plan should highlight how the twenty (20) companies will be targeted per province within Region B; which chemicals and waste related sectors for those provinces; the targeted amount of waste to be diverted from landfill; number of women, youth and people living with disabilities owned businesses to be targeted (initiative is targeting these groups but not exclusively) and number of trained and supported entities to be covered during the 18 months. The implementation plan should also highlight how industrial symbiosis and cleaner production impact will be measured (i.e. environmental, social, and economic indicators).

4.4.2 Stakeholder Engagement

- 4.4.2.1. The service provider is expected to conduct stakeholder engagement with key players identified within the ISP as was hosted by the NCPC-SA and highlighted within the NWMS 2020. The stakeholders should include (but not be limited to) women, youth and people living with disabilities owned businesses within the chemicals and waste sector; provincial and local government officials involved in waste management especially the Waste Management Officers (WMO); Department of Science and Innovation (DSI) through their Technology Innovation Agency (TIA) and the CSIR Waste Research, Development and Innovation Roadmap (Waste RDI Roadmap); Industrial Development Zones (IDZ); Business Chambers and Industry Associations.
- 4.4.2.2. The service provider is also expected to engage relevant stakeholders to get buy-in; identify key companies to participate in the programme; get these participating companies to sign agreements/contracts for brokering their waste in this programme; and related activities.
- 4.4.2.3. Stakeholder engagement and buy-in is very critical, hence the service provider should make every effort to detail in their proposal how this process will be handled and should challenges, and risks occur; how these will be mitigated.

4.4.3 Company assessments (Cleaner Production and Industrial Symbiosis customized initiatives)

- 4.4.3.1. The service provider is expected to conduct company site visits and assessments to determine/get factual account of (but not limited to) the company's resources and waste in relation to CO₂ emissions, landfill costs, use of virgin resources, industrial water usage, hazardous waste, pollution, and transport costs.
- 4.4.3.2. The service provider must design customized IS initiatives (per participating company) that will assist each company increase their sales and profits, tap into new businesses/markets; create jobs, utilise assets more efficiently, become innovative and create inward investment from their savings/profits as well as the development or documentation of case studies and success stories. Special focus should be on (but not limited to) women, youth and people living with disabilities owned businesses.
- 4.4.3.3. The service provider's proposal should outline how these company assessments will be conducted; deliverables and timeframes involved; process to get sign off regarding cleaner production and customised IS initiatives; and related.

4.4.4 Training and technical support to IS partnerships

- 4.4.4.1 The service provider is expected to provide training and technical support to IS partnerships (special focus should be on - but not limited to- women, youth and people living with disabilities owned businesses). There should be a minimum of at least 15 entities trained and provided with technical support by end of financial year of 2022/23 (per province in Region B).
- 4.4.4.2 The service provider's proposal should provide a detailed outline of what kind of training and how this training will be rolled out with clear deliverables and timeframes; risks and how these will be mitigated. The proposal should also provide a detailed outline of what kind of technical support and how this support will be provided (and by whom). Again, there should be clear deliverables and timeframes; risks and how these will be mitigated.

4.4.5 IS partnerships agreements and database

- 4.4.5.1 The service provider is expected to secure symbiosis agreements between participating IS entities. The proposal should reflect how the match/synergy will be identified and secured/signed-off (i.e., facilitate interaction between company matches and waste exchange).
- 4.4.5.2 Proposal should outline how the records of the synergies will be kept and updated; and how these agreements/partnerships will/can be maintained

4.4.6. Documenting case studies (success stories and challenges)

- 4.4.6.1 The service provider's proposal should detail how they will document case studies and how they will collect data on waste diversion, additional revenue, private investment, GHG savings, job creation, cost savings etc.

4.4.6.2 The case studies will be distributed or shared broadly by the DFFE, NCPC-SA and partners.

4.4.7. Reporting and Monitoring

4.4.7.1 The proposal should also reflect deliverables and timeframes for progress reporting and monitoring of activities. This should include who will receive the reports (linked to the stakeholder engagement process in section 4.5 and 4.6 of this ToR), reasons why they should have access to those reports and linked timeframes with risks and mitigation measures.

4.5 The Service Provider is at liberty to highlight any additional points (which are not mentioned in the lists above- sections 4.4.1 to 4.4.7) which they deem important for inclusion in their proposal.

5. IMPORTANT POINTS TO NOTE

5.1 Service Provider must present in their proposal all the team members that will be assigned to the project within the various provinces in Region B to show availability of capacity to do the work

5.2 All team member's CVs to be attached with accompanying references and associated letters of successfully completed projects/contracts (industrial symbiosis related projects).

5.3 A non-compulsory briefing session is scheduled for 06 July 2022 from 09H00 to 10h30 and the link to the virtual meeting is attached below. The link will also be published via the DFFE and NCPC-SA websites.
