APPOINTMENT OF A PROFESSIONAL SERVICE PROVIDER TO CONDUCT AND PROVIDE FACILITATION, COORDINATION AND MANAGEMENT OF COMMUNITY PARTICIPATION AND SOCIO-ECONOMIC DEVELOPMENT ASPECTS OF PROJECTS AT FETAKGOMO TUBATSE SPECIAL ECONOMIC ZONE FOR A PERIOD OF 24 MONTHS.

PART A: TERMS OF REFERENCE

1. INTRODUCTION

The South African Government seeks to transform the economy into a globally competitive industrial economy, built on the full potential of all citizens and regions. The National Development Programme (NDP) outlines a long-term development path towards a prosperous and successful economy characterised by high levels of economic growth, employment generation and an equitable society. Both the New Growth Path (NGP) and the Industrial Policy Action Plan (IPAP) outline Government's industrial agenda, the critical jobs drivers, prioritised industrial sectors and a range of interventions required to accelerate economic growth, create jobs and fight poverty and under-development.

2. SPECIAL ECONOMIC ZONES (SEZs) IN SOUTH AFRICA

South Africa has embarked on an ambitious programme of establishing SEZs to promote industrialisation, investment and job creation. The *SEZ Act* (Act No. 16 of 2014) provides a legal framework for the initiative, which builds on the Industrial Development Zone (IDZ) programme and seeks to create an internationally competitive SEZ value proposition. *Section 11(b)* of the Act provides for the SEZ Advisory Board to monitor the implementation of SEZ policy and strategy, and report annually to the Minister of Trade, Industry and Competition.

Accordingly, SEZs have been introduced as a tool to:

- Promote industrial agglomeration;
- Build the required industrial infrastructure;
- Promote coordinated planning among key government agencies and the private sector; and

- Use the zones to guide the deployment of other necessary development tools. As industrial and economic development tools, SEZs only work over the long-term and are not suitable as short-term interventions.

3. THE FETAKGOMO-TUBATSE SPECIAL ECONOMIC ZONE (FTSEZ)

The FTSEZ is an industrial cluster initiative that falls within the planned Limpopo Platinum and Chrome cluster which has two components of industrial formations. It is one of the many catalytic projects being implemented by the Limpopo Provincial Government in its endeavour to address the triple challenges of poverty, unemployment and inequality through a focused process of local industrialisation and economic development.

The FTSEZ is strategically located in Fetakgomo Tubatse Local Municipality (FTLM), specifically in the industrial hub of the Steelpoort area, in between 2 huge mining establishments, the Samancor smelter and the Lion Ferrochrome smelter, which are strategic landmarks for its establishment. There is also more than 15 villages (host communities) and more than 40 wards in the Steelpoort area, which creates a necessity for an integrated and inclusive development of catalytic projects in the area. The targeted and strategic location of the FTSEZ in the FTLM stems from the fact that apart from the mineral resources abundance in the area, development has been lagging for many decades. Government has therefore targeted the development of the infrastructure in this region through a number of projects such as townships establishment, the De Hoop Dam and aggressive road improvements in order to leverage on the competitive and comparative advantages of the region.

The FTSEZ will be a multi sectoral SEZ that focuses on but is not restricted to, mineral beneficiation, mining inputs, clean energy generation and general manufacturing, as indicated in the table below.

	Clusters	Projects	Products
Mineral Beneficiation	Platinum	Smelter and Refinery	Refined Platinum
	Chrome	Chrome Chemical plant, Ferrochrome	Chrome Chemicals Ferrochrome
	Vanadium	Vanadium Pentoxide plant,	Lithium & Redox Batteries
Mining Inputs Supply	Manufacturing, Assembling and Components	Assembling and Fabrication plant Electrical and electronics Engineering Services	Mining equipment's and Components Roof bolts Off-road tyres Hydrogen fuel cell dozers
Energy	Green energy Fossil fuel	Solar Energy generation Pyrolysis Plant Oil Blending plant	Solar energy Diesel and gas Tyre carbon black lubricants
General Manufacturing	Chemical, Pharmaceutical, General Processing	Sweet sorghum processing plant Modular concrete slab manufacturing plant Water pipes manufacturing plant Heavy metal assembly plant PV modules manufacturing plant Yarn mill Torrefication plant	Ethanol and sugar Modular concrete products Pipes Mining equipment PV modules Protective clothing Charcoal

The main objective of the FTSEZ is therefore to develop a low carbon green economy which will offer promising opportunities not only to fight climate change, but to enhance energy security and develop local industries. The strategic aim of the FTSEZ is to develop a green primary energy supply to a localised manufacturing of both upstream and downstream activities of the PGM and chrome value chains with a secondary backup from electricity.

It is envisaged that the successful implementation of the FTSEZ will have positive impact on more than a million people in the province due to improved economic activities in the Fetakgomo-Tubatse Local Municipality, the spill-over effects of which will also improve economic progress within other districts and municipalities. These economic activities will not only yield improvements of the wellbeing of the provincial citizens but will also contribute to the enhancement of requisite skills and of South Africa's role in regional integration.

4. LOCATION

The FTSEZ is located in the Steelpoort area of the Fetakgomo Tubatse Local Municipality (FTLM), in the Sekhukhune District Municipality (SDM) of the Limpopo Province. The rationale for this location is to leverage on the existing natural resources including Platinum Group Metals, coal, copper, gold, iron ore, phosphate in the area. The FTSEZ itself is therefore situated between two mining corridors i.e. Dilokong Platinum Corridor and the Steelpoort-Stoffberg Chrome Corridor, with the R 555 provincial road running through the property. It is specifically located on portions of the farm Spitskop 333KT, measuring approximately 1 200 ha in extent. The maps in the figures 1 and 2 below depict the site location nationally, within the municipality area as well as the outline of the property itself.

Figure 1: Location of Tubatse within Sekhukhune District, Limpopo Province

Figure 2: Location of FTSEZ

The FTSEZ project will be implemented into phases as illustrated in Figure 3 and described in the Table below.

Figure 3: FTSEZ Town Planning Layout

- Phase 1 will be split into four sub-phases. The area split of Phase 1 between Phases 1A, 1B, 1C & 1D area as shown in the table below:
