CIPC's mandate is registration and maintenance of Companies, Close Corporations, Cooperatives, and Intellectual Properties in South Africa. The CIPC stores and uses/updates these entities data, including Customer/Director Name/s; Customer Birth, Address, etc. and assigns unique registration numbers per entity, e.g. Company Registration Number.

The CIPC is a respected custodian of large quantities of data, and related to this data are issues of integrity and quality, primarily. Secondary, there is a vast economic interest/usage as well as regulatory usage of this data by Government and Third Parties. Disclosure of information as well as Dispute Resolutions are other functions that uses the data.

Therefore, the CIPC needs to ensure the integrity, reliability, and quality of its data in order to provide reliable information and services. The CIPC strives to improve the competitiveness of the South African economy by enhancing the reputation of South African businesses as well as the business environment.

2. **INTRODUCTION**

CIPC is embarking on a data clean-up exercise by implementing a Data Management Strategy that will ensure that its data is propositioned as a value for current and future offerings to all its stakeholders, whilst also making it commercially available.

A Cloud-Based Data Management Platform (CDMP) tool is a critical business requirement to support all strategic & operational data initiatives across all the CIPC's offices/branches. A CDMP will ensure secured, readily available data access across multiple channels; data standardizing/consistency; data integrity & quality; as well as ease of integration to myriad CIPC legacy platforms/applications.

The CBDMP will address the CIPC's Data Management Functional Requirements by:

- maximizing data assets,
- controlling and organizing data assets,
- data presentation/visualization,
- ensuring ease of administration,
- facilitating 3rd party data integration,
- providing data privacy compliance & governance controls,
- providing multiple sources customised reporting,
- ensuring multiple sources data ingestion (online & offline data),
- providing role-based access controls,
- easing data export controls, and
- decoupling CIPC data layer from legacy systems to implement new services faster and repeatedly.

3. SCOPE OF WORK

The CDMP Tool comprises:

- ✓ Oracle Analytics Cloud,
- ✓ Oracle Data Catalog,
- ✓ Oracle Data Integration,

Figure 1 depicts the main steps to register, maintain and deregister an entity. Each step/process has its own data requirements. The scope of work entails the supply, installation, configuring, migrating and commissioning of (1) Oracle Analytics Cloud, (2) Oracle Data Catalog, (3) Oracle Data Integration for 4 environments (Dev, Test, Pre-Production and Production), as well as a Disaster Recovery (DR) solution in the event of an outage.
