1. PURPOSE

- 1.1. To appoint a service provider who will assist the department with the independent review and revision of the 2017 National Framework for Air Quality Management in South Africa for a period of twelve (12) months.

2. INTRODUCTION AND BACKGROUND

- 2.1. The National Framework for Air Quality Management in South Africa (hereafter referred to as the National Framework) was first published in 2007 by the then Minister of Environmental Affairs and Tourism.
- 2.2. The National Framework was developed as a requirement of Section 7 of the National Environmental: Air Quality Act 2004 (Act No. 39 Of 2004, hereafter referred to as the NEMAQA); which requires that the Minister publish the National Framework to give effect to the objectives of the Act.
- 2.3. The purpose of the National Framework is to:
 - 2.3.1. Achieve the objectives of the NEMAQA, and as such, it provides a medium-to-long-term plan for the practical implementation of the NEMAQA.
 - 2.3.2. Provides mechanisms, systems, and procedures to promote holistic and integrated air quality management through pollution prevention and minimization at source, and impact management concerning the receiving environment from local scale to international issues.
 - 2.3.3. Provides norms and standards for all technical aspects of air quality management.
- 2.4. Section 7(5) (d) of the NEMAQA requires that the Minister review the National Framework at intervals of not more than five years. The year 2022 marked the 5th year since the current framework, the 2017 National Framework for Air Quality Management in the Republic of South Africa was developed.
 - 2.4.1. The review of the National Framework was primarily initiated in the 2021/22 financial year. Inputs derived from the annual National Air Quality Officers Reports, insights provided by air quality experts and authorities, as well as consultations held with provincial and municipal air quality officers during the Mintech Working Group II Meetings. In this regard, the Review of the National Framework was included in the 2022/23 and 2023/24 Working Group II work plans.
 - 2.4.2. The National Environmental Management Laws Amendment Act, 2022 (NEMLAA 4) on June 30, 2023, triggered additional amendments, which encompassed revisions to NEMAQA. Some sections of NEMLAA 4 did not come into force simultaneously with the other

provisions. This delay was due to the need to incorporate procedures into the National Framework to provide legal clarity for certain clauses within NEMAQA.

- 2.5. The National Framework Review Report, as it stands to date, lays the groundwork for amending the framework. This comes before the Minister's involvement in a consultative process, as defined in sections 56 and 57 of NEMAQA. Additionally, the review report guides the extent of amendments to be considered in the 2017 National Framework.
- 2.6. Based on feedback collected during stakeholder workshops, a preliminary version of the National Framework document will be created, accompanied by a report summarizing stakeholder comments and indicating how those comments will be incorporated into the development of the Revised National Framework (referred to as the 2023 National Framework).
- 2.7. The National Framework mandates that the review and creation of the 2023 Framework must be an impartial process. As a result, the initial draft of the 2023 National Framework, the 2017 National Framework review report, along the stakeholder comments report, will be submitted to an independent service provider for evaluation.
- 2.8. This independent review aims to confirm the proper conduct of the stakeholder engagement process and the comprehensive consideration of all stakeholder feedback in the compilation and finalization of the 2023 National Framework with inclusivity as a guiding principle. Furthermore, the review process will evaluate the grammatical and technical elements of the National Framework both prior to and after incorporating public comments.
- 2.9. Following this independent review, the draft Framework document will require approval from the Mintech Working Group II before being recommended to Mintech to be published in the Government Gazette for public comments. A Comments & Response database will be established to effectively manage public comments, and any necessary adjustments to the draft National framework will be made in response to the feedback received. These amendments to the national framework will be included as part of the independent review. The final result will be the 2023 National Framework for Air Quality Management in RSA."
- 2.10. The outcomes of the above-mentioned process will inform the revision of the 2017 National Framework for Air Quality Management in RSA.

3. OBJECTIVES

- 3.1. The primary objective of the project is to conduct an independent review and make amendments to the 2017 National Framework for Air Quality Management in RSA to include new relevant information

while giving due consideration to input and feedback from key stakeholders, thereby compiling the 2023 National Framework for Air Quality Management in RSA

4. SCOPE AND EXTENT OF WORK

4.1.
