- a. On receipt of a letter of appointment, the Service Provider is required to remove all fish and fish products from the demarcated/nominated processing area of the facility. The appointed Project Management Team (PMT) as an oversight will inspect the facility at most 24 hours prior to the service provider receiving abalone from the Department and certify that the facility is cleared.
- b. Abalone is stored by the Department at its cold store storage facilities throughout the country. The Service Provider will be required to provide transport and security to collect abalone from these storage facilities and/or any other premises as indicated by the Department to transport it to the processing facility. Service providers are required to submit a price / kilometre for the collection of this product for delivery to their processing facility. This cost must also include the cost of security. Officials of the Department will oversee the collection and receipt of the confiscated abalone from these outside centers.
- c. Receipt of any abalone from the Department's cold store must only be undertaken in the presence of a member of the PMT. The PMT shall monitor and record the weighing and receipting of all abalone received by the service provider per release.
- d. Abalone collected and receipted from any other centre will be conducted in the presence of officials from the Department. On arrival at the processing facility, the load will then be weighed and recorded in the presence of the PMT.

Once the abalone is receipted by the Service Provider, as provided above, from the Department's cold stores and/or any other premises as indicated by the Department, it must then be transported by the Service Provider in appropriately equipped vehicles and freezer trucks (long distance) that are reliable and secure.
- f. Upon the abalone being received at the processing facility, the abalone must be weighed before and after the thawing process and the respective weights and counts recorded in the presence of a PMT member.
- g. The Service Provider must carefully record the weight of the packaging materials and tags and hand it back to the Department via the PMT for destruction.
- h. The Service Provider must use skilled food handlers to sort the abalone depending on whether the abalone is fit for human consumption or not. The abalone that is considered fit for human consumption must be shucked, gutted and washed and processed immediately. The PMT will conduct daily recordings of weights and counts throughout the process.
- i. The Service Provider must accurately monitor and record in detail all weight loss incurred during the processing. The recorded weight loss must be certified as true and correct by the Service

Provider. All variances observed by the PMT in terms of weight and count must immediately be reported to the Department in writing.

- j. The Service Provider must store the abalone products of the Department in a secure area inside the processing facility separate from any other product and provide 24-hour monitoring and security measures with adequate video surveillance throughout the facility. The Department reserves the right to inspect the equipment of all security systems to verify that it is in working order and should the Department establish that the security is compromised, the Department may store any abalone products at a location it chooses at the cost of the service provider. The Service Provider will be required to remedy the situation and provide the requisite security at its cost.
- k. The locking and unlocking of the processing facility on a daily basis must be performed in the presence of the PMT.

- 7.5.4 The 80/20 as an appropriate preference point system will be used in the evaluation and adjudication of this quote. However, it must be extended that the lowest acceptable quote will be used to determine the applicable preference point system as per regulation (Section 3(2)(b) of the Preferential Procurement Regulations (PPR) 2022, which states: "If it is unclear which preference point system will be applicable, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable proposal will be used to determine the applicable preference point system". Therefore, either 80 or 90 points, depending on the rand value of the proposal, will be awarded to the suppliers who offers the lowest price, and proportionately fewer points are awarded to those with higher prices. However, it must be extended that the lowest acceptable supplier will be used to determine the applicable preference point system as per regulation (Section 3(2)(b) of the Preferential Procurement Regulations (PPR) 2022, which states: "If it is unclear which preference point system will be applicable, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable supplier will be used to determine the applicable preference point system". Therefore, either 80 or 90 points, depending on the rand value of the

quotation, will be awarded to the suppliers who offers the lowest price, and proportionately fewer points are awarded to those with higher prices. Either 20 or 10 points are then available as preference points for specific goals, as applicable. The contract will be awarded to the suppliers that scores the highest total number of adjudication points per category.

7.5.7 Points will be awarded to a supplier for specific goals in accordance with the table below:
