PART B – SPECIFICATIONS AND PRICING SCHEDULE

15. SPECIFICATIONS

Specification for 2020/2021 & 2021/22 Unbundling of Immoveable Infrastructure Assets

NB: Service providers are required to read and study the specifications, the general conditions of the contract, as well as the instructions very carefully before submitting their offers.

Non- compliance with specifications will invalidate your offer.

1. BACKGROUND

Municipalities are not only responsible for the provision of essential engineering services that include potable water supply, sanitation, electricity reticulation, the provision of roads and stormwater, and solid waste collection and disposal, but also for housing and shared community assets like cemeteries, parks, sports grounds, libraries etc. Whilst municipalities also have obligations towards governance, community safety and health, and development services, the success or failure of a municipality is substantially measured by the availability and quality of infrastructure services. As such, a municipality is an asset-intensive business.

The introduction of Generally Recognised Accounting Practice (GRAP) within local government focussed attention on asset management, and National Treasury additionally issued a number of asset management practice and reporting requirements. These include identifying, componentise, valuing and tracking the health of assets, establishing programmes and providing resources to care for assets, and reporting on these matters. The Municipality requires the services of adequately qualified professionals that can assist the Municipality to achieve this.

2. SCOPE OF WORK

Stellenbosch Municipality would like to appoint a competent service provider for the Unbundling of Immoveable Infrastructure Assets for the year ending 30 June 2021 and 30 June 2022. The contract duration is thus 01 August 2021 until 31 December 2022.
