CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. PURPOSE

The purpose of these Terms of Reference is to:

- 1.1 Define the scope of work and the expected delivery outcomes of the project to be undertaken by the appointed service provider within the agreed timeframe and the allocated budget as well as to outline the conditions of appointment;
- 1.2 Provide a reference framework for conducting a prefeasibility study at identified sites/locations for the purpose of coastal access infrastructure designs to unlock socio-economic development opportunities; and
- 1.3 To articulate the feasibility study and planning needs of the coastal access infrastructure project.

2. INTRODUCTION AND BACKGROUND

Background of the project to be provided.

- 2.1 The National Environmental Management: Integrated Coastal Management Act, 2008 (Act No. 24 of 2008) referred to "ICM Act" seeks to amongst others, provide, within the framework of the National Environmental Management Act, 1998, (Act No. 107 of 1998), for the co-ordinated and integrated management of the coastal zone by all spheres of government in accordance with the principles of co-operative governance. One of the objectives of ICM Act is to ensure equitable access to the beaches for South Africans. Section 13 of the Act, secures the right of reasonable access to coastal public property and the entitlement to use and enjoy the Coastal Public Property (CPP) by all citizens of the Republic of South Africa.
- 2.2 As custodians and champions of the CPP, which is owned by the citizens of South Africa, the department is aiming to provide support to municipalities and provinces to ensure transformation and realisation of equitable access to coastal benefits to all and in so doing, support growing tourism, recreational, economic development and fair access to coastal amenities. It is a proactive effort to respond to needs and identify responses in a manner that provides advocacy to efforts that contribute to uplifting coastal communities, alleviating poverty and exposing coastal communities to socio-economic development opportunities.
- 2.3 The coastline of South Africa stretches for some 2 798 kilometres across four provinces, namely KwaZulu-Natal, Eastern Cape, Western Cape and Northern Cape. Our coastline is dynamic, diverse and provides an array of social and economic opportunities. The project seeks a balance between enhancing environmental protection and preservation on the one hand, and socio-economic development that benefits local communities on the other, while making a contribution to the coastal and marine tourism stimulation initiatives.
- 2.4 The coastal access infrastructure project seeks to identify challenges, needs and development opportunities through an informed and thorough process that utilises pre-feasibility studies to identify the most recommendable among a limited array of intervention scenarios. The recommended intervention (the Project) is then subjected to planning and feasibility to a point where it is ready for implementation or construction. The studies inform a more targeted flow of public investment funds, thus eliminating their potential fruitlessness from the beginning. These studies are also intended to secure from the outset,

public participation and acquisition of buy-in from all interested and affected parties. The selected site and location is highlighted below as figure 1.

Figure 1. The coastal access priority site at Meerensee/ Middelvlei in Overstrand Local Municipality.

- 2.5 The proposed pilot site for coastal access at Meerensee/ Middelvlei (also known as Sonesta) in Overstrand Local Municipality is an initiative to implement the obligations of local government to facilitate public access to coastal public property as well as to implement both the Provincial and Municipal Coastal Management Programmes and the Western Cape Provincial Coastal Access Strategy and Plan (WC PCASP). The site will require the legal facilitating of public service and further prioritise the infrastructure requirements to support the coastal access. The infrastructure must be prioritised to enable socio-economic needs of the communities within the municipality.

3. OBJECTIVES

The objectives of the Project are:

- 3.1 To compile a Prefeasibility Study Report relating to projects or project clusters at identified areas, sites or locations for facilitating coastal access infrastructure development needs. This step culminates in the articulation of the recommended intervention(s) (the Project), and its further processing as detailed in “Scope and Extent of Work” – Section 4 below;
- 3.2 To provide departmental decision-makers and government with sufficient information to justify acceptance, modification or rejection of any and all of the intervention scenarios or project clusters;

- 3.3 To utilise existing comprehensive assessment tool as a prioritisation framework to be used for coastal access infrastructure development needs comprising of PESTLE (Political, Economic, Social, Technological, Legal & Environmental) factors or utilising any advanced methods and analytical tools;
- 3.4 To conduct project formulation and internal DFFE approval facilitation utilising at relevant project cycle stations;
- 3.5 Facilitation of four (4) Project steering committee meetings to be held in the affected coastal municipality (Overstrand Local Municipality, Western Cape) and four (4) consultation meetings with the key interested and affected stakeholder including affected coastal communities;
- 3.6 Facilitation of necessary reports (monthly progress reports (soft copy) and quarterly progress reports (hard copies) and the development and compilation documentation “construction, bills of quantities”, plans, sketches, designs, applications and presentations including the placement of all deliverable into a web base reporting tool (iReport) which the link will be provided by the Department;
- 3.7 Obtain buy-in from all relevant stakeholders on the recommended Project through external stakeholder consultations with various interested and affected parties at relevant project cycle stations; and
- 3.8 Facilitating all the required approval permits or authorisation (Environmental Impact Assessment (EIA) processes, development planning approvals, municipal building approval application processes and any institutional consultations must be embarked on timeously).

4. SCOPE AND EXTENT OF WORK

4.1 Expected Study Outcomes

4.2 The prefeasibility study for the identified site/location is expected to generate the following outcomes:

- 4.2.1 Two (2) main infrastructural intervention scenarios are generated through a process that uses a recorded “basket of possibilities”, reviewed available material/publications as well as internal and external stakeholder consultations;
- 4.2.1 An analysis of generated scenarios with a view to identification of a preferred, therefore proposed intervention scenario to address problems in the economic, social and environmental sectors;
- 4.2.2 The proposed scenario may draw projects coming from different initial clusters, and such projects may be in different locations within the proposed project area, all at the discretion of DFFE with the support from the Project Steering Committee;
- 4.2.3 An analysis that proposed scenario based on preliminary designs, taking account of technical, economic, financial, institutional, management, environmental, socio-cultural, regulatory and operational aspects;
- 4.2.4 Recommendation of the preferred scenario (the Project), detailing the expected benefits to the users and beneficiaries within the project’s lifetime, and its contribution to the environmental, social and economic development of the region.
- 4.2.5 A preliminary indication of the envisioned project activities, resources required, timing or phasing and estimated costs - all within a preliminary logical framework;

4.2.6 An assessment of the potential sustainability of the project results;

4.2.7 Recommendations for further actions in the formulation of the project, possibly also financing proposals where relevant;

4.3 Issues to be reviewed

4.3.1 Relevance of the Project and consistency with national policy initiatives, access to coastal public property needs, environmental protection requirement for coastal protection zone including governance, development issues and requirements, district and local municipality planning and development “integrated development plan, spatial development plans, local economic development strategy, etc” objectives;

4.3.2 High level Feasibility of the Project:

4.1.1.1 Overall objectives;

4.1.1.2 Project purpose;

4.1.1.3 Project results;

4.1.1.4 Project activities.

4.3.3 Preconditions and Project implementation

4.3.3.1 Preconditions for implementation;

4.3.3.2 Initial cost estimates;

4.3.3.3 The organisational format of the implementing structure, the phasing where applicable, and implementation.

4.4 Prefeasibility study clusters: A suggestion of clusters for prefeasibility analysis in this project yields the list provided on the below table. Suggestions of activities to accommodate or infrastructure to erect are not meant to constrain creative generation of ideas. They are meant to establish the broad direction.

SOME ACTIVITIES TO BE EXPLORED FOR THE PRE-FEASIBILITY STUDIES AND PLANNING
Examples of Required Enabling Infrastructure • Boat launch, ramps or slipway Facilities. • Boardwalks and staircase, • Maintenance and Refurbishment. • ORV sites and trails, hiking trails, camp or resting sites, security or lifesavers areas. • Ablution facilities, beach showers • Beach access floorcoverings “beach mats”, • Signage and Blue Flag Status • Waste management and sewage systems • Parking, access roads, pedestrian walkways. • Designed open spaces, public art and braai facilities. • Facilities for educators “Environmental education center’s”, • Life savers facilities and Kids Playing area; • Recreation/place of Amusement (swimming pools, Water world-Slides, kids playing area) • Entrance controlled gate (security booth, gate, etc.), • Performing arts facilities, information or visitors centres, largely outdoors (Amphitheatre) • Temporary accommodation (B&B or Backpackers’ needs; and restaurants). • Considerations for disabled facilities.

Table 1: shows the suggestions of activities to accommodate or infrastructure to be explored and erected.

- 4.5 The recommended project package will emerge through the mutual consultations and/or workshops and may be drawn from across the above clusters at the reasonable discretion of DFFE. The projects so selected will be executed up to Stage 4.3 of Standard Architectural Services, stopping just short of calling for tenders. As a guide, for buildings of private interest (b&b, backpackers, restaurant etc.), conceptual designs will be expected, as well as construction documentation for the delivery of serviced sites for each respective facility. Design development (Stage 3) in this instance is thus excluded.
- 4.6 As a separate project stream, selected sub-projects of the Project (the preferred Project cluster) will at this stage go to planning implementation (where applicable, up to Stage 4.2 of Standard Architectural Services, including costing and bills of quantities, but short of calling for tenders). Meanwhile the prefeasibility study report compilation continues.
- 4.7 For the sub-projects referred to in 4.4 above, the necessary Environmental Impact Assessment (EIA) processes, development planning approvals, municipal building approval application processes and any institutional consultations must be embarked on timeously, and concluded by the end-date of the Project where this is practicable.
- 4.8 Identification of “Low-hanging Fruit” or the must do projects.

There are small projects that are deemed necessary, and that will not be subjected to a specialist studies other than viabilities as contemplated in Standard Architectural Services. Those projects deemed low hanging fruits may range from the following:

- Safe children’s amusement centre (water world, ablutions, tuck shops, accommodate attractive adult oversight concept);
- Visitor information centre (in consultation with Tourism);
- Marine life and environmental education centre, exhibit space, etc.;
- Life savers’ facilities;
- Temporary accommodation e.g. B&B and Conference Centre (conceptual design, construction documentation for delivery of a serviced site for the facility);
- Pockets of paved vehicle parking (for staff and patrons of facilities, peak season busses, taxis, private vehicles);
- Paved pedestrian walkways (also aim to ease peak season pedestrian congestion).
- Boardwalks and ramps (also consult with the National Council of and for Persons with Disabilities [NCDP], designs must comply with the Universal Design Principles and any applicable ISO standards).

Except where the contrary is stated, these projects will be executed up to Stage 4.3 of Standard Architectural Services, therefore cost estimates and bills of quantities will be produced, stopping just short of calling for tenders.

4.9 Work Plan

- 4.9.1 The service provider is expected to submit a work plan with their offer. Such work plan will contain the bidder’s articulation of the brief to ensure understanding and alignment;
- 4.9.2 It will contain a project plan, task analysis, an assignment organisational chart, manning schedule etc.;
- 4.9.3 The work plan will also set out the service provider’s approach to key project activities.

- 4.11.3 The service provider will prepare an interim report by the end of the quarter “three (3) months”. In this report, the various options reviewed by the service provider will be described in sufficient detail to enable an informed decision to be made on the further development of the preferred option (the Project), which will be recommended by the service provider at this stage;
- 4.11.4 The study conclusions must be presented in the relevant section of the Prefeasibility Study Report. The underlying analysis is to be presented in appendices to the Report;
- 4.11.5 At the draft prefeasibility report stage a presentation will be made to the project steering committee. A Draft Prefeasibility Study Report in three (3) hard copies and two (2) soft copy is to be presented to the Programme Manager (PM) for comment. The PM and the project steering committee are expected to provide comments after two weeks of received of the documents;
- 4.11.6 The service provider will take account of the stated comments in preparing a Final prefeasibility and high-level feasibility Study Report in English (40 - 50 pages excluding appendices). The final report is to be submitted by the end of twenty-four (24) months period of the project.

8.5 PHASE 4: Preference Point System (80/20)

8.5.1 The *fourth phase* is to perform an evaluation of Price and BBBEE on the Bidder, that successfully qualified on phase 3 (Functionality requirements).

8.5.2 Calculation of points for price - The PPPFA prescribes that the lowest acceptable bid will score 80 points for price Bidders that quoted higher prices will score lower points for price on a pro-rata basis. Where functionality is set as criteria, only proposals that meets functionality requirements will be considered to be evaluated on price and B-BBEE.

8.3.2. Calculating of points for B-BBEE status level of contribution

Points will be awarded to a bidder for attaining the B-BBEE status level of contribution or a sworn affidavit certified by the commissioner of oath in accordance with the table below:

Stage 2: The following table must be used to calculate the B-BBEE scores (20)			
B.	PRICE	80

8.3.3 Requirements for B-BBEE

- a) Bidders are requested to submit the original and valid B-BBEE Status Level Verification Certificate issued by SANAS Accredited Verification Agency or certified copies thereof; or B-BBEE Certificate issued by CIPC or Sworn Affidavit commissioned by Commissioner of Oaths together with their bids, to substantiate their B-BBEE rating claims. SBD 6.1 must also be duly completed, signed, and submitted alongside the bid to claim preference points. Failure to do so will result in B-BBEE preference points being forfeited.
- b) A trust, consortium or joint venture must submit a consolidated B-BBEE Status Level Verification Certificate for every separate bid to substantiate their B-BBEE rating claims. Bidders who do not submit B-BBEE Status Level Verification Certificates or are non-compliant contributors to B-BBEE do not qualify for preference points for BBEE but should not be disqualified from the bidding process.
- a) They will score points out of 80 for price only and zero (0) points out of 20 for BBEE. The points scored by a tenderer for B-BBEE contribution must be added to the points scored for price and should be rounded off to the nearest two decimal places.

- d) In a case whereby a **pre-qualification criteria** requires BBB-EE status level of contributor, all tenderer who failed to submit an original and valid B-BBEE Status Level Certificate or certified copies thereof, issued by SANAS or an original/ certified copy of the DTI sworn affidavit will be disqualified on **Pre-qualification stage** and will not reach preference point system stage due to non-compliance.
- e) A bidder will not be awarded the points claimed for B-BBEE status level of contribution if it is indicated in the bid documents that such a bidder intends subcontracting more than 25% of the contract value to any other enterprise that does not qualify for at least the same number of points that the bidder qualifies for, unless the intended sub-contractor is an EME that has the capability and ability to execute the sub-contract.
- f) The contract will be awarded to the tenderer scoring the highest points

9 BID SUBMISSION REQUIREMENTS
